

H12-521_V1.0 Exam Braindumps: HCIP-Intelligent Vision V1.0 & H12-521_V1.0 Actual Test Questions

BONUS!!! Download part of BraindumpStudy H12-521_V1.0 dumps for free: <https://drive.google.com/open?id=1unIWcezAjGhdKYYInvxb9akAWvopJjP3>

If you prefer to study by your mobile phone, our H12-521_V1.0 study materials also can meet your demand, because our learning system can support all electronic equipment. You just need to download the online version of our H12-521_V1.0 preparation questions, and you can use our products by any electronic equipment. We can promise that the online version will not let you down. We believe that you will benefit a lot from it if you buy our H12-521_V1.0 Study Materials.

Huawei H12-521_V1.0 Exam Syllabus Topics:

Section	Objectives
	- AI development tools • 1. Model training workflows • 2. MindSpore framework basics
Huawei AI Platform and Deployment	- Edge and cloud deployment • 1. Model inference and optimization • 2. Atlas AI hardware overview
	- Neural network fundamentals • 1. Training and optimization basics • 2. CNN architecture and principles
Deep Learning for Vision	- Model training and evaluation • 1. Overfitting and regularization • 2. Loss functions and metrics

- Feature extraction principles
 - 1. Traditional feature engineering methods
 - 2. Edge detection and feature descriptors

Computer Vision Fundamentals

- Image representation and processing basics
 - 1. Image enhancement and filtering
 - 2. Image formats and color spaces
- Video analysis
 - 1. Event detection and analysis
 - 2. Object tracking in video streams

Intelligent Vision Applications

- Object detection and recognition
 - 1. YOLO and similar detection models
 - 2. Image classification pipelines

H12-521_V1.0 Trustworthy Dumps, H12-521_V1.0 Best Preparation Materials

Latest Huawei H12-521_V1.0 Dumps are here to help you to pass your Huawei Certification exam with BraindumpStudy' valid, real, and updated H12-521_V1.0 Exam Questions with passing guarantee. The Huawei H12-521_V1.0 certification is a valuable certificate that is designed to advance the professional career. With the HCIP-Intelligent Vision V1.0 (H12-521_V1.0) certification exam seasonal professionals and beginners get an opportunity to demonstrate their expertise. The HCIP-Intelligent Vision V1.0 exam recognizes successful candidates in the market and provides solid proof of their expertise.

Huawei HCIP-Intelligent Vision V1.0 Sample Questions (Q13-Q18):

NEW QUESTION # 13

The video big data system can aggregate and store all kinds of video data (vehicles, faces, portraits, etc.) and perform standardized processing.

- A. False
- B. True

Answer: B

NEW QUESTION # 14

On a Lite Edge network, service TOR switches need to support the static LACP mode, and eth-trunk needs to be configured on the switches.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

The correct answer is A. TRUE . In IVS3800 and Lite Edge network construction, the service plane relies on TOR switching for high-bandwidth service traffic, and link bundling is a standard design approach to provide bandwidth aggregation and redundancy.

The material identifies the service-plane access layer explicitly:

"Service TOR: TOR access switch on the service plane. The 10 GE optical port or GE port on the service plane is connected to the switch. CE6800 series switches are recommended". This directly confirms that service TOR switches are a required part of the service-plane topology.

In practical Huawei data-center-style deployment, when multiple service links are aggregated between servers and TOR switches, eth-trunk must be configured, and static LACP support is used to ensure the bundled links operate correctly and consistently. That requirement aligns with standard network design logic for service-plane access in container-based edge environments, where stability and predictable uplink behavior are essential. Because Lite Edge depends on reliable service-plane connectivity and TOR-based aggregation, the statement that service TOR switches need to support static LACP mode and require eth-trunk configuration is correct.

NEW QUESTION # 15

Regarding the replacement of parts, which of the following descriptions is correct? (Multiple Choice)

- A. Process of replacing the functional module X Put on protective gloves - disconnect the mains front input circuit breaker of the functional module - remove the old functional module - install the new functional module-close the AC front input circuit breaker of the functional module - take off Gloves
- B. The process of removing the lithium battery module. Record the cable connection position of the lithium battery module + use a flat-blade screwdriver to pry off the fastening lock on the quick-plug terminal. Remove the quick-plug terminal - remove the interface cables in turn. And do a good job of insulation protection - remove the old lithium battery module
- C. The process of replacing the lithium battery module, wear protective gloves - remove the old lithium battery module H install a new lithium battery module take off the protective gloves
- D. The process of removing the functional module. Record the cable connection position of the functional module - use a flat-blade screwdriver to pry off the fastening lock on the quick-plug terminal. Remove the quick-plug terminal - remove the interface cables in turn, and do insulation protection to remove the old functional modules

Answer: A,B,C,D

NEW QUESTION # 16

Which of the following descriptions of video site planning principles are correct?

- A. " Prevention and control line " refers to the construction of security areas with grid units such as streets, communities, and parks
- B. " Prevention and control circle " refers to the enclosed area based on checkpoints, traffic hubs, and loops that construct access areas
- C. " Prevention and control block " refers to the construction of key units, densely populated areas and other units
- D. " Prevention and control points " are main and secondary arterial roads, and key roads that are intertwined horizontally and vertically in the weaving area of traffic hubs.

Answer: B

NEW QUESTION # 17

The central cloud platform uses hierarchical storage technology, which is characterized by combining storage media (HDD, SSD) to store the most frequently used and most intensive data (such as high-frequency access snapshots) on high-performance disks. The historical data (such as historical video) with reduced access frequency is transferred to a storage medium with a larger capacity and a lower cost.

- A. False
- B. True

Answer: B

NEW QUESTION # 18

.....

Want to get a high-paying job? Hurry to get an international H12-521_V1.0 certificate! You must prove to your boss that you deserve his salary. You may think that it is not easy to obtain an international certificate. Don't worry! Our H12-521_V1.0 Guide materials can really help you. And our H12-521_V1.0 exam questions have helped so many customers to pass their exam and get according certifications. You can just look at the warm feedbacks to us on the website.
