TestkingPass Citrix 1Y0-204 Exam Questions are Ready for Quick Download

Under the dominance of knowledge-based economy, we should keep pace with the changeable world and renew our knowledge in pursuit of a decent job and higher standard of life. In this circumstance, possessing a 1Y0-204 certification in your pocket can totally increase your competitive advantage in the labor market and make yourself distinguished from other job-seekers. Therefore our 1Y0-204 Study Guide can help you with dedication to realize your dream. And only after studying with our 1Y0-204 exam questions for 20 to 30 hours, you will be able to pass the 1Y0-204 exam.

Citrix 1Y0-204 certification exam is designed for IT professionals who want to validate their skills and knowledge related to Citrix Virtual Apps and Desktops 7 Administration. Citrix Virtual Apps and Desktops 7 Administration certification is ideal for professionals seeking to demonstrate their expertise in managing Citrix Virtual Apps and Desktops 7 environments. 1Y0-204 Exam evaluates the candidate's ability to design, deploy, and manage Citrix Virtual Apps and Desktops 7 solutions.

Citrix Virtual Apps and Desktops 7 Administration Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which Front-End Optimization (FEO) action can a Citrix Administrator use to achieve the results shown in the screenshots?
Click the Exhibit button to view the screenshots.

- A. **Inline CSS**
- B. Move CSS to head
- C. Truncate CSS
- D. Rearrange CSS

Answer: A

NEW QUESTION # 60

Which scenario will cause automatic high availability (HA) synchronization to fail?

- A. Manually forced synchronization
- B. **Different build versions**
- C. A configuration change to the primary Citrix ADC
- D. A force failover

Answer: B

Explanation:

Automatic HA synchronization will fail if the primary and secondary Citrix ADCs have different build versions. The build versions must be the same for the configuration to be synchronized. A manual synchronization, a configuration change to the primary Citrix ADC, or a force failover will not affect the automatic HA synchronization.

NEW QUESTION # 61

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a large number of Windows users running various locally attached client printers. No network printers are being used. The administrator has enabled the HDX printer mapping policy to 'Auto-create all client printers', which has resulted in a large number of drivers being loaded onto the Virtual Delivery Agent (VDA) machines. New standards are requiring the administrator to limit these Windows drivers on the VDA machines. Which printing feature can the administrator enable to meet the new standards?

- A. The Auto-create PDF universal printer policy
- B. **The Citrix Universal Print Server**
- C. The Auto-create local (non-network) client printers only policy
- D. The Citrix Universal Printer Driver

Answer: B

Explanation:

The Citrix Universal Print Server provides universal printing support for network printers. The Universal Print Server uses the Universal print driver, a single driver on the Multi-session OS machine that allows local or network printing from any device, including thin clients and tablets.

This feature can help reduce the number of Windows drivers on the VDA machines by using a single driver for all network printers.

NEW QUESTION # 62

Scenario: The Director of network security in a financial organization wants to protect the enterprise network from any external malware threats. To do this, the director needs to gain visibility into otherwise-bypassed traffic and control access to malicious web

sites. The director is required to do the following:

- * Intercept and examine all the traffic, including SSL/TLS (encrypted traffic), coming in, and going out of the enterprise network.
- * Block access to URLs identified as serving harmful or insecure content.
- * Identify users (employees) in the enterprise who are accessing malicious websites.

Which Citrix ADC deployment mode should a Citrix Administrator use to achieve this requirement?

- A. Citrix Gateway
- **B. Citrix Secure Web Gateway**
- C. Access Gateway
- D. Default Gateway

Answer: B

NEW QUESTION # 63

Scenario: A Citrix Administrator wants to add machines to a Delivery Group. The administrator has two machine catalogs containing unallocated machines. On the screen to choose machines from machine catalogs, the administrator can see that only one machine catalog is available.

A possible cause of this issue is that the machines in the unavailable machine catalog are _____. (Choose the correct option to complete the sentence.)

- A. provisioned with another provisioning method
- **B. different OS types**
- C. unregistered
- D. turned off

Answer: B

Explanation:

The Citrix documentation states that if a machine catalog is not available when adding machines to a Delivery Group, a possible cause is that the machines in the unavailable machine catalog are of different OS types.
