Salesforce AP-207 practice test software can be used on devices that range from mobile devices to desktop computers.

Salesforce Energy and Utilities Cloud Accredited Professional Sample Questions (Q23-Q28):

NEW QUESTION # 23

A company's energy and utilities org uses Permission Set Licenses What are the two methods to control users access to features and functionality?

- A. Managed Package Licenses
- B. Permission Sets
- C. Sharing Settings
- D. Permission Set Groups

Answer: B,D

Explanation:

In Salesforce Energy and Utilities Cloud, as well as across the Salesforce platform, controlling user access to features and functionality can be effectively managed using Permission Sets and Permission Set Groups.

Permission Sets are collections of settings and permissions that grant access to various tools and functions within Salesforce. They can be used to extend users' access rights without altering their primary profile.

Permission Set Groups are a way to organize Permission Sets, making it easier to assign and manage access for users. They allow administrators to bundle multiple Permission Sets into a single assignment, streamlining the process of granting necessary permissions to users. These tools are essential for tailoring access controls to meet the specific needs of an organization and ensuring that users have the appropriate level of access to perform their roles. Reference = Salesforce documentation provides detailed information on managing user access with Permission Sets and Permission Set Groups, emphasizing their importance in configuring secure and functional access controls within the Salesforce platform: https://help.salesforce.com/articleView?id=perm_sets_overview.htm&type=5

NEW QUESTION # 24

A customer has recently installed Energy and Utilities Cloud Which specific license enables an energy company's partners to access applications via a web portal?

- A. Energy and Utilities Base for Digital Experience Partner
- B. Energy and Utilities Base Service
- C. Energy and Utilities Cloud for Digital Experience User
- D. Energy and Utilities Base

Answer: A

Explanation:

The Energy and Utilities Cloud by Salesforce enables energy companies to connect with their partners through dedicated licenses that cater to digital experiences. The "Energy and Utilities Base for Digital Experience Partner" license is specifically designed for partner users who need access to applications via a web portal. This license type provides the necessary access rights and functionalities tailored for partners, ensuring they can efficiently use the Energy and Utilities Cloud's resources in a collaborative environment tailored to the unique needs of energy sector partnerships.

Reference = The details about licensing and partner access can be found under the Salesforce Energy and Utilities Cloud documentation, specifically in the sections discussing user licensing and partner portal configurations. More comprehensive information is available on Salesforce's official resources and documentation regarding the Energy and Utilities Cloud product, focusing on configuration and user license management.

NEW QUESTION # 25

An energy company was onboarded on Energy and Utilities Cloud. They want to see how many Energy and Utilities Cloud licenses are assigned.

What's the most effective way to check for the number of their assigned Energy and Utilities Cloud licenses?

- A. Go to Setup -> installed Packages -> Vlocity CMT to see the Energy and Utilities Cloud license information.
- B. Execute a SOQL query to retrieve the license count
- C. Call Salesforce Support to get the Energy and Utilities Cloud information.
- D. Go to Setup -> Company Information -> Permission Set Licenses.

Answer: D

Explanation:

The most effective way to check for the number of assigned Salesforce Energy and Utilities Cloud licenses is through the Salesforce Setup menu. By navigating to Setup, then to Company Information, and looking at the Permission Set Licenses section, administrators can quickly view the number of licenses assigned and available for various Salesforce products, including Energy and Utilities Cloud. This method provides a straightforward and accessible means of license management within the Salesforce environment. Reference = Salesforce's official documentation on managing licenses, including viewing assigned licenses through the Company Information section, provides comprehensive guidance: https://help.salesforce.com/articleView?id=users_license_types_available.htm

NEW QUESTION # 26

What tool should be used to migrate configurations from sandbox to production when a customer has completed configuring

OmniStudio components?

- A. DataLoader.io
- **B. OmniStudio DataPacks**
- C. Salesforce Export Wizard
- D. IDX Workbench

Answer: B

Explanation:

When migrating configurations, especially those related to OmniStudio components from a sandbox to production environment in Salesforce, OmniStudio DataPacks are the recommended tool. OmniStudio DataPacks, part of the Salesforce DevOps toolkit, allow for the bundling and deployment of complex configurations and metadata associated with OmniStudio components. This tool is specifically designed to handle the intricate dependencies and settings of OmniStudio components, ensuring a seamless and error-free migration process. Reference = Salesforce documentation on OmniStudio deployment and migration strategies emphasizes the use of OmniStudio DataPacks for effective configuration migrations. This is outlined in the Salesforce OmniStudio Developer Guide, which provides detailed instructions on using DataPacks for deploying OmniStudio solutions:
<https://developer.salesforce.com/docs/atlas.en-us.omnistudio.meta/omnistudio/>

NEW QUESTION # 27

An energy company is implementing Energy and Utilities Cloud for its service center agents.

Which two of the following business processes should be part of their test scenarios?

Choose 2 answers

- **A. Set up a payment arrangement.**
- B. Manage changes to contract clauses.
- **C. Manage a customer moving out.**
- D. Create a multi-site quote.

Answer: A,C
