

# ZDTE Test Tutorials, ZDTE Latest Test Practice

P.S. Free 2026 Zscaler ZDTE dumps are available on Google Drive shared by DumpsKing: <https://drive.google.com/open?id=1cKj4KSTsthahRBcKtLXpiRPARpIktVGI>

A lot of students have used our product and prepared successfully for the test. Every user has rated study material positively and passed the ZDTE Exam. DumpsKing gives a guarantee to the customers that if they fail to pass the Zscaler Digital Transformation Engineer (ZDTE) certification on the very first try despite all their efforts they can claim their money back according to terms and conditions. A team of experts is working day and night in order to make the product successful day by day and provide the customers with the best experience.

On the one hand, our ZDTE quiz torrent can help you obtain professional certificates with high quality in any industry without any difficulty. On the other hand, ZDTE exam guide can give you the opportunity to become a senior manager of the company, so that you no longer engage in simple and repetitive work, and you will never face the threat of layoffs. However, if you are an unemployed person, our study materials also should be the best choice for you. ZDTE Quiz torrent can help you calm down and learn more knowledge of it, and what most important is that our study materials can help you use the shortest time to reach to the top of your career. What are you waiting for? Come and buy it now!

## ZDTE Latest Test Practice, ZDTE Reliable Study Notes

Now you can pass Zscaler ZDTE exam without going through any hassle. You can only focus on ZDTE exam dumps provided by

the DumpsKing, and you will be able to pass the ZDTE test in the first attempt. We provide high quality and easy to understand ZDTE dumps with verified Zscaler ZDTE for all the professionals who are looking to pass the Zscaler ZDTE exam in the first attempt. The ZDTE training material package includes latest ZDTE questions and practice test software that will help you to pass the ZDTE exam.

## Zscaler Digital Transformation Engineer Sample Questions (Q47-Q52):

### NEW QUESTION # 47

What is the primary benefit of using a Custom Zscaler Connector for SaaS Application?

- A. Temporary user credentials to access the SaaS Application Tenants
- B. Broad access to all SaaS Application Tenants across Microsoft and Google
- C. Minimum set of required credentials to access the SaaS Application Tenants
- D. Full administrator credentials to access the SaaS Application Tenants

**Answer: C**

Explanation:

In Zscaler's SaaS Security and Data Protection services, a Custom Zscaler Connector (for example, for Google Workspace, Microsoft 365, or Salesforce) is designed so that Zscaler can connect to a specific SaaS tenant using only the minimum set of required credentials and scopes. The documentation for onboarding custom connectors explicitly emphasizes that, instead of providing full administrator rights, you authorize narrowly scoped API/OAuth permissions that allow Zscaler to scan data at rest and enforce security controls while adhering to least-privilege principles.

This minimal-credential approach reduces risk if the connector credentials are ever compromised, simplifies compliance audits, and aligns with modern security best practices. Zscaler needs just enough access to read, classify, and (where applicable) remediate or quarantine sensitive content in sanctioned SaaS applications, not broad tenant-wide admin access. Options suggesting temporary credentials, broad cross-tenant access, or full administrator rights contradict this design philosophy and the way the connectors are documented. Therefore, the primary benefit-and the key phrase you should associate with Custom Zscaler Connectors for the exam-is that they enable Zscaler to operate using a minimum set of required credentials for each SaaS Application tenant.

### NEW QUESTION # 48

Which of the following capabilities is not included in the OneAPI Framework for ZIA?

- A. Administrator Role Based Access
- B. Web Insights Log Retrieval
- C. Malware Settings
- D. SCIM Enable/Disable

**Answer: D**

Explanation:

The Zscaler OneAPI framework is presented in the Engineer curriculum as the unified automation layer for ZIA, ZPA, ZDX, Client Connector, and other services. For ZIA specifically, OneAPI introduces OAuth-based authentication, fine-grained administrator role-based access control for API clients, configuration and policy management endpoints, activation controls, and access to Insights and log retrieval APIs. The course material highlights examples such as using OneAPI to manage admin roles, automate malware and advanced-threat settings, and programmatically retrieve Web Insights logs for reporting and SIEM workflows.

In contrast, SCIM (System for Cross-domain Identity Management) is described separately as an identity- provisioning standard used to synchronize users and groups from identity providers like Azure AD or Okta.

Enabling or disabling SCIM and configuring SCIM endpoints is handled through dedicated SCIM configuration, not through the OneAPI framework. While both OneAPI and SCIM are automation-related, they are distinct interfaces in the Zscaler platform.

Therefore, among the options provided, SCIM Enable

/Disable is the capability that is not part of the OneAPI Framework for ZIA, whereas administrator RBAC, Web Insights log retrieval, and malware policy settings are all explicitly included.

### NEW QUESTION # 49

Which report provides valuable visibility and insight into end-user activity involving sensitive data on endpoints?

- A. Incidents report
- **B. Endpoint DLP report**
- C. Malware report
- D. Data usage report

**Answer: B**

Explanation:

In Zscaler, the Endpoint DLP report is specifically designed to give security teams visibility into how end users interact with sensitive data on their endpoints (laptops, desktops, etc.). This report aggregates activity such as copying, saving, printing, uploading, or otherwise handling sensitive content that is detected and classified by Zscaler Endpoint DLP. It focuses on data risk rather than just malware or traffic volumes, so it shows which files, users, and devices are involved in policy matches, along with the context of each event.

Unlike a generic malware or data usage report, the Endpoint DLP report is tightly aligned with DLP policies and data classifications you configure (such as PII, financial data, source code, or custom patterns). This allows you to quickly see which policies are triggering on endpoints, which channels or applications are most frequently involved, and where to fine-tune rules or add additional controls. Because it is endpoint-focused, it covers scenarios even when users are off the corporate network, giving a unified view across inline and endpoint DLP enforcement. For exam purposes, this is why Endpoint DLP report is the correct answer.

#### NEW QUESTION # 50

How can Zscaler ThreatParse, in conjunction with information about the MITRE ATTandCK framework, assist security analysts in determining the attacker's objectives?

- **A. It conducts natural language reconstruction of attacks by summarizing and translating log information into plain English.**
- B. It provides suggestions on risk management strategies provided by the framework.
- C. It maps into the framework to evaluate the probability of a financial loss.
- D. It prioritizes the log information according to the latest campaign in the MITRE ATTandCK framework.

**Answer: A**

Explanation:

ThreatParse is part of Zscaler's advanced cyberthreat analysis capabilities, used primarily within Zscaler Deception and related SecOps workflows. Zscaler describes ThreatParse as an investigative engine that takes raw attack or event logs and "reconstructs" the attack sequence, summarizing what happened and translating the data into plain, human-readable language so even junior analysts can quickly understand the incident.

In addition, ThreatParse enriches these reconstructed attacks with structured information tied to the MITRE ATTandCK framework, including tactic and technique identifiers plus an associated risk score. This linkage helps analysts recognize why the attacker is performing certain actions (for example, credential access, lateral movement, or data exfiltration) rather than just what they did.

By combining natural-language reconstruction with MITRE ATTandCK context, ThreatParse effectively turns low-level events into a clear narrative aligned with attacker tactics and objectives. Analysts can quickly see which stage of the kill chain the adversary is in, the severity of the behavior, and which threats demand immediate attention. Options B and C are incorrect because ThreatParse does not perform financial-loss modeling or generic risk-management recommendations; option D is inaccurate because its primary value is narrative reconstruction plus ATTandCK mapping and risk scoring, not simply prioritizing logs by "latest campaign."

#### NEW QUESTION # 51

How many minutes of data can the Log Streaming Service retransmit once the connection is restored between App Connectors and Zscaler Private Access (ZPA)?

- A. Last 30 minutes
- B. Last 20 minutes
- **C. Last 15 minutes**
- D. Last 60 minutes

**Answer: C**

Explanation:

Zscaler Private Access (ZPA) uses the Log Streaming Service (LSS) to deliver ZPA logs (such as user activity and connector/authentication logs) to external SIEM and analytics platforms. LSS relies on a ZPA App Connector as the local relay

between the ZPA service and the downstream log receiver. If network connectivity between ZPA and the local App Connector is interrupted, log delivery may be temporarily disrupted.

According to Zscaler integration guidance, when connectivity between ZPA and the local App Connectors is restored, LSS can retransmit up to 15 minutes of previously undelivered log data, although this retransmission is not guaranteed in all circumstances. This limited replay window is designed to provide reasonable resilience for short outages without requiring large local storage on the connector.

The 15-minute buffer applies specifically to ZPA log streaming scenarios and is distinct from longer-term log retention in Zscaler's logging cluster or external SIEM. Options A, C, and D overstate the supported replay duration and do not match Zscaler's documented behavior. To minimize log gaps beyond this 15-minute window, Zscaler recommends resilient network paths for App Connectors and careful monitoring of connector health so that LSS can operate continuously.

## NEW QUESTION # 52

.....

We DumpsKing are built in years of 2010. Recent years we are offering reliable certification ZDTE exam torrent materials and gain new & old customers' praise based on our high pass rate. We put much emphasis on our ZDTE exam questions quality and we are trying to provide the best after-sale customer service on ZDTE training guide for buyers. If you are looking for professional & high-quality ZDTE preparation materials, you can trust us and choose our ZDTE study materials. Our ZDTE exam guide is able to help you clear exams at the first attempt.

**ZDTE Latest Test Practice:** <https://www.dumpsking.com/ZDTE-testking-dumps.html>

We provide the formal invoice to you once you have paid our ZDTE training materials, so that you have a clear understanding of what your money have cost, Zscaler ZDTE Test Tutorials Although we all love cozy life, we must work hard to create our own value, Zscaler ZDTE Test Tutorials We want to be a new one, Looking for the quick and complete Zscaler ZDTE exam dumps preparation way that enables you to pass the ZDTE certification exam with good scores?

At this time, you can either keep your existing phone number and cellular service ZDTE plan, or switch to a plan that better meets your needs and budget, Some cameras have a grid that you can turn on to help you straighten images.
