Moreover, only need to spend 20-30 is it enough for you to grasp whole content of our practice materials that you can pass the exam easily, this is simply unimaginable.

Microsoft Power Platform Functional Consultant Sample Questions (Q165-Q170):

NEW QUESTION # 165
You need to be able to move a Power Automate desktop flow used in the verification process to the testing environment.
What should you do?

- A. Send a copy of the desktop flow to a member of internal IT.
- B. Create the desktop flow in a solution and provide it to internal IT.
- C. Share a copy of the desktop flow with a member of internal IT.
- D. Use the Export option in the flow to get the flow identifier and provide it to internal IT.

Answer: B

Explanation:
Internal IT reports that the solution import to the test environment failed because of missing dependencies related to the flow for completing service requests.
Flows with PowerApps steps
Flows that were created via Power Automate in the PowerApps menu or flows that have PowerApps steps added have a different issue then other Power Automate flows. As of the writing of this blog these flows are not able to be imported into another environment. This means that if you create flows with Power Apps steps within them you will need to recreate them in your

destination environment.

NEW QUESTION # 166

You have a Power Apps portal app that supports a sales community and a service community in the same environment. The only language configured in the environment is English. The company wants to add support for two more languages.

The solution must meet the following requirements:

Languages must be for both sales and service functions.

The company logo and colors must be used and apply to all screens.

Communities must be separate with different URLs and access lists.

You need to configure the solution.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 167

A company plans to create two Microsoft Power Platform applications.

One of the applications requires a custom control layout without using code. The other application will be used primarily by external users.

You need to create the applications.

Which application types should you use? To answer, drag the appropriate application types to the correct requirements. Each application type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Application types		Answer Area			
Canvas app			Requirement		Application type
Model-driven app	○		Custom control layout without coding		
Power Pages portal	○		Used by external users		
Power BI	○				

Answer:

Explanation:

Application types		Answer Area		
Canvas app			Requirement	Application type
Model-driven app	○		Custom control layout without coding	Canvas app
Power Pages portal	○		Used by external users	Model-driven app
Power BI	○			

NEW QUESTION # 168

A company has employees in France, Mexico, and the United States. You are creating a Power Apps app to allow users to add client records to Microsoft Dataverse. The default language for the company is English.

The company wants the app to display each local language.

You need to add the Spanish and French languages.

Which four actions should you perform in sequence for each language? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Import the solution.	
Export translations.	
Replace the language code column and translated wording in the CrmTranslations.xml file.	
Select an unmanaged solution.	
Select a managed solution.	
Add a language code column and translated wording in the CrmTranslations.xml file.	
Import translations.	
Export the solution.	

Answer:

Explanation:

Actions

Import the solution.
Export translations.
Replace the language code column and translated wording in the CrmTranslations.xml file.
Select an unmanaged solution.
Select a managed solution.
Add a language code column and translated wording in the CrmTranslations.xml file.
Import translations.
Export the solution.

Answer Area

Select an unmanaged solution.
Export translations.
Add a language code column and translated wording in the CrmTranslations.xml file.
Import translations.

Explanation

Step 1: Select an unmanaged solution.

Export the localizable text

The scope of the localizable text that will be exported is the unmanaged solution that contains the localizable text.

* From Power Apps, select Solutions.

* In the All Solutions list, select the unmanaged solution that contains the localizable text you want.

* On the command bar, select Translations > Export Translations.

Step 2: Export translations.

Step 3: Add a language code column and a translated wording in the CrmTranslations.xml file.

Get the localizable text translated

You can send this file to a linguistic expert, translation agency, or localization firm.

If you have the knowledge to translate the text, or if you just want to see the format, you can extract the zip file that you exported you will see that it contains two XML files.

[Content_Types].xml

CrmTranslations.xml

You can open the CrmTranslations.xml file with Microsoft Office Excel.

When you view the data in Excel, look at the Localized Labels tab.

Graphical user interface, text, application, table, Excel Description automatically generated

Information   Display Strings   Localized Labels   ⊕

Any custom tables or columns will have empty cells for the localizable text. Add the localized values for those items.

Step 4: Import translations.

Import the localized text

Importing the text requires compressing the files and importing them into the system.

Import the files

From the same unmanaged solution that you exported the translations from, in the menu choose Translations > Import Translations.

Note: If you have customized table or column text, such as column labels or drop-down list values, you can provide the users in your environment who are not working with the base language version of your environment with this customized text in their preferred languages.

The process has the following steps:
* Enable other languages for your environment
* Export the localizable text
* Get the localizable text translated
* Import the localized text
