

Professional NCP-DB-6.10 Reliable Test Tips | Newest Valid Test NCP-DB-6.10 Braindumps and Correct Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Interactive EBook

Actual4dump is a website that specializes in providing IT exam information. The pass rate can achieve 100%. Which is one of the reasons that most candidates willing to believe the Actual4dump. Actual4dump have been always concerned about the needs of the majority of candidates. We always with the greatest ability to meet the needs of the candidates. Actual4dump's Nutanix NCP-DB-6.10 Exam Training materials is an unprecedented IT certification training materials. With it, your future career will be rain or shine.

There are some loopholes or systemic problems in the use of a product, which is why a lot of online products are maintained for a very late period. The NCP-DB-6.10 study materials are not exceptional also, in order to let the users to achieve the best product experience, if there is some learning platform system vulnerabilities or bugs, we will check the operation of the NCP-DB-6.10 study materials in the first time, let the professional service personnel to help user to solve any problems. The NCP-DB-6.10 Study Materials have many professionals, and they monitor the use of the user environment and the safety of the learning platform timely, for there are some problems with those still in the incubation period of strict control, thus to maintain the NCP-DB-6.10 study materials timely, let the user comfortable working in a better environment. Believe it or not, we face the more intense society, and we should prompt our competitiveness to make our dreams come true.

Valid Test NCP-DB-6.10 Braindumps, NCP-DB-6.10 Interactive EBook

If you are lack of skills in the preparation of getting the certification, our NCP-DB-6.10 study materials are the best choice for you. Many people have successfully realized economic freedom after getting the NCP-DB-6.10 certificate and changing a high salary job. So you need to act from now, come to join us and struggle together. Our NCP-DB-6.10 Study Materials will help you change into social elite and you will never feel disappointed.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q237-Q242):

NEW QUESTION # 237

An administrator needs to perform patching on a MongoDB server cluster within an NDB environment. How should the administrator accomplish this task?

- A. Perform a rolling upgrade, applying the patch to the primary member first, followed by the secondary members.
- B. Apply the patch to all nodes at once.
- C. Perform a rolling upgrade, applying the patch to the secondary members first, followed by the primary member.
- D. Disable the replica set while patching.

Answer: C

Explanation:

The administrator should perform a rolling upgrade, applying the patch to the secondary members first, followed by the primary member, to accomplish the task of patching a MongoDB server cluster within an NDB environment. A rolling upgrade is a method of applying patches or updates to a cluster without downtime or interruption of service. The administrator can use the NDB patching feature to perform a rolling upgrade on a MongoDB server cluster, which consists of a primary member and one or more secondary members that form a replica set. The NDB patching feature allows the administrator to select the software profile version, the database parameters profile, and the network profile for the patching operation.

NEW QUESTION # 238

Before registering a database server VM to NDB, what should an administrator use to verify all required software and configuration dependencies?

- **A. Prerequisites script**
- B. Upgrade Software
- C. LCM
- D. NCC

Answer: A

Explanation:

Before registering a database server VM to NDB, an administrator must verify that all required software (e.g., database engine, OS dependencies) and configuration settings (e.g., WinRM for Windows, SSH for Linux) are in place. NDB provides a prerequisites script, which can be run on the target VM to check these dependencies automatically. This script ensures compatibility and readiness, reducing registration failures.

NEW QUESTION # 239

An administrator needs to create a custom PostgreSQL HA software profile. Which software component manages the state of the cluster and handles failover?

- A. keepalived
- B. etcd
- C. HAProxy
- **D. Patroni**

Answer: D

Explanation:

NDB supports PostgreSQL HA software profiles for provisioning PostgreSQL databases with high availability. PostgreSQL HA software profiles consist of three components: etcd, HAProxy, and Patroni.

etcd is a distributed key-value store that provides a reliable way to store configuration data across a cluster of machines. etcd is used by Patroni to store and synchronize the cluster state and configuration.

HAProxy is a load balancer that distributes incoming requests to the PostgreSQL nodes.

HAProxy is used to expose a single endpoint for database connections even as the roles of the individual nodes change.

Patroni is a template for PostgreSQL high availability. Patroni is responsible for managing the state of the cluster and handling failover. Patroni uses etcd as the distributed configuration store and relies on HAProxy for load balancing.

Therefore, the software component that manages the state of the cluster and handles failover is Patroni.

NEW QUESTION # 240

Which step is optional when completing the NDE Wizard?

- **A. Network Segmentation**
- B. Storage Container
- C. Services
- D. ND8 Cluster Name

Answer: A

Explanation:

When completing the NDB (Nutanix Database Service) Wizard for initial setup or configuration, certain steps are mandatory to ensure the environment is properly configured, while others are optional based on specific needs. Network Segmentation is an optional step that allows for advanced network isolation and configuration, but it is not required for basic NDB deployment. Mandatory steps include specifying the NDB Cluster Name, selecting a Storage Container, and configuring Services (e.g., database services), as these are essential for NDB to function and manage databases.

NEW QUESTION # 241

A database administrator logged into their NDB dashboard notices the Savings over traditional cloning metric in the Data Usage widget.

What does this number represent?

- A. The amount of disk space saved from deduplication
- **B. The amount of disk space saved with near-zero byte clones**
- C. The amount of disk space saved with shadow clones
- D. The amount of disk space saved from compression

Answer: B

Explanation:

The "Savings over traditional cloning" metric in the Data Usage widget on the NDB dashboard reflects the efficiency of NDB's cloning technology compared to traditional full-copy cloning methods. NDB leverages Nutanix's near-zero byte cloning capability, which creates lightweight clones by sharing base data and only storing changes (deltas). This metric specifically quantifies the disk space saved by using these efficient clones instead of duplicating entire datasets, as would occur in traditional cloning. It highlights NDB's storage optimization for database provisioning and management.

NEW QUESTION # 242

.....

Our NCP-DB-6.10 study materials are willing to stand by your side and provide attentive service, and to meet the majority of customers, we sincerely recommend our study materials to all customers, for our rich experience and excellent service are more than you can imagine. There are a lot of advantages of NCP-DB-6.10 training guide for your reference. And there are three versions of different NCP-DB-6.10 exam questions for you to choose: the PDF, Soft and APP online. You can free download the demos to decide which one to choose.

Valid Test NCP-DB-6.10 Braindumps: <https://www.actual4dump.com/Nutanix/NCP-DB-6.10-actualtests-dumps.html>

Nutanix NCP-DB-6.10 Reliable Test Tips Always Choose The Best, To do this you just need to pass the one Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam, Nutanix NCP-DB-6.10 Reliable Test Tips Students, who got failed, even after struggling hard to pass the exams by using our preparation material, are advised to claim our money back guarantee, Nutanix NCP-DB-6.10 Reliable Test Tips To some extent, exam is kind of an annoyance for its complexity and preparation.

The good news is, Adobe is working hard on refining and perfecting the Watermarking NCP-DB-6.10 workflow for Lightroom users, so hopefully the final version will provide file support for a wide array of image types including those with transparency.

High Pass Rate NCP-DB-6.10 Study Materials Tool Helps You Get the NCP-DB-6.10 Certification

There are millions of reports waiting for you, Always Choose The Best, To do this you just need to pass the one Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam, Students, who got failed, even after struggling hard to NCP-DB-6.10 Exam Sample Questions pass the exams by using our preparation material, are advised to claim our money back guarantee.

To some extent, exam is kind of an annoyance for its complexity NCP-DB-6.10 Interactive EBook and preparation, • Randomize questions (it has various questions, from basic level to advance),.
