

# Valid 1Z0-1163-1 pdf vce & Oracle 1Z0-1163-1 test answers & 1Z0-1163-1 troytec exams

With our 1Z0-1163-1 test prep, you don't have to worry about the complexity and tediousness of the operation. As long as you enter the learning interface of our soft test engine of 1Z0-1163-1 quiz guide and start practicing on our Windows software, you will find that there are many small buttons that are designed to better assist you in your learning. When you want to correct the answer after you finish learning, the correct answer for our 1Z0-1163-1 test prep is below each question, and you can correct it based on the answer. In addition, we design small buttons, which can also show or hide the 1Z0-1163-1 Exam Torrent, and you can flexibly and freely choose these two modes according to your habit. In short, you will find the convenience and practicality of our 1Z0-1163-1 quiz guide in the process of learning. We will also continue to innovate and improve functions to provide you with better services.

## Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.</li> </ul>

## Reliable 1Z0-1163-1 Exam Prep | 1Z0-1163-1 Latest Exam Labs

The Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) is available in three easy-to-use forms. The first one is 1Z0-1163-1 dumps PDF format. It is printable and portable. You can print 1Z0-1163-1 questions PDF or access them via your smartphones, tablets, and laptops. The PDF format can be used anywhere and is essential for students who like to learn on the go.

## Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q17-Q22):

### NEW QUESTION # 17

What is a key benefit of Supplier Qualification Management in Oracle Fusion Cloud SCM?

- A. It assesses and approves suppliers based on compliance and performance criteria.
- B. It only tracks supplier payments.
- C. It eliminates supplier performance reviews.

**Answer: A**

Explanation:

Supplier Qualification Management in Oracle Fusion Cloud SCM evaluates and approves suppliers based on predefined compliance and performance criteria, ensuring reliable partnerships. Option A is incorrect as it focuses on payments, not qualification. Option C is wrong-performance reviews are integral to the process. This benefit mitigates risks and ensures quality suppliers.

### NEW QUESTION # 18

Which feature in Oracle Fusion Cloud SCM ensures product availability commitments based on inventory and supply constraints?

- A. Supplier Portal.
- B. Manufacturing Execution.
- C. Cost Accounting.
- D. Available to Promise (ATP).

**Answer: D**

Explanation:

Available to Promise (ATP) (C) in Oracle Fusion Cloud SCM ensures product availability commitments by calculating how much

inventory is available for new orders based on current stock and supply constraints like production schedules and supplier lead times. For example, if 100 units are on hand with 40 committed, ATP shows 60 units available, ensuring accurate promises. Option A (Cost Accounting) tracks financials, not availability. Option B (Supplier Portal) supports collaboration, not direct commitment calculations. Option D (Manufacturing Execution) manages production, not order promising. ATP's real-time analysis prevents overpromising, aligning customer expectations with operational capacity.

#### NEW QUESTION # 19

Which feature in Oracle Fusion Cloud SCM tracks and manages real-time production processes?

- A. Inventory Management.
- **B. Manufacturing Execution.**
- C. Supplier Qualification.
- D. Cost Accounting.

**Answer: B**

Explanation:

Manufacturing Execution (C) in Oracle Fusion Cloud SCM tracks and manages real-time production processes on the shop floor, capturing data like work order progress, material usage, and labor hours. For example, if a worker completes 100 units, the system logs the time, resources consumed (e.g., 50 kg of steel), and any delays (e.g., machine downtime), providing live visibility. Option A (Supplier Qualification) evaluates suppliers, not production. Option B (Cost Accounting) analyzes costs post-production, not real-time processes. Option D (Inventory Management) tracks stock, not manufacturing activities. This feature ensures production aligns with schedules, identifies bottlenecks instantly, and feeds data into cost and quality systems, enhancing operational control.

#### NEW QUESTION # 20

Which activity is fundamental to the Insight to Sourcing OMBP, ensuring effective procurement and cost optimization?

- **A. Spend Analysis, which involves categorizing and analyzing historical spending data to identify cost-saving opportunities and strategic sourcing decisions.**
- B. Idea Generation, which identifies market opportunities, incorporating trend analysis and internal innovation.
- C. Performance Monitoring, which assesses supplier ability to meet quality and service standards by utilizing audits, inspections, or performance reviews.

**Answer: A**

Explanation:

Spend Analysis (B) is the cornerstone of the Insight to Sourcing OMBP in Oracle Fusion Cloud SCM, as it involves categorizing and analyzing historical spending data to uncover cost-saving opportunities and inform strategic sourcing decisions. By examining past expenditures-e.g., identifying that 70% of spending on raw materials comes from a single supplier-businesses can negotiate better terms, consolidate suppliers, or shift to lower-cost alternatives, optimizing procurement costs. Option A (Idea Generation) is a preliminary step focused on innovation and market trends, not the core analytical activity driving sourcing. Option C (Performance Monitoring) evaluates supplier performance post-sourcing, not the initial insight process. For instance, Spend Analysis might reveal excessive spending on expedited shipping, prompting a shift to local suppliers, directly impacting cost efficiency and procurement strategy. This data-driven approach ensures decisions are grounded in financial reality, making it fundamental to the OMBP.

#### NEW QUESTION # 21

What is a primary function of Cost Accounting in Oracle Fusion Cloud SCM?

- **A. It tracks and analyzes manufacturing costs to support financial reporting and decision-making.**
- B. It prevents any fluctuations in material costs.
- C. It records only customer payments, excluding supplier invoices.

**Answer: A**

Explanation:

Cost Accounting in Oracle Fusion Cloud SCM is designed to track and analyze costs associated with manufacturing processes, including material, labor, and overhead expenses. This function supports financial reporting by providing detailed cost data and aids decision-making by offering insights into cost drivers and profitability. Option A is incorrect because cost accounting does not

- [illegible]
