Analytics-DA-201 Schulungsmaterialien & Analytics-DA-201 Dumps Prüfung & Analytics-DA-201 Studienguide

Die Salesforce Zertifizierungsprüfung ist jetzt eine sehr populäre Prüfung. Haben Sie diese Salesforce Analytics-DA-201 Zertifizierung abgelegt? Wenn nein, sollen Sie bitte schneller etwas machen. Es ist sehr wichtig für Sie, diese wichtige Zertifizierung zu besitzen. Wie Salesforce Analytics-DA-201 Zertifizierungsprüfung hocheffektiv vorzubereiten und nur einmal die Salesforce Analytics-DA-201 Prüfung zu bestehen spielt heute eine sehr übergreifende Rolle.

Salesforce Certified Tableau Data Analyst Analytics-DA-201 Prüfungsfragen mit Lösungen (Q105-Q110):

105. Frage

You have the following chart that shows the cumulative of sales from various dates.

□ You want the months to appear as shown in the following chart.

□ What should you do?

- A. Select Show Missing Values for the date
- B. Convert the date to Exact Date
- **C. Convert the date to Continuous**
- D. Convert the date to Attribute

Antwort: C

Begründung:

References: <https://help.tableau.com/current/pro/desktop/en-us/dates.htm> https://help.tableau.com/current/pro/desktop/en-us/dates_continuous.htm <https://help.tableau.com/current/pro/desktop/en-us/formatting.htm> To ensure the dates are shown in a continuous axis, you should convert the date to a continuous field. This will display the months in a sequence without any breaks, which is needed for showing a trend over time like the cumulative sum of sales.

106. Frage

You plan to create a visualization that has a dual axis chart. The dual axis chart will contain a shape chart and a line chart will use the same measure named Population on the axis.

You need to configure the shapes to be much larger than the line.

What should you do?

- **A. Duplicate Population Drag the duplicate to the second Marks card and configure the size of the marks independently**
- B. Create a custom shape that is larger than the default shape and add the shape to the Shapes folder in My Repository
- C. Change Population to a discrete dimension
- D. For the second axis select Shape on the Marks card From Select Shape Palette select Custom and then select Reset

Antwort: A

Begründung:

To configure the shapes to be much larger than the line, you need to duplicate Population and drag it to the second Marks card. This will create a dual axis chart with two measures on one axis. You can then select Shape on one Marks card and Line on another Marks card, and adjust the size of each mark independently using the Size slider or menu. References:

https://help.tableau.com/current/pro/desktop/en-us/multiplemeasures_dualaxes.htm https://help.tableau.com/current/pro/desktop/en-us/marks_markproperties_size.htm

In a dual-axis chart in Tableau, if you want to have two different visual mark types (like a shape and a line) and configure them differently (such as making one larger than the other), you would need to duplicate the measure. You then drag this duplicate to the second Marks card (which represents the second axis). There, you can adjust the size of the marks (shapes, in this case) independently of the line marks on the first Marks card.

107. Frage

You are developing a data source in Tableau Prep.

You have two tables named Orders and Employees.

The Orders table was created in 2019 and contains the following columns.

The Employees table contains all the employee information for the various sales teams in the sales department and contains the following columns. You want to prepare the data so that you can analyze sales trends over time for every sales team.

Which three actions should you perform in order? (Place the three correct options in order. Use the arrows to move Options to Answer Area. Use Answer Area arrows to re-order the options.)

Antwort:

Begründung:

There are different ways to prepare the data in Tableau Prep, but one possible answer is:

Answer area:

* Join the tables.

* Aggregate the data by Sales Team.

* Add the following filter to the Employees table: Sale Team - Team Alpha.

To analyze sales trends over time for every sales team, you need to combine the data from the Orders and Employees tables. You can do this by joining the tables on the Rep ID column, which is a common identifier for both tables. This will create a single table with all the columns from both tables. Next, you need to aggregate the data by Sales Team, which is the level of analysis you want. You can do this by grouping the data by the Sales Team column and applying an aggregation function (such as sum, average, count, etc.) to the other columns that you want to measure (such as Total Amount, Rep Tenure, etc.). This will create a summary table with one row for each sales team and the aggregated values for the other columns. Finally, you need to filter the data to focus on a specific sales team, such as Team Alpha. You can do this by adding a filter to the Employees table and selecting only the rows where Sales Team equals Team Alpha. This will remove the rows for other sales teams and keep only the data for Team Alpha.

108. Frage

You have a large data source that contains more than 10 million rows. Users can filter the rows by a field named Animal.

The following is a sample of the data.

□ You want to improve the performance of the views by including only animals of a particular type.

To which filter should you add the Type field on the worksheet?

- A. Table calculation filter
- B. Measure filter
- C. Context filter
- D. Dimension filler

Antwort: C

109. Frage

You have the following data source in Tableau Server.

□ You need to ensure that the data is updated every hour.

What should you select?

- A. Connections
- B. Extract Refreshes
- C. Connected Workbooks

- D. New

Antwort: B

Begründung:

To ensure that the data is updated every hour, you need to select Extract Refreshes from the data source menu on Tableau Server. This will allow you to add a new extract refresh schedule or edit an existing one. You can specify the frequency and time of the refresh, as well as any custom options or credentials. New will create a new data source, Connected Workbooks will show you which workbooks use this data source, and Connections will show you which tables or files are connected to this data source.

References: [https://help.](https://help.tableau.com/current/server/en-us/refresh_extracts.htm)

[tableau.com/current/server/en-us/refresh_extracts.htm](https://help.tableau.com/current/server/en-us/refresh_extracts_add.htm) https://help.tableau.com/current/server/en-us/refresh_extracts_add.htm

To ensure that the data is updated every hour on Tableau Server, you would need to go to the "Extract Refreshes" option. Here, you can schedule the data extracts to refresh at the desired frequency, which in this case would be every hour.

110. Frage

.....

Mit Salesforce Analytics-DA-201 Zertifikat können Sie Ihre Berufsaussichten verbessern und viele neuen Chancen erschließen. ZertPruefung ist eine geeignete Website für die Kandidaten, die an der Salesforce Analytics-DA-201 Zertifizierungsprüfung teilnehmen. Es wird nicht nur alle Informationen zur Salesforce Analytics-DA-201 Zertifizierungsprüfung, sondern Ihnen auch eine gute Lernchance bieten. ZertPruefung wird Ihnen helfen, die Salesforce Analytics-DA-201 Zertifizierungsprüfung ganz einfach zu bestehen.
