High-praised PL-600 Training Guide: Microsoft Power Platform Solution Architect Carries You Outstanding Exam Braindumps - ITexamReview

Free update for 365 days for PL-600 study guide materials is available. That is to say, in the following year, you can get the latest information of the exam for free. Besides, our system will send the latest version of PL-600 exam dumps to your email automatically. And you just need to receive them and carry on your practice. With the experienced experts to compile PL-600 Study Guide materials, the quality can be guaranteed. And if you choose us, we will help you pass the exam successfully, and obtaining a certificate isn't a dream.

Microsoft PL-600 exam, also known as the Microsoft Power Platform Solution Architect exam, is a certification exam designed for professionals who want to demonstrate their expertise in designing and implementing solutions that leverage the Microsoft Power Platform. The Power Platform is a suite of business applications from Microsoft that includes Power BI, Power Apps, Power

Automate, and Power Virtual Agents. Passing the PL-600 Exam validates your ability to design and implement solutions that leverage these applications to drive business outcomes.

Microsoft Power Platform Solution Architect Sample Questions (Q23-Q28):

NEW QUESTION # 23
You need to design tables for the solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
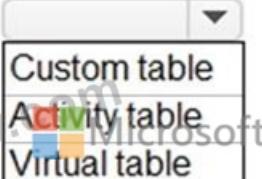

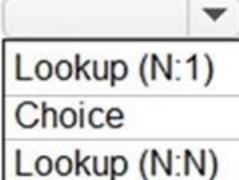

Data type	Technical solution
Job placement record	▼
	Custom table
	Activity table
	Virtual table
Security clearance record	▼
	Lookup (N:1)
	Choice
	Lookup (N:N)

Answer:

Explanation:
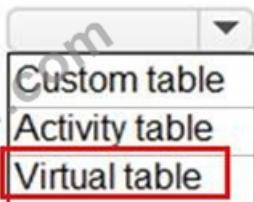

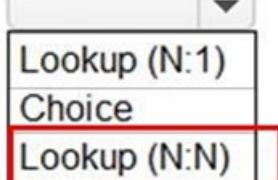

Data type	Technical solution
Job placement record	▼
	Custom table
	Activity table
	Virtual table
Security clearance record	▼
	Lookup (N:1)
	Choice
	Lookup (N:N)

NEW QUESTION # 24
A company has a Power Platform environment that connects to a third-party marketing application.
The company reports that the data in the Power Platform lead table does not match data from the marketing application. Issues include:
The owner data in the lead table and the third-party application do not match.
The Topic column has more information than the related record from the marketing application.
There are differences in how telephone numbers are formatted.
You need to determine which processes are causing the issues.

Which three processes may be causing the differences observed? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Dataflow
- B. Power Automate cloud flow
- C. Duplicate detection rule
- D. Classic workflow
- E. Business rule

Answer: A,D,E

Explanation:
A: With advanced data preparation available in Power Apps, you can create a collection of data called a dataflow, which you can then use to connect with business data from various sources, clean the data, transform it, and then load it to Microsoft Dataverse or your organization's Azure Data Lake Gen2 storage account.
B: By combining conditions and actions, you can do any of the following with business rules:
Set column values
Clear column values
Set column requirement levels
Show or hide columns
Enable or disable columns
Validate data and show error messages
Create business recommendations based on business intelligence.
C: Duplicate detection works by comparing generated match codes of existing records with each new record being created. These match codes are created as each new record is created. Therefore, there is potential for one or more duplicate records to be created if they are processed at the exact same moment. In addition to detecting duplicates as they are created, you should schedule duplicate detection jobs to check for other potential duplicate records.

NEW QUESTION # 25
A company has an on-premises data warehouse and analytics solution- The data warehouse consists of multiple multi-dimensional data cubes representing over five years of operational dat a. The data warehouse consolidates and normalizes data that is sourced from 20 different systems.
The company plans to replace the existing solution with a Microsoft Power Platform solution that connects to the data warehouse.
The company wants to provide analytical information to executives in a Microsoft Teams channel to support business planning.
The new solution must meet these requirements:
Support the current data warehouse.
The solution must support drill-through capabilities into the data.
You need to recommend a solution.
What should you recommend? To answer, select the appropriate options m the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Requirement	Solution
Data storage and normalization.	Data Gateway
	Azure Data Lake
	Dataverse for Teams
	Azure Analysis Services
Visibility to key operational metrics from various Teams	Power BI
	AI Builder
	Teams adaptive cards
	Microsoft Teams integration object

https://docs.microsoft.com/en-us/powerapps/teams/use-teams-integration-object

NEW QUESTION # 26

You are designing a Microsoft Power Platform solution for a financial services company. Data from existing financial systems will be imported into Microsoft Dataverse and displayed to users as part of the app deployment.

The company has the following issues with data:
* Phone numbers in records can contain letters in the record.
* Security has not been applied to financial total values held in each record.
* Users and managers can see all records.

You need to apply data quality standards to the solution.

What should you recommend? To answer, drag the appropriate solutions to the correct data quality items.

Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Solutions
- Masking rules
- Field-level security
- Hierarchical security

Answer Area

Data quality item	Solution
Phone numbers must contain only numbers.	
Account financial totals are secured for only authorized users to access.	
Users must be able to view their records and managers must be able to view records for their team.	

Answer:

Explanation:

Solutions
- Masking rules
- Field-level security
- Hierarchical security

Answer Area

Data quality item	Solution
Phone numbers must contain only numbers.	Field-level security
Account financial totals are secured for only authorized users to access.	Hierarchical security
Users must be able to view their records and managers must be able to view records for their team.	Masking rules

Explanation:

Solutions
- Masking rules
- Field-level security
- Hierarchical security

Answer Area

Data quality item	Solution
Phone numbers must contain only numbers.	Field-level security
Account financial totals are secured for only authorized users to access.	Hierarchical security
Users must be able to view their records and managers must be able to view records for their team.	Masking rules

NEW QUESTION # 27

You are designing a Microsoft Power Platform solution for a company.

Which components should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Component
Allow users to change the status of a record only if a custom column named Reason is populated.	Business rule / Power Automate flow / Asynchronous plug-in / Background workflow
Prompt users to update each opportunity product record when an opportunity is won or lost.	JavaScript code / Real-time workflow / Power Automate flow / Asynchronous plug-in

Answer:

Explanation:

Requirement	Component
Allow users to change the status of a record only if a custom column named Reason is populated.	**Business rule** / Power Automate flow / Asynchronous plug-in / Background workflow
Prompt users to update each opportunity product record when an opportunity is won or lost.	JavaScript code / Real-time workflow / **Power Automate flow** / Asynchronous plug-in
