

C_SEC_2405試題 & C_SEC_2405考試證照

如果你想在短時間內，以最小的努力，達到最有效果的結果SAP的C_SEC_2405考試準備，你可以使用Fast2test SAP的C_SEC_2405考試培訓資料，Fast2test的培訓資料是通過實踐檢驗了的，也是通過眾多考生證明了它確實可以百分百通過考試，利用了它，你將達到你的目的，得到最佳的效果。

SAP C_SEC_2405 考試大綱：

主題	簡介
主題 1	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.
主題 2	• User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.
主題 3	• Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.
主題 4	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.

高質量的C_SEC_2405試題和資格考試中的領導者和完整覆盖的SAP SAP Certified Associate - Security Administrator

作為SAP行業的一員，你有在為通過一些C_SEC_2405認證考試而頭痛嗎。C_SEC_2405認證你考試一般都是為了檢驗考生的相關專業知識和經驗的考試，不是很容易通過的。對於第一次參加SAP認證考試的考生來說，選擇一

個好的具有針對性的培訓方案是很有必要的。Fast2test能為很多參加C_SEC_2405認證考試的考生提供具有針對性的培訓方案，包括考試之前的模擬測試，針對性教學課程，和與真實考試有95%相似性的練習題及答案。快將我們Fast2test加入你的購物車吧。

最新的 SAP Certified Associate C_SEC_2405 免費考試真題 (Q56-Q61):

問題 #56

In the administration console of the Cloud Identity Services, which authentication providers are available?

Note: There are 2 correct answers to this question.

- A. Ariba
- B. Fieldglass
- C. Successfactors
- D. Concur

答案: A,C

解題說明:

The administration console of SAP Cloud Identity Services supports integration with specific authentication providers to enable secure user authentication. SAP SuccessFactors and SAP Ariba are available as authentication providers, allowing seamless single sign-on (SSO) and identity management for users accessing these SAP solutions. These providers are integrated to leverage their identity data for authentication within the SAP ecosystem, enhancing security and user experience. In contrast, SAP Concur and SAP Fieldglass are not supported as authentication providers in the Cloud Identity Services administration console, as they primarily focus on expense management and workforce management, respectively, and do not serve as identity providers in this context.

問題 #57

Which archiving objects are relevant for archiving change documents for user master records? Note: There are 2 correct answers to this question.

- A. US_AUTH
- B. US_PASS
- C. US_PROF
- D. US_USER

答案: A,D

解題說明:

* Context: Archiving change documents for user master records ensures compliance and reduces database size.

* Solution Explanation:

* US_USER: Relevant for changes to user master data.

* US_AUTH: Pertains to changes in user authorization assignments.

問題 #58

Which of the following can you use to check if there is an application start lock on an application contained in a PFCG role? Note: There are 2 correct answers to this question.

- A. Transaction SUIM - Executable Transactions report
- B. Transaction SM01_CUS
- C. Transaction SUIM - Transactions Executable with Profile report
- D. Transaction SM01_DEV

答案: A,C

解題說明:

To check if there is an application start lock on an application within a PFCG role, the SUIM (System User Information System) reports "Executable Transactions report" and "Transactions Executable with Profile report" are used. The Executable Transactions

report (transaction SUIM) identifies transactions within a role and can indicate if any are locked, preventing their execution, by cross-referencing with system lock settings.

The Transactions Executable with Profile report analyzes transactions executable via a role's profile, highlighting any locked transactions that would block application starts. These reports provide detailed insights into role-based access and lock status, ensuring administrators can verify application availability.

Transaction SM01_CUS is used for locking transactions system-wide, not for checking role-specific locks, and SM01_DEV is not a standard SAP transaction for this purpose. By leveraging SUIM reports, administrators can efficiently manage and troubleshoot application access, ensuring that PFCG roles align with security requirements and that locked applications do not disrupt business processes.

問題 #59

If you want to evaluate catalog menu entries and authorization default values of IWSG and IWSV applications, which SUIM reports would you use? Note: There are 2 correct answers to this question.

- A. Roles By Authorization Object
- **B. Search Applications in Roles**
- **C. Search Startable Applications in Roles**
- D. Roles By Transaction Assignment in Menu

答案： B,C

解題說明：

To evaluate catalog menu entries and authorization default values for IWSG and IWSV applications, use the following SUIM reports:

* Search Startable Applications in Roles (A):

* Lists applications that can be started within a role, aiding in evaluating role scope.

* Search Applications in Roles (B):

* Provides insights into which applications are available in specific roles, helping ensure proper authorization configuration.

問題 #60

What does SAP recommend you do when you transport a custom leading business role in SAP S/4HANA Cloud Public Edition?

- A. Add all other leading business roles from the same Line of Business as dependencies to the Software Collection.
- B. Add the pre-delivered business role that was used as a template to create the custom leading business role to the Software Collection.
- **C. Add all derived business roles as dependencies to the Software Collection.**

答案： C

解題說明：

When transporting a custom leading business role in SAP S/4HANA Cloud Public Edition, SAP recommends adding all derived business roles as dependencies to the Software Collection. This ensures that the entire role hierarchy, including the leading role and its derived roles, is transported consistently to the target system, maintaining the intended authorization structure. Derived roles inherit specific attributes and restrictions from the leading role, and including them in the Software Collection prevents issues such as missing authorizations or broken dependencies in the target environment. Adding the pre-delivered business role used as a template or other leading roles from the same Line of Business is not necessary, as these are either SAP-standard roles already available in the target system or unrelated to the custom role's transport. This approach streamlines the transport process and ensures operational continuity.
