

# Exam Dumps Professional-Cloud-Architect Collection, Professional-Cloud-Architect Valid Exam Sample

P.S. Free 2026 Google Professional-Cloud-Architect dumps are available on Google Drive shared by Dumpkiller:  
[https://drive.google.com/open?id=1RUDrIRrUmPb\\_j2EvABEb9dgWuT-Amwh1](https://drive.google.com/open?id=1RUDrIRrUmPb_j2EvABEb9dgWuT-Amwh1)

As we all know it is not easy to obtain the Google Professional-Cloud-Architect certification, and especially for those who cannot make full use of their sporadic time. But you are lucky, we can provide you with well-rounded services on Google Professional-Cloud-Architect Practice Braindumps to help you improve ability.

As is known to all, for the candidates who will attend the exam, knowing the latest version is quite significant. Our Professional-Cloud-Architect training materials are free update for 365 days after purchasing. And the updated version will be sent to your email address automatically by our system. Besides, our Professional-Cloud-Architect Training Materials are verified by the skilled professionals, and the accuracy and the quality can be guaranteed. By using the Professional-Cloud-Architect exam dumps of us, you can also improve your efficiency, since it also has knowledge points.

## Free PDF Quiz Professional-Cloud-Architect - Pass-Sure Exam Dumps Google Certified Professional - Cloud Architect (GCP) Collection

If you buy our Professional-Cloud-Architect exam questions, we will offer you high quality products and perfect after service just as in the past. We believe our consummate after-sale service system will make our customers feel the most satisfactory. Our company has designed the perfect after sale service system for these people who buy our Professional-Cloud-Architect practice materials. We can promise that we will provide you with quality products, reasonable price and professional after sale service on our Professional-Cloud-Architect learning guide.

## In Conclusion

Taking the Google Professional Cloud Architect exam is a big step towards career in the cloud sphere. The associated certification brings new prospects, including high-paying roles and promotions. Make use of a great collection of books from Amazon and official courses to get ready for the test and improve your professional path.

The GCP certification exam covers a wide range of topics related to cloud architecture, including designing and planning a cloud solution architecture, managing and provisioning infrastructure, ensuring security and compliance, and optimizing technical and business processes. Professional-Cloud-Architect exam is designed to assess the candidate's ability to design, develop, and manage scalable, efficient, and secure cloud solutions using GCP technologies.

Google Professional-Cloud-Architect Certification Exam is rigorous and comprehensive, consisting of multiple-choice and scenario-based questions. Professional-Cloud-Architect exam assesses the candidates' ability to design, develop, and manage GCP solutions that meet the business and technical requirements of their organizations. Google Certified Professional - Cloud Architect (GCP)

certification exam covers a broad range of topics, including GCP infrastructure, networking, security, data storage, analytics, and machine learning. Passing the exam demonstrates the candidate's proficiency in GCP and validates their ability to design, develop, and manage GCP solutions at an expert level.

## Google Certified Professional - Cloud Architect (GCP) Sample Questions (Q194-Q199):

### NEW QUESTION # 194

For this question, refer to the Dress4Win case study. Considering the given business requirements, how would you automate the deployment of web and transactional data layers?

- A. Migrate Nginx and Tomcat to App Engine. Deploy a MySQL server using Cloud Launcher. Deploy Jenkins to Compute Engine using Cloud Launcher.
- B. Deploy Nginx and Tomcat using Cloud Launcher. Deploy a MySQL server using Cloud Launcher. Deploy Jenkins to Compute Engine using Cloud Deployment Manager scripts.
- C. Migrate Nginx and Tomcat to App Engine. Deploy a Cloud Datastore server to replace the MySQL server in a high-availability configuration. Deploy Jenkins to Compute Engine using Cloud Launcher.
- D. Deploy Nginx and Tomcat using Cloud Deployment Manager to Compute Engine. Deploy a Cloud SQL server to replace MySQL. Deploy Jenkins using Cloud Deployment Manager.

**Answer: C**

### NEW QUESTION # 195

You write a Python script to connect to Google BigQuery from a Google Compute Engine virtual machine. The script is printing errors that it cannot connect to BigQuery. What should you do to fix the script?

- A. Run your script on a new virtual machine with the BigQuery access scope enabled
- B. Install the bq component for gcloud with the command `gcloud components install bq`.
- C. Create a new service account with BigQuery access and execute your script with that user
- D. Install the latest BigQuery API client library for Python

**Answer: A**

Explanation:

Explanation

The error is most likely caused by the access scope issue. When create new instance, you have the default Compute engine default service account but most services access including BigQuery is not enable. Create an instance Most access are not enabled by default. You have default service account but don't have the permission (scope) you can stop the instance, edit, change scope and restart it to enable the scope access. Of course, if you Run your script on a new virtual machine with the BigQuery access scope enabled, it also works

<https://cloud.google.com/compute/docs/access/service-accounts>

### NEW QUESTION # 196

You need to set up Microsoft SQL Server on GCP. Management requires that there's no downtime in case of a data center outage in any of the zones within a GCP region. What should you do?

- A. Configure a Cloud Spanner instance with a regional instance configuration.
- B. Set up SQL Server on Compute Engine, using Always On Availability Groups using Windows Failover Clustering. Place nodes in different subnets.
- C. Configure a Cloud SQL instance with high availability enabled.
- D. Set up SQL Server Always On Availability Groups using Windows Failover Clustering. Place nodes in different zones.

**Answer: D**

Explanation:

<https://cloud.google.com/sql/docs/sqlserver/configure-ha>

## NEW QUESTION # 197

For this question refer to the TerramEarth case study

Operational parameters such as oil pressure are adjustable on each of TerramEarth's vehicles to increase their efficiency, depending on their environmental conditions. Your primary goal is to increase the operating efficiency of all 20 million cellular and unconnected vehicles in the field. How can you accomplish this goal?

- A. Capture all operating data, train machine learning models that identify ideal operations, and run locally to make operational adjustments automatically.
- B. Capture all operating data, train machine learning models that identify ideal operations, and host in Google Cloud Machine Learning (ML) Platform to make operational adjustments automatically.
- C. Have your engineers inspect the data for patterns, and then create an algorithm with rules that make operational adjustments automatically.
- D. Implement a Google Cloud Dataflow streaming job with a sliding window, and use Google Cloud Messaging (GCM) to make operational adjustments automatically.

**Answer: A**

Explanation:

Topic 1, TerramEarth Case Study

Company Overview

TerramEarth manufactures heavy equipment for the mining and agricultural industries: About 80% of their business is from mining and 20% from agriculture. They currently have over 500 dealers and service centers in 100 countries. Their mission is to build products that make their customers more productive.

Company Background

TerramEarth formed in 1946, when several small, family owned companies combined to retool after World War II. The company cares about their employees and customers and considers them to be extended members of their family.

TerramEarth is proud of their ability to innovate on their core products and find new markets as their customers' needs change. For the past 20 years trends in the industry have been largely toward increasing productivity by using larger vehicles with a human operator.

Solution Concept

There are 20 million TerramEarth vehicles in operation that collect 120 fields of data per second. Data is stored locally on the vehicle and can be accessed for analysis when a vehicle is serviced. The data is downloaded via a maintenance port. This same port can be used to adjust operational parameters, allowing the vehicles to be upgraded in the field with new computing modules.

Approximately 200,000 vehicles are connected to a cellular network, allowing TerramEarth to collect data directly. At a rate of 120 fields of data per second, with 22 hours of operation per day, TerramEarth collects a total of about 9 TB/day from these connected vehicles.

Existing Technical Environment

TerramEarth's existing architecture is composed of Linux-based systems that reside in a data center. These systems gzip CSV files from the field and upload via FTP, transform and aggregate them, and place the data in their data warehouse. Because this process takes time, aggregated reports are based on data that is 3 weeks old.

With this data, TerramEarth has been able to preemptively stock replacement parts and reduce unplanned downtime of their vehicles by 60%. However, because the data is stale, some customers are without their vehicles for up to 4 weeks while they wait for replacement parts.

Business Requirements

- \* Decrease unplanned vehicle downtime to less than 1 week, without increasing the cost of carrying surplus inventory

- \* Support the dealer network with more data on how their customers use their equipment IP better position new products and services.

- \* Have the ability to partner with different companies-especially with seed and fertilizer suppliers in the fast-growing agricultural business-to create compelling joint offerings for their customers

CEO Statement We have been successful in capitalizing on the trend toward larger vehicles to increase the productivity of our customers. Technological change is occurring rapidly and TerramEarth has taken advantage of connected devices technology to provide our customers with better services, such as our intelligent farming equipment.

With this technology, we have been able to increase farmers' yields by 25%, by using past trends to adjust how our vehicles operate. These advances have led to the rapid growth of our agricultural product line, which we expect will generate 50% of our revenues by 2020.

CTO Statement

Our competitive advantage has always been in the manufacturing process with our ability to build better vehicles for lower cost than our competitors. However, new products with different approaches are constantly being developed, and I'm concerned that we lack the skills to undergo the next wave of transformations in our industry. Unfortunately, our CEO doesn't take technology obsolescence seriously and he considers the many new companies in our industry to be niche players. My goals are to build our skills while addressing immediate market needs through incremental innovations.

### NEW QUESTION # 198

You are creating a solution to remove backup files older than 90 days from your backup Cloud Storage bucket. You want to optimize ongoing Cloud Storage spend. What should you do?

- A. Schedule a cron script using `gsutil ls -l gs://backups/**` to find and remove items older than 90 days and schedule it with cron.
- B. Write a lifecycle management rule in XML and push it to the bucket with `gsutil`.
- C. Schedule a cron script using `gsutil ls -lr gs://backups/**` to find and remove items older than 90 days.
- **D. Write a lifecycle management rule in JSON and push it to the bucket with `gsutil`.**

**Answer: D**

Explanation:

<https://cloud.google.com/storage/docs/gsutil/commands/lifecycle>

### NEW QUESTION # 199

.....

Failure makes people depressed especially for working engineers. If your test score affects your work and you make mistakes, it is lost than gained. The best method for working people is to purchase valid Google Professional-Cloud-Architect test questions and answers. It only takes you a little money to solve a big difficult for you. Also once you pass this subject, the certification is coming to you. Our passing rate of Professional-Cloud-Architect Test Questions and answers is normally 100% just one shot. It is worth buying.
