100% Pass Quiz CloudSec-Pro - Authoritative Palo Alto Networks Cloud Security Professional Latest Exam Experience

You are so busy that you have to save your time on the exam. Using our CloudSec-Pro study torrent, you will find you can learn about the knowledge of your CloudSec-Pro exam in a short time. Because you just need to spend twenty to thirty hours on the CloudSec-Pro practice exams, our CloudSec-Pro Study Materials will help you learn about all knowledge, you will successfully pass the CloudSec-Pro exam and get your certificate. So if you think time is very important for you, please try to use our CloudSec-Pro study materials, it will help you save your time.

Palo Alto Networks CloudSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Security Operations Center (SOC) Fundamentals: This domain covers the foundational components of a SOC, including team roles, tools, and technologies used in day-to-day security operations. It also addresses how AI• ML and threat intelligence support incident response, categorization, and prioritization.
Topic 2	<ul style="list-style-type: none">• Cloud Runtime Security: This domain addresses the protection of cloud workloads during active operation, covering cloud workload protection, detection and response, web application and API security, and vulnerability management. It also includes the processes involved in deploying and managing security agents.

Topic 3	<ul style="list-style-type: none"> • Application Security: This domain covers security practices integrated throughout the software development lifecycle, including application security posture management, CI • CD pipeline security, software composition analysis, IaC security, and secrets scanning. It also explores real-world application security use cases and scan management.
Topic 4	<ul style="list-style-type: none"> • Cortex Fundamentals: This domain focuses on the core features of the Cortex Cloud platform, including indicator types, log management, asset inventory, compliance, and data protection. It also covers how to create reports and dashboards and how data sources are ingested into the platform.
Topic 5	<ul style="list-style-type: none"> • Cloud Posture Security: This domain examines the tools and practices used to assess and manage cloud security posture, spanning CSPM, KSPM, AI-SPM, and DSPM. It also covers agentless scanning, identity security, vulnerability management, unified compliance, and the role of Posture Security Management Modules.

Palo Alto Networks Cloud Security Professional Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which RQL will trigger the following audit event activity?

- A. event from cloud.audit_logs where cloud.service = s3.amazonaws.com AND json.rule = \$.userAgent contains 'parrot1
- B. event from cloud.audit_logs where operation IN('cloudsql.instances.update','cloudsql.sslCerts.create', cloudsql.instances.create','cloudsq
- C. event from cloud.audit_logs where operation ConsoleLogin AND user = 'root'
- D. event from cloud.audit_logs where operation IN ('GetBucketWebsite', 'PutBucketWebsite', 'DeleteBucketWebsite')

Answer: C

Explanation:

The correct RQL to trigger the audit event activity shown is Option A. This RQL is designed to capture events from cloud audit logs where a ConsoleLogin operation occurs by the 'root' user. The given audit event details match this RQL's criteria, which specifies the operation type and the user involved in the event.

NEW QUESTION # 19

Given a default deployment of Console, a customer needs to identify the alerted compliance checks that are set by default. Where should the customer navigate in Console?

- A. Monitor > Compliance
- B. Manage > Compliance
- C. Defend > Compliance
- D. Custom > Compliance

Answer: C

Explanation:

Reference: https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/compliance/manage_compliance.html In the context of Prisma Cloud by Palo Alto Networks, the correct navigation to identify alerted compliance checks set by default is under the "Defend" section, specifically at "Defend > Compliance." This section is designed to allow users to configure and manage compliance policies and rules, monitor compliance statuses, and review alerts related to compliance violations. The "Defend" section is tailored for setting up defenses, including compliance standards, against potential security risks within the cloud environment, making it the logical location for managing and reviewing compliance-related alerts and settings.

NEW QUESTION # 20

A customer's Security Operations Center (SOC) team wants to receive alerts from Prisma Cloud via email once a day about all

policies that have a violation, rather than receiving an alert every time a new violation occurs.
Which alert rule configuration meets this requirement?

- A. Configure an alert rule. Under the "Policies" tab, select "High Risk Severity Policies." In the "Set Alert Notifications" tab, select "Email > Recurring." set to repeat every 1 day, and enable "Email."
- B. Set up email integrations under the "Integrations" tab in "Settings" and create a notification template.
- C. Configure an alert rule with all the defaults except selecting email within the "Alert Notifications" tab and specifying recipient.
- **D. Configure an alert rule. Under the "Policies" tab, select "All Policies." In the "Set Alert Notifications" tab, select "Email > Recurring." set to repeat every 1 day, and then enable "Email."**

Answer: D

Explanation:

To receive daily email alerts for all policy violations, the SOC team should configure an alert rule that encompasses all policies and sets the notification frequency to once per day. This can be achieved by:

* Navigating to the "Policies" tab within the alert rule configuration and selecting "All Policies" to ensure that the rule applies to every policy.

* Moving to the "Set Alert Notifications" tab and choosing the "Email" notification method.

* Setting the notification to "Recurring" with a frequency of every 1 day.

* Enabling the email notification by specifying the recipient's email address.

This configuration ensures that the SOC team will receive a consolidated email once a day that includes information on all policies that have been violated, rather than receiving multiple alerts throughout the day as new violations occur. It allows the team to review the compliance status efficiently and prioritize their response accordingly.

NEW QUESTION # 21

Which three steps are involved in onboarding an account for Data Security? (Choose three.)

- **A. Enter the RoleARN and SNSARN**
- B. Create a read-only role with in-line policies
- C. Enable Flow Logs
- **D. Create a Cloudtrail with SNS Topic**
- **E. Create a S3 bucket**

Answer: A,D,E

Explanation:

Onboarding an account for Data Security involves several critical steps to ensure comprehensive coverage and effective monitoring. The steps involved include B. Create a Cloudtrail with SNS Topic to track and manage API calls and relevant notifications, D. Enter the RoleARN and SNSARN to provide necessary access and integration points for data security functions, and E. Create a S3 bucket which serves as a storage solution for logging and data capture essential for security analysis.

NEW QUESTION # 22

An administrator has deployed Console into a Kubernetes cluster running in AWS. The administrator also has configured a load balancer in TCP passthrough mode to listen on the same ports as the default Prisma Compute Console configuration.

In the build pipeline, the administrator wants twistcli to talk to Console over HTTPS. Which port will twistcli need to use to access the Prisma Compute APIs?

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

By default Prisma Cloud listens on: 8083 HTTPS management port for access to Console. 8084 WSS port for Defender to Console communication.
