In today's fast-paced business environment, organizations are seeking new strategies to achieve the desired outcomes. Agile methodologies have become increasingly popular in recent years, with Scrum being one of the most widely adopted frameworks. Scrum is a flexible and iterative approach that emphasizes teamwork, collaboration, and continuous improvement. To become a proficient Scrum Master, professionals can take the Scrum SSM: SAFe 5 Scrum Master (SSM) exam.

Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q68-Q73):

NEW QUESTION # 68

Team B is discussing new functionality when it becomes clear that two developers have different ideas on how to implement the Solution. Which of the following characteristics of a high-performing team can help Team B continue a productive discussion and arrive at a shared plan?

- A. Effective decision-making
- B. Clear goals and purpose
- C. Healthy conflict
- D. Mutual trust

Answer: C

Explanation:

In the context of SAFe and Agile Team dynamics, healthy conflict is a defining characteristic of a high-performing team. It allows members to openly challenge ideas, explore different perspectives, and arrive at better decisions collectively.

Healthy conflict is based on mutual respect and a shared commitment to team goals. It is different from destructive conflict—rather than creating division, it fosters creativity, innovation, and stronger collaboration. When teams are psychologically safe and can engage in constructive debate, they can refine solutions and build consensus faster.

SAFe emphasizes servant leadership and coaching behaviors that enable such open communication:

"High-performing Agile Teams engage in healthy conflict, where diverse viewpoints are explored and disagreements are resolved constructively, leading to better decisions and shared commitment." While trust, clear goals, and decision-making are also vital attributes, healthy conflict specifically addresses how teams can manage differing opinions productively, making it the correct answer.

NEW QUESTION # 69

(Select 2) When might Feature size not be a good substitute for the duration of WSJF?

- A. The Feature involves a team or team members who represent a bottleneck.
- B. The Feature involves a remote third-party vendor that has a formal scope-approval process.
- C. The Feature did not originate from a Program Epic.
- D. The Feature has not yet been broken down into user stories by the Product Owner
- E. The Feature did not originate from a Value Stream Capability

Answer: A,B

NEW QUESTION # 70

Team A wants to use the IP Iteration to continue their "usual work." What is one benefit the Scrum Master/Team Coach could share with the team about using the IP Iteration as intended?

- A. The team can do team building activities
- B. The team can prepare for PI planning
- C. The team can take time for personal appointments

- D. The team can allocate time for vacation

Answer: B

Explanation:

The Innovation and Planning (IP) Iteration in SAFe serves a critical purpose-it provides time for innovation, learning, improvement, and preparation for the next Program Increment (PI).

When teams attempt to use the IP Iteration to continue their standard work, they lose the opportunity to rest, reflect, and prepare effectively for future planning. One of the key intended uses of the IP Iteration is to prepare for PI Planning, which includes reviewing objectives, refining backlogs, and ensuring readiness for upcoming work.

From SAFe guidance:

"The IP Iteration provides teams with the opportunity to innovate, improve, and prepare for the upcoming PI Planning event."

Therefore, the correct answer is D. The team can prepare for PI planning, as this aligns with one of the primary goals of the IP Iteration.

NEW QUESTION # 71

What is one recommended practice for Scrum Masters/Team Coaches when facilitating Iteration Review?

- A. Limit participants to just the team members
- B. Encourage the team member with the best presentation skills to demo each Iteration
- **C. Begin to consider how and what to demo in Iteration Planning**
- D. Encourage team members to spend 3+ hours preparing

Answer: C

Explanation:

One of the recommended practices for Scrum Masters/Team Coaches when facilitating Iteration Review is to begin to consider how and what to demo in Iteration Planning. This helps the team to have a clear vision of the expected outcome and to align their work with the iteration goals. It also facilitates the preparation and execution of the demo, as the team can anticipate the feedback and questions from the stakeholders.

NEW QUESTION # 72

Which SAFe organizational construct allows businesses to build large and complex systems in a Lean-Agile manner?

- **A. Agile Release Train**
- B. Solution Train
- C. Portfolio
- D. Value Stream

Answer: A

NEW QUESTION # 73
