* Option A (Running workshops with process participants):Workshops bring together stakeholders to collaboratively map processes, identify steps, and document roles, often using tools like SAP Signavio Process Manager for modeling.

* Option D (Creating process-related surveys):Surveys collect feedback from a broader group of process participants, capturing details about tasks, challenges, or variations that may not emerge in workshops.

* Option E (Conducting process interviews):Interviews with process owners or key performers provide detailed, qualitative insights into process execution, helping to refine documentation.

* Option B (Creating task descriptions) is incorrect as task descriptions are an output of documentation, not a method to start capturing it.
