Besides we have the right to protect your email address and not release your details to the 3rd parties.

CompTIA SecAI+ Certification Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

Customer feedback for an AI chatbot has a high-rate of non-answers, which is causing higher central processing unit (CPU) utilization. Which of the following should be implemented?

- A. Guardrails
- B. Cost monitoring
- C. Response confidence level
- D. Prompt logging

Answer: C

Explanation:

Implementing a response confidence level ensures the chatbot only provides answers when the model is sufficiently confident. This reduces irrelevant or empty responses, improving user experience and lowering unnecessary CPU utilization.

NEW QUESTION # 32

What is the PRIMARY purpose of an MSSP for small businesses?

- A. Provide outsourced monitoring and threat detection
- B. Replace all internal IT
- C. Perform required compliance audits
- D. Develop internal apps

Answer: A

Explanation:

MSSPs specialize in outsourced security monitoring and alerting.

NEW QUESTION # 33

A company uses human review for software development validation and wants to add another validation layer. Which of the following should a security administrator use to accomplish task?

- A. AI-assisted approval
- B. Regression testing
- C. Low-code plug-in
- D. Automated rollback

Answer: A

Explanation:

AI-assisted approval adds an automated validation layer alongside human review, helping detect potential security or quality issues in software development before deployment. This strengthens the overall validation process.

NEW QUESTION # 34

User experience is declining since the launch of a large language model (LLM) in internal networks. Which of the following should be the highest priority for the prompt engineers?

- A. Customer success management
- B. Business objectives
- C. Quality control
- D. Sales life cycle

Answer: C

Explanation:

When user experience is declining after an LLM launch, the top priority for prompt engineers is quality control. Ensuring prompts produce accurate, relevant, and safe outputs directly improves usability and restores user trust.

NEW QUESTION # 35

What control reduces the impact radius when a single host is compromised?

- A. Tokenization
- B. Network segmentation
- C. Obfuscation
- D. Redaction

Answer: B

Explanation:

Segmentation isolates systems and limits lateral movement.

NEW QUESTION # 36
