Core 300-712
300-712 Exam Questions and Certification Core Study Guide Version 2

300-715 유통·판매·판매 및 300-715 시험문제

Itcertkr은 최고의 IT 전문가들이 모여 만들어낸 최고의 문제집입니다. 각 주제별 문제집은 모두 광범위한 전문가들이 이를 바탕으로 출제되었으며, 실제 시험과 유사한 형식으로 문제를 제작하였습니다. 이를 통해 시험에 대한 대비를 원하시는 분들이 더 쉽고 빠르게 학습할 수 있습니다. 이전에 출판한 시험과 유사한 문제집과 함께 학습하고자 하는 분들에게는 매우 유익한 자료로 추천드립니다. 우리는 주제별 출제방법과 예상문제를 확보해놓고, 실제 시험과 유사한 형식으로 출제되는 문제를 예상하고 학습하는 데에 도움을 드리겠습니다. Itcertkr은 300-712 유통·판매·판매 및 300-715 시험문제를 출제하는 전문가들이 모여서 만든 학습자료로 기관이나 개인에게 전달됩니다. Itcertkr은 300-712 유통·판매·판매 및 300-715 시험문제를 예상 및 학습하는 것을 목표로 합니다.

최신 CCNP Security 300-715 무료샘플문제 (Q139-Q144):

출판자:
An organization is implementing Cisco ISR security software and must ensure that it is installed correctly on every Windows or Mac computer that attempts to access the network. They have multiple vendor's firewall applications for these devices. Is the engineer aware that the devices are unable to use a standard application check to validate the certificate for this AAA? What should be done to resolve this type of posture check?

- A. Use a custom registry condition to ensure that the firewall is installed and running correctly.
- B. Use a command condition to look for the Windows or Mac active service applications.
- C. Use the default application condition to identify the application installed and validate the firewall AAA.
- D. Use the ActiveX firewall condition to obtain any vendor firewall application.

출판자:
An organization is configuring TACACS+ on a Cisco switch but cannot authenticate users with Cisco AAA. The configuration contains the correct key of 0x0097122A, but the switch is not receiving a response from the Cisco ISR instance. What is the best way to validate the AAA configuration and identify the problem with the TACACS+ server?

- A. Confirm the authentication policies are correct using the test aaa authentication tacs command.
- B. Check for server reachability using the test aaa group tacs + admin + legacy command.
- C. Test the user account on the server using the test aaa group tacs server CUC3 user account + legacy + legacy command.
- D. Validate that the key value is correct using the test aaa authentication tacs + key + legacy command.

BCS인증 TM3시험은 IT업종종사분들에게 널리 알려진 유명한 자격증을 취득할 수 있는 시험과목입니다. BCS인증 TM3시험은 영어로 출제되는만큼 시험난이도가 많이 높습니다. 하지만 Itcertkr의 BCS인증 TM3덤프만 있다면 아무리 어려운 시험도 쉬워집니다. 오르지 못 할 산도 정복할 수 있는게 Itcertkr제품의 우점입니다. Itcertkr의 BCS인증 TM3덤프로 시험을 패스하여 자격증을 취득하면 정상에 오를 수 있습니다.

Itcertkr는 유일하게 여러분이 원하는 BCS인증 TM3시험관련자료를 해결해드릴 수 있는 사이트입니다. Itcertkr에서 제공하는 자료로 응시는 문제없습니다, 여러분은 고득점으로 시험을 통과할 것입니다.

>> TM3 100% 시험패스 공부자료 <<

TM3 100% 시험패스 공부자료 덤프는 ISTQB Certified Tester Advanced Level - Test Management v3.0 100% 시험패스 보장

Itcertkr의 엘리트는 다년간 IT업계에 종사한 노하우로 높은 적중율을 자랑하는 BCS TM3덤프를 연구제작하였습니다. 한국어 온라인서비스가 가능하기에 BCS TM3덤프에 관하여 궁금한 점이 있으신 분은 구매전 문의하시면 됩니다. BCS TM3덤프로 시험에서 좋은 성적 받고 자격증 취득하시길 바랍니다.

BCS TM3 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none">Managing the Team: This section addresses the role of Test Leads in analyzing team needs, identifying required skills, and coordinating efforts using a whole-team approach. Candidates are expected to understand how to align team capabilities with project goals and ensure effective collaboration. The syllabus highlights techniques for team management, resource allocation, and fostering continuous improvement through retrospectives and knowledge sharing to optimize testing performance.
주제 2	<ul style="list-style-type: none">Managing the Test Activities: This section focuses on the role of Test Managers and how testing is planned, monitored, controlled, and completed across different software development contexts. It covers the overall test process, including defining test plans, tracking progress, and ensuring proper closure. Candidates are expected to understand how testing fits within various lifecycle models, test levels, and types, while engaging stakeholders effectively. The syllabus emphasizes risk-based testing to identify quality risks, assess impacts, and select suitable mitigation activities. It also highlights formulating project-level test strategies, selecting appropriate test approaches, setting measurable objectives, and improving processes through models like IDEAL. Additionally, candidates should be able to evaluate and introduce test tools based on business needs, risks, and return on investment.
주제 3	<ul style="list-style-type: none">Managing the Product: This section emphasizes understanding and managing the product under test, focusing on controlling and assessing testing activities. It covers test metrics, reporting, and defect management across sequential, Agile, and hybrid environments. Candidates should be able to select and apply appropriate test estimation techniques and establish defect workflows suited to the project context. The syllabus also includes preparing business cases for testing activities that justify costs, benefits, and the value of testing within the overall project.

최신 Test Manager TM3 무료샘플문제 (Q30-Q35):

질문 # 30

The stakeholders matrix is a strategic tool to be used by test managers and is composed of four quadrants.

Which quadrant is described by the following statements?

Typically do not have a strong interest in day-to-day tasks

Their decisions are critical for resource allocation and high-level project direction

- A. Latents
- B. Promoters
- C. Apathetics
- D. Defenders

정답: A

설명:

Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

In the stakeholder power-interest matrix used by test managers, stakeholders with high power but low interest are categorized as Latents. They generally "do not have a strong interest in day-to-day tasks," yet their decisions are critical for resources and strategic direction. Promoters are high power/high interest; Defenders are low power/high interest; Apathetics are low power/low interest. This mapping guides how test managers engage and communicate with each stakeholder group (CTAL-TM v3.0 Syllabus, chapter on organizational aspects of test management and stakeholder engagement).

질문 # 31

Management is sceptical regarding the budget request (€25,000) for the next testing project. You are asked for a cost-benefit calculation. Based on historical data from several projects, you have come up with the following numbers:

Average prevention cost per defect: €200

Average cost of detection per defect: €400

Average cost of internal failure: €150

Average cost of external failure: €2,500

Expected number of defects to be found in this project during testing: 50 What is the result for the expected cost-benefit calculation for the upcoming project?

- A. €72,500
- B. **€87,500**
- C. €92,500
- D. €62,500

정답: B

설명:

Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

Per the syllabus, when building a business case using the cost of quality model, compare the avoided external failure costs with the sum of relevant pre-release costs (prevention, detection/appraisal, and internal failure). For 50 expected defects found in testing:

Avoided external failure cost = $50 \times €2,500 = €125,000$

Pre-release costs per defect = €200 (prevention) + €400 (detection) + €150 (internal failure) = €750 Total pre-release costs = $50 \times €750 = €37,500$ Net benefit (cost-benefit) = $€125,000 - €37,500 = €87,500$ This computation follows the syllabus' guidance to quantify both costs (prevention, detection, internal failure) and benefits (external failures avoided) to demonstrate the economic value of testing.

질문 # 32

You have recently been employed as a test manager for a software company producing Human Resource (HR) systems... You have been asked to write a test strategy for the project and have chosen to implement a flexible and change-related reactive test strategy. Which of the following would be an essential part of your test approach?

- A. Performing a detailed product risk analysis
- B. Using decision table testing, equivalence partitioning and boundary value analysis
- C. **Using defect-based attacks and exploratory testing**
- D. Implementing ISO/IEC 29119 as a testing framework

정답: C

설명:

Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

In a reactive (change-driven) test strategy - appropriate when requirements are evolving and flexibility is essential - the syllabus highlights exploratory testing and defect/experience-based techniques (defect-based attacks) as key elements because they adapt rapidly to change and emerging information.

A (product risk analysis) is central to risk-based/analytical strategies.

B (standard-compliant framework) aligns with standard/process-compliant strategies.

References: ISTQB CTAL-TM v3.0 Syllabus-Chapter 4 (Approaches for test prioritization and effort allocation: strategy/approach types including reactive strategies; emphasis on exploratory and defect-based approaches under change-driven contexts).

질문 # 33

You are a test consultant involved in setting up and implementing retrospectives in an organisation that is developing software based on an Agile lifecycle. The Agile teams are experiencing problems on product quality, so the retrospectives will be specifically focused on the testing practices and processes.

Which of the following is an example of a good practice for a test retrospective?

- A. Because an Agile team is empowered, all improvement actions should reside within the team
- B. An action plan for the improvements identified is too much documentation in an Agile context; the team members are already motivated to implement the improvements based on the retrospective
- C. **Brainstorming sessions can be used to generate ideas on how to resolve the root causes of testing issues identified**
- D. Only testers should be involved in the retrospectives since they perform testing and will know what should be improved

정답: C

설명:

Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

The syllabus highlights continuous improvement practices, including retrospectives in Agile lifecycles, encouraging collaborative techniques such as brainstorming to generate concrete improvement ideas, often following root cause analysis of issues.

Effective retrospectives should involve the whole team and relevant stakeholders, generate specific actions (an action plan), and recognize that some actions may require support beyond the team.

Therefore, C is a good practice. A is incorrect (retrospectives should be cross-functional), B is too narrow (some actions require organizational support), and D is incorrect (capturing concrete actions is recommended even in Agile contexts).

(References: CTAL-TM v3.0 Syllabus - Chapter 1 "Testing Process" - lessons learned and process improvement; Agile lifecycle considerations for retrospectives and collaborative improvement techniques; emphasis on actionable outcomes.)

질문 # 34

Which of the following activities in the test process is considered to deliver a document which can be used as a major input for test process improvement?

- A. Test Planning
- B. Test Execution
- **C. Test Completion**
- D. Test Monitoring

정답: C

설명:

Comprehensive and Detailed Explanation From Exact Extract of ISTQB Certified Tester Advanced Level - Test Manager v3.0 syllabus:

In the ISTQB CTAL-TM v3.0 syllabus (Chapter: Testing Process, section on Test Completion), the Test Completion activity includes producing the test summary report, capturing lessons learned, and finalizing

/archiving testware. The test summary report and lessons learned are specifically identified as key inputs to test process improvement, enabling organizations to refine their approach, improve efficiency, and address gaps revealed during the test effort. This makes Test Completion the activity that delivers the document(s) most directly used for ongoing test process improvement.

(Reference: CTAL-TM v3.0 Syllabus - Chapter "Testing Process", subsection "Test Completion": responsibilities include creating the test summary report, collecting lessons learned, and providing input to process improvement.)

질문 # 35
