MikroTik Certified Network Associate Exam study questions provide free trial service for consumers. If you are interested in MTCNA exam material, you only need to enter our official website, and you can immediately download and experience our trial PDF file for free. Through the trial you will have different learning experience, you will find that what we say is not a lie, and you will immediately fall in love with our products. As a key to the success of your life, the benefits that MTCNA Exam Guide can bring you are not measured by money. MTCNA exam guide can not only help you pass the exam, but also help you master a new set of learning methods and teach you how to study efficiently, MTCNA exam material will lead you to success.

MikroTik MTCNA Certification is an excellent way to validate one's knowledge and skills in the field of computer networking. MikroTik Certified Network Associate Exam certification program is backed by a reputable company and covers essential networking concepts and skills. It is an excellent way for network engineers, IT professionals, and anyone else interested in networking technology to enhance their technical skills and advance their careers.

Valid MTCNA Exam Testking | New Exam MTCNA Materials

Do some fresh things each day that moves you out of your comfort zone. If you stay cozy every day, you will gradually become lazy. Now, you have the opportunity to change your current conditions. Our MTCNA real exam dumps are specially prepared for you. Try our MTCNA study tool and absorb new knowledge. After a period of learning, you will find that you are making progress. The knowledge you have studied on our MTCNA Exam Question will enrich your life and make you wise. Do not reject challenging yourself. Your life will finally benefit from your positive changes. Let us struggle together and become better. Then you will do not need to admire others' life. Our MTCNA real exam dumps will fully change your life.

MikroTik MTCNA (MikroTik Certified Network Associate) Certification Exam is a globally recognized certification that validates the expertise of network professionals in configuring, managing, and troubleshooting MikroTik routers and networks. MikroTik Certified Network Associate Exam certification exam is designed to test the knowledge and skills of individuals with entry-level expertise in networking and MikroTik RouterOS software.

MikroTik Certified Network Associate Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which of these are possible solutions to bridge two networks over a wireless link:

- A. One device in AP mode, another one in station-pseudobridge
- B. Both devices in AP mode and enable WDS mode

- C. One device in AP mode, another one in station-pseudobridge-clone
- D. One device in AP mode, another one in station

Answer: A,B,C

Explanation:

To bridge two networks over a wireless link (i.e., perform Layer 2 bridging), MikroTik offers several wireless modes that support bridging:

* WDS (Wireless Distribution System) is MikroTik's mechanism to forward Layer 2 frames over wireless

* pseudobridge and pseudobridge-clone attempt to mimic Layer 2 bridging, with some limitations Option analysis:

* A.#Correct-Using AP mode on both ends and enabling WDS allows full Layer 2 bridging

* B.#Correct-pseudobridge-clone allows limited bridging by spoofing the MAC address of the connected host

* C.#Correct-station-pseudobridge enables partial bridging (one client per MAC)

* D.#Incorrect-station mode alone does not support Layer 2 bridging; it performs routing/NAT instead Extract from MTCNA Course Material - Bridging and Wireless Section:

"To bridge over wireless, you can use WDS or station-pseudobridge(-clone). WDS provides true Layer 2 bridging, while pseudobridge methods simulate it for single hosts." Extract from Rene Meneses Study Guide - Wireless Bridging:

"WDS is most reliable for bridging, pseudobridge and pseudobridge-clone work with one client and should be used cautiously."

Extract from Terry Combs Notes - Wireless Bridging:

"station mode alone is not sufficient for bridging. Use WDS or pseudobridge options."

NEW QUESTION # 38

You have a router with configuration

- Public IP :202.168.125.45/24

- Default gateway:202.168.125.1

- DNS server: 248.115.148.136, 248.115.148.137

- Local IP: 192.168.2.1/24

Mark the correct configuration on client PC to access to the Internet

- A. IP:192.168.2.115/24 gateway: 192.168.2.1
- B. IP:192.168.1.223/24 gateway:248.115.148.136
- C. IP:192.168.0.1/24 gateway:192.168.2.1
- D. IP:192.168.2.2/24 gateway:202.168.125.45
- E. IP:192.168.2.253/24 gateway:202.168.0.1

Answer: A

NEW QUESTION # 39

During a scan, in order to see all the available wireless frequencies that are supported by the card, the following option must be selected in the wireless card's "Frequency Mode":

- A. manual txpower
- B. regulatory domain
- C. superchannel

Answer: C

NEW QUESTION # 40

Mark all correct answers.

- A. Default-Forwarding could be enabled for a specific clients by wireless access-list
- B. The only way to prevent wireless clients connections - disable wireless interface
- C. Wireless access-list could allow and deny connect to your AP
- D. /ip firewall filter allows to deny authentication to AP

Answer: A,C

Explanation:

Let's evaluate each statement:

- * A.#Incorrect - /ip firewall filter can block traffic after association/authentication but cannot directly prevent wireless authentication. Association happens before IP-level filtering.
- * B.#Correct - Wireless access-list allows or denies associations based on MAC address and other parameters (signal strength, etc.).
- * C.#Correct - Access-list rules can enable/disable default-forwarding per client (overriding global setting).
- * D.#Incorrect - Disabling the wireless interface is not the only way. You can use access-list or disable SSID broadcast.

Extract from MTCNA Course Material - Wireless Access List:

"Access List provides client control based on MAC address. You can accept, reject, and even override default- forwarding per client." Extract from Rene Meneses MTCNA Study Guide - Access Control:

"Wireless Access List can selectively allow or deny clients and enforce individual settings like forwarding." Extract from MikroTik Wiki - Wireless Access List:

"The firewall filter is not involved in authentication. Access control must be done at the wireless layer using access-lists."

NEW QUESTION # 41

What is the meaning of letter "R" on an active session in the menu PPP Active Connections?

- A. Running
- B. Remote
- C. Radius

Answer: C

NEW QUESTION # 42
