最新的 CSF Practitioner CCSFP 免費考試真題 (Q54-Q59):

問題 #54
What type of deficiency would be identified in the following Requirement Statement scoring scenario?
* Policy = 50%
* Process = 50%
* Implemented = 75%
* Measured = 0%
* Managed = 0%

  • A. No deficiency
  • B. Not enough information to determine
  • C. Gap
  • D. Required CAP

答案：D

解題說明：
In HITRUST scoring, deficiencies are identified when maturity levels fall below required thresholds for certification. In this case, the Policy, Procedure, and Implementation levels are not fully compliant, with scores of 50%, 50%, and 75% respectively. For certification-critical controls, HITRUST requires 100% Implementation, supported by adequate Policy and Procedure. Since the Implementation score is not at 100% and supporting maturity levels are below full compliance, this results in aRequired Corrective Action Plan (CAP). The CAP ensures the organization addresses deficiencies through remediation. Unlike optional CAPs, which may apply to non-critical requirements, required CAPs must be documented and remediated to achieve certification. Thus, the

correct classification of this scoring outcome is aRequired CAP.

問題 #55
To perform a rapid assessment, the assessment and/or insights report must each contain more than 60 requirements.

- A. True
- B. False

答案：B

解題說明：
HITRUST offersRapid Assessmentsas a lightweight reporting option for organizations and their relying parties. These assessments provide high-level visibility without requiring large numbers of requirements. In fact, a Rapid Assessment may containfewer than 60 requirement statementsdepending on scoping and factors selected. There is no requirement that an assessment or insights report exceed 60 requirements to qualify as a rapid assessment. Instead, the determination is based on the selected assessment type (e1, i1, or targeted factors) and whether the output is requested in "rapid" format. This flexibility allows small organizations or specific use cases to leverage HITRUST without unnecessary burden.

問題 #56
Select the four general risk factor categories used when scoping r2 assessments.

- A. Compliance
- B. Organizational
- C. Privacy
- D. Technical
- E. General
- F. Operational

答案：A,B,D,F

解題說明：
When performing scoping for an r2 assessment, HITRUST requires consideration ofrisk factorsthat tailor requirement statements. Four categories are applied:Technical, Organizational, Compliance, and Operational.
* Technical Risk Factorsconsider measurable characteristics such as number of users, systems, or transactions, which directly influence the size and complexity of the control environment.
* Organizational Risk Factorsaddress the type of business, industry sector, and whether the entity is a covered entity or business associate.
* Compliance Risk Factorsincorporate regulatory drivers (e.g., HIPAA, PCI DSS, state laws) that generate additional requirement statements.
* Operational Risk Factorsconsider how data is used, stored, and transmitted, including exposure points like internet-facing systems.
"General" and "Privacy" are not categories formally recognized in the HITRUST methodology. Privacy obligations are accounted for under compliance drivers such as HIPAA, GDPR, or state laws. These categories ensure that control requirements are right-sized to the entity's unique environment, reducing both over-scoping and under-scoping.

問題 #57
HITRUST offers certifications for the following: (Select all that apply) [0017]

- A. NIST Cybersecurity Framework
- B. NIST 800-53
- C. HITRUST CSF
- D. ISO 27001

- E. PCI-DSS

答案：C

解題說明：
HITRUST issues certifications only for the HITRUST CSF (e.g., e1, i1, r2 certifications and designated privacy/AI certifications as defined by the program). While the CSF maps to and harmonizes with other frameworks and regulations (e.g., NIST SP 800-53, ISO/IEC 27001/27002, PCI-DSS), HITRUST does not issue certifications for those external standards.
"HITRUST provides certification against the HITRUST CSF. External standards and regulations are integrated as authoritative sources and mappings but are not certified by HITRUST." [CCSFP Program Overview - Certifications & Mappings, 0017]

問題 #58
When are HITRUST Assurance Advisories (HAA) posted? [0167]

- A. Quarterly
- B. Monthly
- C. There is no formal schedule for issuing Assurance Advisories
- D. Annually

答案：C

解題說明：
HITRUST Assurance Advisories (HAAs) are issued when necessary to communicate important updates, clarifications, or changes impacting the CSF Assurance Program. These advisories are not bound to a fixed schedule (monthly, quarterly, or annually), but rather published as needed.
Extract Reference (HITRUST CSF Assurance Program, CCSFP Content [0167]):
There is no formal schedule for issuing HITRUST Assurance Advisories; they are published on an as-needed basis to communicate relevant updates.
Correct response: There is no formal schedule.
