NGFW-Engineer최신업데이트시험덤프덤프샘플문제다 운로드

그 외, ExamPassdump NGFW-Engineer 시험 문제집 일부가 지금은 무료입니다: https://drive.google.com/open? id=1 RxpZXq6deDXgx7L-MnwJSBwTBcvvKUe

ExamPassdump을 선택함으로 100%인증시험을 패스하실 수 있습니다. 우리는Palo Alto Networks NGFW-Engineer시험의 갱신에 따라 최신의 덤프를 제공할 것입니다. ExamPassdump에서는 무료로 24시간 온라인상담이 있으며, ExamPassdump의 덤프로Palo Alto Networks NGFW-Engineer시험을 패스하지 못한다면 우리는 덤프전액환불을 약속드립니다.

Palo Alto Networks NGFW-Engineer 시험요강:

주제	소개
주제 1	 PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active active and active passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPSec, quantum-resistant cryptography, and GRE tunnels.

주제 2	 PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings.
주제 3	 Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA- Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics.

NGFW-Engineer시험대비 인증덤프자료, NGFW-Engineer시험패스 가능한 공부문제

우리는 고객이 첫 번째 시도에서Palo Alto Networks NGFW-Engineer 자격증시험을 합격할수있다는 것을 약속드립니다. Palo Alto Networks NGFW-Engineer 시험을 합격하여 자격증을 손에 넣는다면 취직 혹은 연봉인상 혹은 승진이나이직에 확실한 가산점이 될것입니다. Palo Alto Networks NGFW-Engineer시험 어려운 시험이지만 저희Palo Alto Networks NGFW-Engineer검프로 조금이나마 쉽게 따봅시다.

최신 Network Security Administrator NGFW-Engineer 무료샘플문제 (Q32-Q37):

질문 #32

Which PAN-OS method of mapping users to IP addresses is the most reliable?

- A. Server monitoring
- B. Syslog
- C. Port mapping
- D. GlobalProtect

정답: A

설명:

Server monitoring is the most reliable method for mapping users to IP addresses in PAN-OS. This method allows the firewall to monitor specific servers, such as Microsoft Active Directory (AD) or LDAP servers, to dynamically retrieve and update user-to-IP mappings. It provides a more accurate and up-to-date mapping of users to their associated IP addresses, as it directly queries user databases in real time.

질문 #33

What is the purpose of assigning an Admin Role Profile to a user in a Palo Alto Networks NGFW?

- A. Define granular permissions for management tasks.
- B. Enable multi-factor authentication (MFA) for administrator access.
- C. Allow access to all resources without restrictions.
- D. Restrict access to sensitive report data.

정답: A

설명:

Assigning an Admin Role Profile to a user in a Palo Alto Networks NGFW is used to define granular permissions for management tasks. This allows administrators to control what actions a user can perform on the firewall, such as configuration changes,

monitoring, and logging. By assigning different admin roles, you can ensure that users have access only to the areas and tasks they need, enforcing the principle of least privilege.

질문 #34

Which two zone types are valid when configuring a new security zone? (Choose two.)

- A. Tunnel
- B. Virtual Wire
- C. Intrazone
- D. Internal

정답: A,B

설명:

When configuring a new security zone on a Palo Alto Networks firewall, the two valid zone types are:

Tunnel: A Tunnel zone is used for traffic that is associated with a VPN tunnel, such as IPSec tunnels. Traffic passing through a tunnel interface is classified into this zone.

Virtual Wire: A Virtual Wire zone is used when a firewall operates in transparent mode (also known as Layer 2 mode). In this configuration, the firewall can inspect traffic without modifying the IP address structure of the network.

질문 #35

Which statement applies to Log Collector Groups?

- A. Enabling redundancy increases the log processing traffic in a Collector Group by 50%.
- B. The maximum number of Log Collectors in a Log Collector Group is 18 plus two hot spares.
- C. Log redundancy is available only if each Log Collector has the same amount of total disk storage.
- D. In any single Collector Group, all the Log Collectors must run on the same Panorama model.

정답: B

설명:

The maximum number of Log Collectors that can be added to a Log Collector Group is 18 plus 2 hot spares, ensuring redundancy and availability in case of failure. This allows for a total of up to 20 Log Collectors in a group, providing sufficient scalability and reliability for log collection.

질문 #36

In a hybrid cloud deployment, what is the primary function of Ansible in managing Palo Alto Networks NGFWs?

- A. It provides a web interface for managing NGFW hardware clusters.
- B. It automates NGFW policy updates and configurations through playbooks.
- C. It facilitates dynamic updates to NGFW threat databases.
- D. It enables centralized log collection and correlation for NGFWs.

정답: B

설명:

In a hybrid cloud deployment, Ansible is primarily used for automating configurations and policy updates on Palo Alto Networks Next-Generation Firewalls (NGFWs). Through the use of playbooks, Ansible can automate the process of deploying security policies, updating configurations, and managing the firewall's state, which enhances efficiency and consistency across multiple NGFWs in a large or hybrid cloud environment.

질문 #37

....

ExamPassdump 는 완전히 여러분이 인증시험 준비와 안전한 시험패스를 위한 완벽한 덤프제공 사이트입니다.우리 ExamPassdump의 덤프들은 응시자에 따라 ,시험 ,시험방법에 따라 알 맞춤한 퍼펙트한 자료입니다.여러분은

ExamPassdump의 알맞춤 덤프들로 아주 간단하고 편하게 인증시험을 패스할 수 있습니다.많은 NGFW-Engineer인증 관연 응시자들은 우리 ExamPassdump가 제공하는NGFW-Engineer 문제와 답으로 되어있는 덤프로 자격증을 취득하셨습니다.우리 ExamPassdump 또한 업계에서 아주 좋은 이미지를 가지고 있습니다.
