PrepAwayExam presents you with their effective Microsoft Cybersecurity Architect (SC-100) exam dumps as we know that the registration fee is very high (from \$100-\$1000). PrepAwayExam product covers all the topics with a complete collection of actual SC-100 exam questions. We also offer free demos and up to 1 year of free Microsoft Dumps updates. So, our Microsoft SC-100 prep material is the best to enhance knowledge which is helpful to pass Microsoft Cybersecurity Architect (SC-100) on the first attempt.

Microsoft SC-100 exam tests the candidate's ability to implement security solutions that protect against cyber threats such as malware, phishing attacks, data breaches, and other cyber attacks. SC-100 exam also tests the candidate's ability to design and implement security solutions that meet compliance requirements such as GDPR, HIPAA, and PCI DSS.

Microsoft Cybersecurity Architect exam is divided into four domains: Design and implement security solutions, Secure data and applications, Manage identity and access, and Manage security operations. Each domain covers specific topics that are essential for cybersecurity professionals. SC-100 Exam is designed to assess the candidates' knowledge and skills in these domains, and it tests their ability to apply these skills in real-world situations.

Top Valid Test SC-100 Vce Free | Efficient SC-100 Valid Mock Exam: Microsoft Cybersecurity Architect 100% Pass

Our SC-100 exam questions just focus on what is important and help you achieve your goal. When the reviewing process gets some tense, our SC-100 practice materials will solve your problems with efficiency. With high-quality SC-100 Guide materials and flexible choices of learning mode, they would bring about the convenience and easiness for you. Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember.

Microsoft Cybersecurity Architect Sample Questions (Q13-Q18):

NEW QUESTION # 13

You have an Azure subscription that has Microsoft Defender for Cloud enabled. You are evaluating the Azure Security Benchmark V3 report.

In the Secure management ports controls, you discover that you have 0 out of a potential 8 points. You need to recommend

configurations to increase the score of the Secure management ports controls.

Solution: You recommend onboarding all virtual machines to Microsoft Defender for Endpoint.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Explanation

<https://docs.microsoft.com/en-us/azure/defender-for-cloud/secure-score-security-controls>

NEW QUESTION # 14

Your company plans to deploy several Azure App Service web apps. The web apps will be deployed to the West Europe Azure region. The web apps will be accessed only by customers in Europe and the United States.

You need to recommend a solution to prevent malicious bots from scanning the web apps for vulnerabilities. The solution must minimize the attack surface.

What should you include in the recommendation?

- A. Azure Firewall Premium
- B. Azure Traffic Manager and application security groups
- C. network security groups (NSGs)
- D. Azure Application Gateway Web Application Firewall (WAF)

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/azure/web-application-firewall/ag/bot-protection>

NEW QUESTION # 15

What should you create in Azure AD to meet the Contoso developer requirements?

Answer Area

Account type for the developers:

- A guest account in the contoso.onmicrosoft.com tenant
- A guest account in the fabrikam.onmicrosoft.com tenant
- A synced user account in the corp.fabrikam.com domain
- A user account in the fabrikam.onmicrosoft.com tenant

Component in Identity Governance:

- A connected organization
- An access package
- An access review
- An Azure AD role
- An Azure resource role

Answer:

Explanation:

Answer Area

Account type for the developers:

- A guest account in the contoso.onmicrosoft.com tenant
- A guest account in the fabrikam.onmicrosoft.com tenant
- A synced user account in the corp.fabrikam.com domain
- A user account in the fabrikam.onmicrosoft.com tenant

Component in Identity Governance:

- A connected organization
- An access package
- An access review
- An Azure AD role
- An Azure resource role

NEW QUESTION # 16

Hotspot Question

You have the Azure subscriptions shown in the following table.

Name	Linked Microsoft Entra tenant	Description
Sub1	contoso.com	Contain an Azure Backup vault named Vault1
Sub2	contososecurity.com	Used to manage security resources

The tenants contain the groups shown in the following table.

Name	Tenant	Members
Group1	contoso.com	Administrators who manage Backup for Sub1
Group 2	contososecurity.com	Administrators who manage security for Sub1 and Sub2

You perform the following actions:

- Configure multi-user authorization (MUA) for Vault1 by using a resource guard deployed to Sub2.
- Enable all available MUA controls for Vault1.
- In contoso.com, create a Privileged Identity Management (PIM) assignment named Assignment1.
- Configure Assignment1 to enable Group1 to activate the Contributor role for Vault1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
To enable MUA for Vault1, a resource guard must be deployed to Sub1.	<input type="radio"/>	<input type="radio"/>
A user in Group2 must approve changes made by a user in Group1 to the backup policies of Vault1.	<input type="radio"/>	<input type="radio"/>
A user in Group1 that activates Assignment1 can disable soft delete for the backups of Vault1, without the approval of a user in Group2.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
To enable MUA for Vault1, a resource guard must be deployed to Sub1.	<input type="radio"/>	<input checked="" type="radio"/>
A user in Group2 must approve changes made by a user in Group1 to the backup policies of Vault1.	<input checked="" type="radio"/>	<input type="radio"/>
A user in Group1 that activates Assignment1 can disable soft delete for the backups of Vault1, without the approval of a user in Group2.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Box 1: No

No - To enable MUA for Vault1, a resource guard must be deployed to Sub1.

The Backup vault is in Sub1.

You create a Resource Guard in a different tenant than the Backup Vault, to get maximum protection.

Note: The Security admin creates the Resource Guard. We recommend that you create it in a different subscription or a different tenant as the vault.

However, it should be in the same region as the vault.

Box 2: Yes

Yes - A user in Group2 must approve changes-made by a user in Group1 to the backup policies of Vault1.

Group1 has administrators who manage Backup for Sub1.

Group2 has administrators who manage security for Sub1 and Sub2.

Box 3: No

No - A user in Group1 that activates Assignment1 can disable soft for the backups of Vault1, without the approval of a user in Group2.

You can't disable the protected operations - Disable soft delete and Remove MUA protection.

NEW QUESTION # 17

You have an Azure Storage account named storage1.

You plan to secure storage1 by using a Bring Your Own Key (BYOK) strategy.

You create an Azure key vault named AKV1 and upload a compatible key.

You need to configure storage1 to use the key stored in AKV1 for encryption.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Assign storage1 the Key Vault Reader role to access the key.
- Create a managed identity and assign it to storage1.
- Create and assign an access policy for storage1.
- Configure Azure Storage encryption with customer-managed keys.
- Create and assign a Key Vault access policy.
- Create a managed identity and assign it to AKV1.

Answer Area

Empty area for moving and ordering actions.

Answer:

Explanation:

Actions

- Assign storage1 the Key Vault Reader role to access the key.
- Create a managed identity and assign it to storage1.
- Create and assign an access policy for storage1.
- Configure Azure Storage encryption with customer-managed keys.
- Create and assign a Key Vault access policy.
- Create a managed identity and assign it to AKV1.

Answer Area

- Configure Azure Storage encryption with customer-managed keys.
- Create and assign a Key Vault access policy.
- Create a managed identity and assign it to AKV1.

Explanation:

Actions

- Assign storage1 the Key Vault Reader role to access the key.
- Create a managed identity and assign it to storage1.
- Create and assign an access policy for storage1.

Answer Area

- Configure Azure Storage encryption with customer-managed keys.
- Create and assign a Key Vault access policy.
- Create a managed identity and assign it to AKV1.

NEW QUESTION # 18

.....

Maybe you are busy with your work and family, and do not have enough time for preparation of SC-100 certification. Now, the Microsoft SC-100 useful study guide is specially recommended to you. The SC-100 questions & answers are selected and checked with a large number of data analysis by our experienced IT experts. So the contents of PrepAwayExam SC-100 Pdf Dumps are

very easy to understand. You can pass with little time and energy investment.
