You may be worrying about that you can't find an ideal job or earn low wage. You may be complaining that your work abilities can't be recognized or you have not been promoted for a long time. But if you try to pass the C-BW4H-2505 exam you will have a high possibility to find a good job with a high income. That is why I suggest that you should purchase our C-BW4H-2505 Questions torrent. Once you purchase and learn our exam materials, you will find it is just a piece of cake to pass the exam and get a better job.

The SAP C-BW4H-2505 practice test questions prep material has actual SAP C-BW4H-2505 exam questions for our customers so they don't face any hurdles while preparing for SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) certification exam. The study material is made by professionals while thinking about our users. We have made the product user-friendly so it will be an easy-to-use learning material. We even guarantee our users that if they couldn't pass the SAP C-BW4H-2505 Certification Exam on the first try with their efforts, they can claim a full refund of their payment from us (terms and conditions apply).

SAP C-BW4H-2505 Latest Exam Papers & C-BW4H-2505 Valid Braindumps Pdf

All of our C-BW4H-2505 pdf torrent are up-to-date and reviewed by our IT experts and professionals. We have written our C-BW4H-2505 study guide in such a way that you don't need to prepare anything else after practice our C-BW4H-2505 Exam Questions. You can pass the real exam easily with our latest C-BW4H-2505 vce dumps and this is the only smartest way to get success. Just contact us if you have any questions.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q65-Q70):

NEW QUESTION # 65

Which solution enables advanced AI and machine learning models on combined SAP and third-party data?

- A. SAP Analytics Cloud
- B. SAP AI Launchpad
- C. SAP Databricks
- D. SAP Datasphere

Answer: C

NEW QUESTION # 66

For which requirements do you suggest an SAP HANA modeling focus rather than an focus? Note: There are 2 correct answers to this question.

- A. Reporting on a harmonized set of master data
- B. Leveraging SQL in-house knowledge
- C. Finding the best match using a fuzzy search
- D. Loading snapshots or deltas from different sources on a periodic basis

Answer: B,C

NEW QUESTION # 67

Which source types are available to create a generic DataSource in SAP ERP? Note: There are 3 correct answers to this question.

- A. Database view
- B. ABAP managed database procedure
- C. SAP query
- D. ABAP function module
- E. ABAP class method

Answer: C,D,E

Explanation:

In SAP ERP, a Generic DataSource is used to extract data from various source types and make it available for consumption in SAP BW/4HANA or other systems. The source type defines the origin of the data and how it is extracted. Below is an explanation of the correct answers and why they are valid.

* A. ABAP class method

* An ABAP class method can be used as a source type for a Generic DataSource. This approach allows developers to encapsulate complex logic within an ABAP class and expose the data extraction logic through a specific method.

* The method is called during the data extraction process, and its output is used as the data source.

This is particularly useful for scenarios where custom logic or calculations are required to prepare the data.

1: SAP provides support for ABAP class methods as part of its Generic DataSource framework, enabling flexible and reusable data extraction.

B). SAP query

An SAP query can also serve as a source type for a Generic DataSource. SAP queries are predefined reports created using the SAP Query tool, which allows users to extract data from logical databases or user-defined views.

By leveraging SAP queries, non-technical users can create data sources without requiring extensive programming knowledge. The query output is then used as the basis for the Generic DataSource.

Reference: SAP Query is a widely used tool in SAP ERP for creating ad-hoc reports and data extracts, making it a convenient option for Generic DataSources.

D). ABAP function module

An ABAP function module is one of the most common source types for Generic DataSources. Function modules are reusable ABAP routines that encapsulate specific business logic or data extraction processes.

During the extraction process, the function module is executed, and its output is passed to the Generic DataSource. This approach is highly flexible and supports complex data transformations and filtering.

Reference: SAP BW/4HANA extensively uses ABAP function modules for data extraction, as they provide a robust and scalable way to retrieve data from SAP ERP systems.

Incorrect Options: C. ABAP managed database procedure

ABAP Managed Database Procedures (AMDPs) are used to execute database-specific logic directly on the database layer. While

AMDPs are powerful for performance optimization, they are not supported as a source type for Generic DataSources. Generic DataSources rely on higher-level ABAP constructs like function modules or class methods rather than low-level database procedures.

Reference: AMDPs are primarily used for advanced SQLScript-based processing and are not integrated into the Generic DataSource framework.

E). Database view

While database views are commonly used to structure and organize data in SAP ERP, they cannot be directly used as a source type for Generic DataSources. Instead, database views are typically accessed indirectly through ABAP function modules or class methods.

Reference: SAP recommends using higher-level ABAP constructs (e.g., function modules) to encapsulate the logic for accessing database views, ensuring better flexibility and maintainability.

Conclusion: The correct answers are A. ABAP class method, B. SAP query, and D. ABAP function module, as these are the supported source types for creating Generic DataSources in SAP ERP. These options provide flexibility, reusability, and ease of use for extracting data from SAP ERP systems.

NEW QUESTION # 68

You created a generic DataSource in SAP ERP, but did not release the DataSource for Operational Data Provisioning (ODP). What is the effect in SAP BW/4HANA?

- A. The ODP DataSource can be generated using the DataFlow generation feature.
- B. The ODP DataSource has to be created using the ODP_SAP source system type.
- C. The ODP DataSource cannot be replicated using the ODP_SAP source system type.
- D. The ODP DataSource has to be created using the ODP_HANA source system type.

Answer: C

NEW QUESTION # 69

The Database Explorer in the Web IDE for SAP HANA provides a data file import wizard to create a table in SAP HANA from a flat file. What are possible actions after the system suggests the target structure? Note:

There are 3 correct answers to this question.

- A. Change the order of the fields in the target table.
- B. Adjust the suggested data type of the target table fields.
- C. Define sorting properties for a target table field.
- D. Remove leading zeroes for a target table field.
- E. Switch the table type between row store and column store.

Answer: A,B,D

NEW QUESTION # 70

.....

As the saying goes, to develop study interest requires to giving learner a good key for study, this is promoting learner active development of internal factors. The most function of our C-BW4H-2505 question torrent is to help our customers develop a good study habits, cultivate interest in learning and make them pass their exam easily and get their C-BW4H-2505 Certification. All workers of our company are working together, in order to produce a high-quality product for candidates.

C-BW4H-2505 Latest Exam Papers: <https://www.itexamsimulator.com/C-BW4H-2505-brain-dumps.html>

Each of our user of SAP C-BW4H-2505 study materials share their news of success and give high evaluations on our products, which we appreciate so much that we are willing to serve our users of C-BW4H-2505 VCE dumps questions with the best products and the top one services, The strength of a website is highly important for your choose if you want to have a good test about purchasing C-BW4H-2505 latest dumps, SAP C-BW4H-2505 Latest Braindumps Book Best way to save time and money.

To create a custom search path, you should first configure the C-BW4H-2505 appropriate Open Directory modules in the Services tab to access the directories you want to include in the search path.

Let's look at an example of some events, both self executing and user initiated, Each of our user of SAP C-BW4H-2505 Study
