We constantly updated the Sharing-and-Visibility-Architect Exam Materials at the same time with the exam update. We try our best to ensure 100% pass rate for you.

### Salesforce Certified Sharing and Visibility Architect Sample Questions (Q74-Q79):

#### NEW QUESTION # 74

Universal Containers (UC) has a custom Apex class that enforces a business process and updates opportunities. UC has noticed that fields with Field-Level Security permission of Read-Only on certain users' profiles are being updated by this class. How should the architect fix this problem?

- A. Put the code in an inner class that uses the With Sharing keyword.
- **B. Use the IsUpdateable() Apex method to test each field prior to allowing update.**
- C. Add the With Sharing keyword to the class.

**Answer: B**

#### NEW QUESTION # 75

Universal Computers (UC) is looking to expand its delivery capabilities through a network of distributors that use a Partner Community license. UC employees currently can view all delivery records through the organization-wide default (OWD) setting of Public Read Only.

Which approach would an architect recommend to limit the records a distributor can see?

- A. Create a criteria-based sharing rule to grant access to the distributor
- B. Create an ownership-based sharing rule to grant access to the distributor.
- **C. Set the External OWD to Private for the Delivery object.**
- D. Remove Read permission from the distributor profile.

**Answer: C**

#### NEW QUESTION # 76

Universal Containers maintains Job information in a Custom Object that contains sensitive information. The only users who should be able to view and edit Job records are the user who owns the record and all users in the Delivery profile. Which three platform sharing tools are required to support the above requirements?

Choose 3 answers.

- **A. "Modify All" permission for Job Object on the Delivery Profile.**
- **B. Grant access Using Hierarchy sharing setting on the Job Object set to false.**
- C. "View All Data" profile permission on the Delivery Profile.
- D. Criteria-Based sharing rule for the Delivery Profile on the Job Object.
- **E. Organization-Wide Default sharing setting of Private on the Job Object.**

**Answer: A,B,E**

Explanation:

Explanation

To support the requirement of allowing only the owner and users in the Delivery profile to view and edit Job records, you need to use three platform sharing tools:

Organization-Wide Default sharing setting of Private on the Job Object: This will restrict access to Job records to only the owner by default.

Grant access Using Hierarchy sharing setting on the Job Object set to false: This will prevent users above the owner in the role hierarchy from accessing Job records.

"Modify All" permission for Job Object on the Delivery Profile: This will grant users in the Delivery profile full access to all Job records regardless of ownership.

Criteria-Based sharing rule and "View All Data" profile permission are not required for this scenario.

Criteria-Based sharing rule would grant additional access to users who meet certain criteria, which is not necessary. "View All Data" profile permission would grant access to all data in the organization, which is too broad and may violate data security.

#### NEW QUESTION # 77

Universal Containers has Public Read Only sharing settings on the Opportunity object. What Opportunity access options can the user see while adding account team members to the Account?

- A. Private
- **B. Read Only and Read/Write**
- C. Read Only
- D. Private and Read Only

**Answer: B**

Explanation:

Explanation

When adding account team members to an account, the user can see the opportunity access options that are equal to or less than the organization-wide default access level for the opportunity object. Since the organization-wide default access level for the opportunity object is Public Read Only, the user can see Read Only and Read/Write options. Private and Private and Read Only are not valid options.

#### NEW QUESTION # 78

Universal Containers (UC) is implementing Sales Cloud. During the last quarter of the financial of the financial year, they requested a solution in Salesforce to allow them to specify an assistance agent on the opportunity. the assistance fields. The system should automatically remove access from the previous assistant and ..

What is the optimum solution to meet the requirements?

- **A. Use opportunity team and create an assistant field, use apex to share opportunities with the assistant**
- B. Use apex sharing to share and unicast opportunities with the assistant agent.
- C. Use share group to share opportunities with the assistant agent.
- D. Use sharing rule to share opportunities with the assistant agent.

**Answer: A**

Explanation:

Explanation

Using opportunity team and creating an assistant field, using Apex to share opportunities with the assistant agent is the optimum solution to meet the requirements. Opportunity teams are groups of users who work together on sales opportunities. By creating an assistant field on the opportunity object, the sales reps can specify an assistant agent who can help them with their deals. By using Apex, the system can automatically share the opportunity with the assistant agent based on the value of the assistant field, and remove access from the previous assistant if the field value changes. Option A is incorrect, since using share group to share opportunities with the assistant agent would require manual configuration and maintenance. Option C is incorrect, since using sharing rule to share opportunities with the assistant agent would not allow dynamic sharing based on the assistant field value. Option D is incorrect, since using Apex sharing to share and unshare opportunities with the assistant agent would be similar to option B, but without using opportunity teams.

#### NEW QUESTION # 79

.....

We boost the expert team to specialize in the research and production of the Sharing-and-Visibility-Architect guide questions and professional personnel to be responsible for the update of the study materials.
