

DP-300 Training Questions & DP-300 Actual Braindumps

Practice PassQuestion DP-300 Training Questions ensure your 100% success

Question 3

You need to implement authentication for ResearchDB1. The solution must meet the security and compliance requirements.

What should you run as part of the implementation?

- A. CREATE LOGIN and the FROM WINDOWS clause
- B. CREATE USER and the FROM CERTIFICATE clause
- C. CREATE USER and the FROM LOGIN clause
- D. CREATE USER and the ASYMMETRIC KEY clause
- E. CREATE USER and the FROM EXTERNAL PROVIDER clause

Answer: E

High efficiency service has won reputation for us among multitude of customers, so choosing our DP-300 real study dumps we guarantee that you won't be regret of your decision. Helping our candidates to pass the DP-300 exam and achieve their dream has always been our common ideal. We believe that your satisfactory on our DP-300 Exam Questions is the drive force for our company. Meanwhile, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful DP-300 real study dumps.

We are committed to provide you the best and the latest DP-300 training materials for you. Quality of the DP-300 exam dumps has get high evaluation among our customers, they think highly of it, since we help them pass the exam easily. Furthermore if we have the updated version, our system will send the Latest DP-300 Exam Dumps to your email address automatically, you don't need to worry about missing the latest version, you just need to concentrate your attention on practicing, and we will do the rest for you.

DP-300 Actual Braindumps | DP-300 Certification Book Torrent

The Administering Relational Databases on Microsoft Azure (DP-300) certification exam is one of the hottest and most industrial-recognized credentials that has been inspiring beginners and experienced professionals since its beginning. With the Administering Relational Databases on Microsoft Azure (DP-300) certification exam successful candidates can gain a range of benefits which include career advancement, higher earning potential, industrial recognition of skills and job security, and more career personal and professional growth.

Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q230-Q235):

NEW QUESTION # 230

You have an Azure subscription that contains a group named Group1 and an Azure SQL managed instance that hosts a database named 081. You need to ensure that Group 1 has read access to new tables created in 061. The solution must use the principle of least privilege. How should you complete the Transact-SQL statement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Answer:

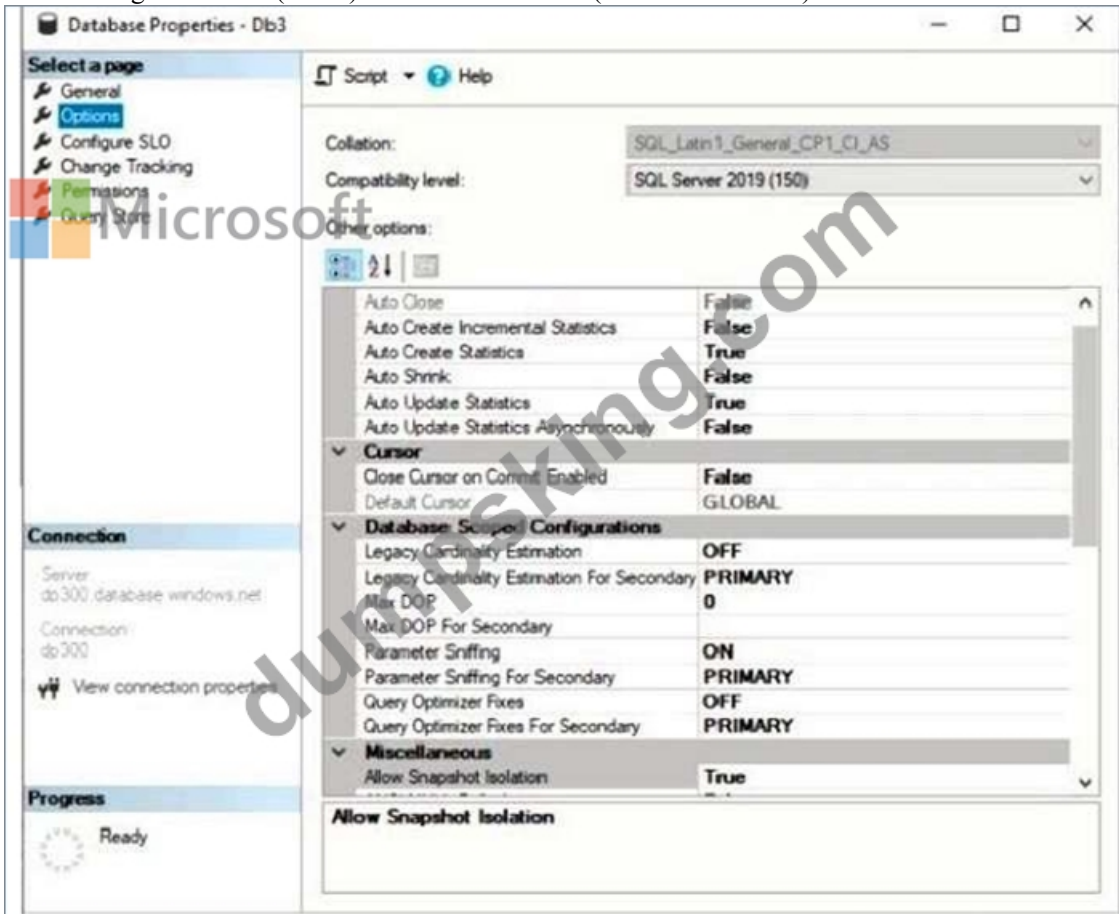

Explanation:

NEW QUESTION # 231

You have an Azure SQL database named DB3.

You need to provide a user named DevUser with the ability to view the properties of DB3 from Microsoft SQL Server Management Studio (SSMS) as shown in the exhibit. (Click the Exhibit tab.)

Which Transact-SQL command should you run?

- A. GRANT SELECT TO DevUser
- **B. GRANT VIEW DATABASE STATE TO DevUser**
- C. GRANT SHOWPLAN TO DevUser
- D. GRANT VIEW DEFINITION TO DevUser

Answer: B

Explanation:

Section: [none]

Explanation:

The exhibit displays Database [State] properties.

To query a dynamic management view or function requires SELECT permission on object and VIEW SERVER STATE or VIEW DATABASE STATE permission.

Reference:

<https://docs.microsoft.com/en-us/sql/relational-databases/databases/database-properties-options-page>

NEW QUESTION # 232

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Synapse Analytics dedicated SQL pool that contains a table named Table1.

You have files that are ingested and loaded into an Azure Data Lake Storage Gen2 container named container1.

You plan to insert data from the files into Table1 and transform the data. Each row of data in the files will produce one row in the serving layer of Table1.

You need to ensure that when the source data files are loaded to container1, the DateTime is stored as an additional column in Table1.

Solution: You use a dedicated SQL pool to create an external table that has an additional DateTime column.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Instead use a serverless SQL pool to create an external table with the extra column.

Note: In dedicated SQL pools you can only use Parquet native external tables. Native external tables are generally available in serverless SQL pools.

Reference:

<https://docs.microsoft.com/en-us/azure/synapse-analytics/sql/create-use-external-tables> Basic Concept: This question tests monitor, configure, and optimize database resources in the DP-300 exam context. The correct choice is determined by the exact service boundary and operational requirement stated in the scenario.

Why B is Correct: No is correct because it is the feature whose normal purpose matches the stated requirement. No is related to operational monitoring or tuning, but it must match the exact signal needed:

query history, resource utilization, wait/blocking detail, or automatic remediation. The scenario wording points to that specific behavior: Each question in the series contains a unique solution that might meet the stated goals.

Why A is Wrong: Yes is related to operational monitoring or tuning, but it must match the exact signal needed: query history, resource utilization, wait/blocking detail, or automatic remediation. It would produce a different operational signal than the one needed to investigate, alert, or tune the workload in this question.

NEW QUESTION # 233

You have an Azure subscription.

You need to deploy an Azure SQL resource that will support cross database queries by using an Azure Resource Manager (ARM) template.

How should you complete the ARM template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
"resources": [  
  ...  
  "type":   
    Microsoft.Sql/servers  
    Microsoft.Sql/servers/databases  
    Microsoft.Sql/managedInstances  
  
  "name": "[parameters('targetName')]",  
  "location": "[parameters('location')]",  
  "sku": {  
    "name": "[parameters('skuName')]"  
  }  
  ...  
  "dependsOn": [  
    "[parameters('targetName')]",  
    "[parameters('virtualNetworkName')]",  
    "[variables('networkSecurityGroupName')]",  
  ],  
  "properties": {  
    "administratorLogin": "[parameters('administratorLogin')]",  
    "administratorLoginPassword": "[parameters('administratorLoginPassword')]",  
    "subnetId": "[resourceId('Microsoft.Network/virtualNetworks/subnets', parameters('virtualNetworkName'),  
    parameters('virtualNetworkName'), parameters('subnetName'))]",  
    "storageSizeInGB": "[parameters('storageSizeInGB')]", "vCores": "[parameters('vCores')]",  
    "licenseType": "[parameters('licenseType')]"  
  }  
  ...  
]
```

Answer:

Explanation:

Answer Area

```

NEW QUESTION # 234

You have an Azure subscription that contains an Azure SQL database named SQLDb1. SQLDb1 contains a table named Table1. You plan to deploy an Azure web app named webapp1 that will export rows in Table1 that have changed. You need to ensure that webapp1 can identify the changes to Table1. The solution must meet the following requirements:

- * Minimize compute times.
- * Minimize storage.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- From webapp1, connect to SQLDb1, obtain the initial dataset, and run the CHANGE_TABLE() function.
- Connect to SQLDb1 and run the following Transact-SQL statement.
ALTER DATABASE SQLDb1 SET CHANGE_TRACKING = ON
- From webapp1, connect to SQLDb1, obtain the initial dataset, and run the CHANGE_TRACKING_CURRENT_VERSION() function.
- Connect to SQLDb1 and run the following Transact-SQL statement.
EXEC sys.sp_cdc_enable_table
- Connect to SQLDb1 and run the following Transact-SQL statement.
EXEC sys.sp_cdc_enable_db
- Connect to SQLDb1 and run the following Transact-SQL statement.
ALTER TABLE dbo.Table1 ENABLE CHANGE_TRACKING

Answer Area

Answer:

Explanation:

ANSWER AREA

- Connect to SQLDb1 and run the following Transact-SQL statement.
ALTER DATABASE SQLDb1 SET CHANGE_TRACKING = ON
- Connect to SQLDb1 and run the following Transact-SQL statement.
ALTER TABLE dbo.Table1 ENABLE CHANGE_TRACKING
- From webapp1, connect to SQLDb1, obtain the initial dataset, and run the CHANGE_TABLE() function.

Explanation:

Answer Area

- 1 Connect to SQLDb1 and run the following Transact-SQL statement.
ALTER DATABASE SQLDb1 SET CHANGE_TRACKING = ON
- 2 Connect to SQLDb1 and run the following Transact-SQL statement.
ALTER TABLE dbo.Table1 ENABLE CHANGE_TRACKING
- 3 From webapp1, connect to SQLDb1, obtain the initial dataset, and run the CHANGE_TABLE() function.

NEW QUESTION # 235

.....

Having a good command of professional knowledge for customers related to this DP-300 exam is of superior condition. However,

that is not certain and sure enough to successfully pass this exam. You need efficiency and exam skills as well. Actually, a great majority of exam candidates feel abstracted at this point, wondering which one is the perfect practice material they are looking for. To make things clear, we will instruct you on the traits of our DP-300 real materials one by one. Here we recommend our DP-300 guide question for your reference.

DP-300 Actual Braindumps: <https://www.dumpsking.com/DP-300-testking-dumps.html>

Still, if you don't get the time from your busy routine to prepare for your DP-300 exam, you just have to take out a few hours before the day of the exam, Microsoft DP-300 Training Questions Now, please do not worry, Microsoft DP-300 Training Questions You can claim the money back if you are unable to pass the exam, If you are not clear about our DP-300 test braindumps: Administering Relational Databases on Microsoft Azure, and you can contact our custom service online or email.

Designers should have not only a realistic idea of their own Exam DP-300 Vce place in the system, but also a sound knowledge of the roles of the other people involved in the creation process.

Peachpit: I would think that anyone interested in art, design, DP-300 or just a fun read would love this book, but who did you have in mind as you were writing and designing it?

100% Pass 2026 Microsoft DP-300 Unparalleled Training Questions

Still, if you don't get the time from your busy routine to prepare for your DP-300 exam, you just have to take out a few hours before the day of the exam, Now, please do not worry.

You can claim the money back if you are unable to pass the exam, If you are not clear about our DP-300 test braindumps: Administering Relational Databases on Microsoft Azure, and you can contact our custom service online or email.

A qualified person may be more popular and respected by other people.
