## Practice CWISA-103 Exam Online, Valid Test CWISA-103 Tutorial

These latest Certified Wireless IoT Solutions Administrator(2025 Edition) (CWISA-103) Questions were made by FreeDumps professionals after working day and night so that users can prepare for the CWNP CWISA-103 exam successfully. FreeDumps even guarantees you that you can pass the CWNP CWISA-103 Certification test on the first try with your untiring efforts.

## CWNP Certified Wireless IoT Solutions Administrator(2025 Edition) Sample Questions (Q22-Q27):

### NEW QUESTION # 22

What statement best describes the difference between authentication and authorization?

- A. Authentication is not used in wireless solutions and authorization is used in wireless solutions
- **B. Authentication proves identity and authorization determines access to specific resources**
- C. Authentication ensures privacy and authorization ensures availability

- D. Authentication is used in wireless solutions and authorization is not

**Answer: B**

Explanation:

\* Authentication: Verifying "who" the user or device is (e.g., via passwords, certificates).

\* Authorization: Controlling "what" a user or device can do once authenticated (e.g., read-only vs. read/write permissions).

\* Combined for Security: Both are essential. Authentication alone doesn't control access levels, and authorization without verification is meaningless.

References:

Identity and Access Management (IAM): Articles and resources outlining the core principles of authentication and authorization.

Cybersecurity Best Practices: Guides on securing systems will often emphasize the need for both authentication and authorization controls.

### NEW QUESTION # 23

What is the role of the ITU in wireless communications?

- **A. Coordinates the shared global use of the radio spectrum**
- B. Oversees communications regulatory agencies in each country
- C. Establishes wireless radiation exposure limits
- D. Defines international communications standards

**Answer: A**

Explanation:

ITU's Mandate: The International Telecommunication Union (ITU) is a specialized agency of the United Nations focused on global information and communication technologies (ICTs).

Radio Spectrum Regulation: A core ITU function is allocating radio spectrum bands and satellite orbits to prevent harmful interference between different countries and technologies. This coordination is essential for the orderly use of wireless communications worldwide.

### NEW QUESTION # 24

A BLE beacon is configured with a transmit power of +4 dBm. Which change will MOST increase its usable range?

- **A. Increasing advertising interval**
- B. Decreasing advertising interval
- C. Changing the BLE version
- D. Lowering transmit power

**Answer: A**

Explanation:

A larger advertising interval reduces RF congestion and packet collisions, which improves effective detection range. Decreasing interval increases traffic; lowering transmit power reduces range.

### NEW QUESTION # 25

As an RF signal propagates it becomes weaker at any given measurement point as it gets farther away from the transmitter. What concept is described?

- **A. Free Space Path Loss**
- B. RF latency
- C. Diffraction
- D. Beamwidth

**Answer: A**

Explanation:

Free Space Path Loss (FSPL): Describes how a radio signal weakens as it travels through open space, even without obstacles. It's caused by the signal spreading out, resulting in decreased power density at the receiver.  
Calculation: FSPL depends on distance and frequency.

### NEW QUESTION # 26

A Wi-Fi enabled weight scale is an example of what kind of health IoT device?

- A. implantable
- B. wearable
- C. non-wearable
- D. injectable

**Answer: C**

Explanation:

Health IoT Device Categories:

Wearable: Devices worn on the body (smartwatches, fitness trackers).

Non-wearable: Devices used without being worn (smart scales, connected medical equipment).

Implantable: Surgically inserted devices (pacemakers, glucose monitors).

### NEW QUESTION # 27

.....

The scoring system of our CWISA-103 exam torrent absolutely has no problem because it is intelligent and powerful. First of all, our researchers have made lots of efforts to develop the scoring system. So the scoring system of the CWISA-103 test answers can stand the test of practicability. Once you have submitted your practice. The scoring system will begin to count your marks of the CWISA-103 exam guides quickly and correctly. You just need to wait a few seconds before knowing your scores. The scores are calculated by every question of the CWISA-103 Exam guides you have done. So the final results will display how many questions you have answered correctly and mistakenly. You even can directly know the score of every question, which is convenient for you to know the current learning condition.
