## Pass Guaranteed Quiz 2026 200-901: DevNet Associate Exam Authoritative Reliable Test Materials

We are so proud that we own the high pass rate of our 200-901 exam braindumps to 99%. This data depend on the real number of our worthy customers who bought our 200-901 exam guide and took part in the real exam. Obviously, their performance is wonderful with the help of our outstanding 200-901 Exam Materials. We have the definite superiority over the other 200-901 exam dumps in the market. If you choose to study with our 200-901 exam guide, your success is 100 guaranteed.

### Cisco DevNet Associate Exam Sample Questions (Q15-Q20):

#### NEW QUESTION # 15

Which statement about authentication a RESTCONF API session with a router that runs Cisco IOS XE software is true?

- A. OAuth must be used.
- B. No authentication is required.
- C. A token must be retrieved and the associated string must be embedded in the X-Auth-Token header.
- D. Basic authentication must be used.

**Answer: D**

Explanation:

Authentication is accomplished using typical HTTP authentication models, such as basic authentication, where usernames and passwords are Base64 encoded and transmitted from the client to the server via an Authentication header.

#### NEW QUESTION # 16

A developer pushes an application to production. The application receives a webhook over HTTPS without a secret. The webhook information contains credentials to service in cleartext. When the information is received, it is stored in the database with an SHA-256 hash. Credentials to the database are accessed at runtime through the use of a vault service. While troubleshooting, the developer sets the logging to debug to view the message from the webhook. What is the security issue in this scenario?

- A. Hashing the credentials in the database is not secure enough; the credentials should be encrypted.
- B. Database credentials should be accessed by using environment variables defined at runtime.
- C. During logging, debugging should be disabled for the webhook message.
- D. During the transport of webhook messages, the credentials could be unencrypted and leaked.

**Answer: D**

#### NEW QUESTION # 17

What is the first development task in test-driven development?

- A. Write a passing test case for existing code.
- B. Write a failing test case for a desired function.
- C. Reverse engineer the code for a desired function.
- D. Write code that implements a desired function.

**Answer: B**

#### NEW QUESTION # 18

Fill in the blanks to complete the statement.

Given a username of "devnet" And a password "Cisco123", applications must create a base64 encoding of the string " \_\_\_\_\_ " when sending HTTP requests to an API that uses \_\_\_\_\_ authentication.

**Answer:**

Explanation:

devnet:Cisco123, Basic

Explanation:

Solution as below

When using Basic Authentication in HTTP, the username and password are concatenated with a colon (:) in between. This concatenated string is then encoded using Base64. For the provided username devnet and password Cisco123, the string devnet:Cisco123 is encoded in Base64, resulting in ZGV2bmV0OkNpc2NvMTIz. This Base64 string is then included in the HTTP Authorization header. This process is described in the RFC 7617 and is a standard practice in HTTP Basic Authentication.

#### NEW QUESTION # 19

What is the IANA-assigned TCP port for NETCONF over SSH?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

#### NEW QUESTION # 20

.....

It is our promissory announcement on our 200-901 exam questions that you will get striking by these viable ways. So do not feel giddy among tremendous materials in the market ridden-ed by false materials. With great outcomes of the passing rate upon to 98-

100 percent, our 200-901 Preparation braindumps are totally the perfect one. And you can find the comments and feedbacks on our website to see that how popular and excellent our 200-901 study materials are.
