## Reliable FCP\_FSM\_AN-7.2 Exam Review, Reliable FCP\_FSM\_AN-7.2 Exam Online

When dealing with any kind of exams, the most important thing is to find a scientific way to review effectively. Our FCP\_FSM\_AN-7.2 practice materials compiled by the most professional experts. Till now, we have over tens of thousands of customers around the

world supporting our FCP\_FSM\_AN-7.2 exam torrent. If you are unfamiliar with our FCP\_FSM\_AN-7.2 Study Materials, please download the free demos for your reference. To some unlearned exam candidates, you can master necessities by our FCP\_FSM\_AN-7.2 practice materials quickly So our materials are elemental materials you cannot miss.

## Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q19-Q24):

### NEW QUESTION # 19

How does FortiSIEM update the incident table if a performance rule triggers repeatedly?

- A. FortiSIEM updates the Incident Count value and Last Seen timestamp.
- B. FortiSIEM generates a new incident based on the Rule Frequency value, and updates the First Seen and Last Seen timestamps.
- C. FortiSIEM generates a new incident each time the rule triggers, and updates the First Seen and Last Seen timestamps.
- D. FortiSIEM changes the incident status to Repeated, and updates the Last Seen timestamp.

Answer: A

Explanation:

When a performance rule triggers repeatedly, FortiSIEM updates the existing incident by incrementing the Incident Count and refreshing the Last Seen timestamp. This avoids flooding the incident table with duplicates while still tracking repeated occurrences.

### NEW QUESTION # 20

Refer to the exhibit.

Analytics Search

The screenshot shows the Fortinet Analytics Search interface. At the top, there's a 'Filter By' section with tabs for 'Event Keywords', 'Event Attribute' (selected), and 'CMDB Attribute'. Below this is a table for building the search query. The table has columns: 'Paren', 'Attribute', 'Operator', 'Value', 'Paren', 'Next', and 'Row'. The first row shows a minus sign in the 'Paren' column, a plus sign in the 'Attribute' column, the attribute 'User', the operator 'IN', and the value 'Device IP: Server Inventory'. The second row shows a minus sign in the 'Paren' column, a plus sign in the 'Attribute' column, the attribute 'Event Type', the operator 'IN', and the value 'Group: Logon Failure'. To the right of the 'Value' column, there are buttons for 'AND' and 'OR' to combine the conditions. Below the table, there's a 'Time Range' section with tabs for 'Real-time', 'Relative' (selected), and 'Absolute'. Under 'Relative', there's a 'Last' button, a text input with '10', and a 'Days' dropdown menu. At the top right of the interface, there are buttons for 'Clear All', 'Load', and 'Save'. A large watermark 'verifiedumps.com' is visible across the center of the screenshot.

The analyst is troubleshooting the analytics query shown in the exhibit.

Why is this search not producing any results?

- A. The Time Range is set incorrectly.
- B. You cannot reference User and Event Type attributes in the same search.
- C. The inner and outer nested query attribute types do not match.
- D. The Boolean operator is wrong between the attributes.

Answer: C

Explanation:

The issue is that the "User" attribute is incorrectly assigned a Device IP group value, which is a mismatch of attribute types. "User" expects a user name or identity, not a device IP group. This mismatch between the attribute type and the provided value causes the search to return no results.

### NEW QUESTION # 21

What are two required components of a rule? (Choose two.)

- A. Clear policy
- B. Exception policy
- C. Subpattern
- D. Detection Technology

Answer: C,D

Explanation:

A Subpattern defines the specific conditions or event patterns the rule is designed to detect, and the Detection Technology specifies the type of detection logic (e.g., real-time, historical). Both are essential for a rule to function in FortiSIEM.

## NEW QUESTION # 22

Refer to the exhibit.

### Incident Details

The screenshot displays the 'Incident Details' page in FortiSIEM. At the top, the incident title is 'Server Disk Latency C:\ Critical on THREATSOCDC'. Below the title is a search bar and a row of icons for information, lock, delete, refresh, and actions. The main content area lists various incident details: Incident ID (3984), Incident Title, Rule Name (Server Disk Latency Critical), Event Type (PH\_RULE\_SERVER\_DISK\_LATENCY\_CRIT), Severity Category (High), First Occurred (33 Minutes ago), Last Occurred (33 Minutes ago), Category (Performance), Subcategory (Impact), Tactics (Impact), Technique (Endpoint Denial of Service: OS Exhaustion Flood), Organization (Super), Reporting (30 WIN-RAQBSNW8OVY), Reporting IP (30 10.1.1.33), Reporting Device Status (Pending), Target (30 10.1.1.33 THREATSOCDC), Detail (Disk Name: C:\, Disk Read Latency ms: 100.03ms, Disk Write Latency ms: 1ms), Count (1), Incident Status (Auto Cleared), Cleared Reason (Rule has not been triggered for 20 minutes), and Cleared Time (13 Minutes ago). A large 'verified dumps.com' watermark is visible across the center of the page.

Server Disk Latency C:\ Critical on THREATSOCDC

Search...

Incident ID : 3984

Incident Title : Server Disk Latency C:\ Critical on THREATSOCDC

Rule Name : Server Disk Latency Critical

Event Type : PH\_RULE\_SERVER\_DISK\_LATENCY\_CRIT

Severity Category : High

First Occurred : 33 Minutes ago (Jan 15 2025, 08:07:15 AM)

Last Occurred : 33 Minutes ago (Jan 15 2025, 08:07:15 AM)

Category : Performance

Subcategory : Impact

Tactics : Impact

Technique : Endpoint Denial of Service: OS Exhaustion Flood

Organization : Super

Reporting : 30 WIN-RAQBSNW8OVY

Reporting IP : 30 10.1.1.33

Reporting Device Status : Pending

Target : 30 10.1.1.33  
THREATSOCDC

Detail : Disk Name: C:\  
Disk Read Latency ms: 100.03ms  
Disk Write Latency ms: 1ms

Count : 1

Incident Status : Auto Cleared

Cleared Reason : Rule has not been triggered for 20 minutes

Cleared Time : 13 Minutes ago (Jan 15 2025, 08:27:17 AM)

How was this incident cleared?

- A. The incident was cleared automatically by the rule.
- B. FortiSIEM cleared the incident automatically after 24 hours.
- C. The endpoint was rebooted and sent an all-clear signal to FortiSIEM.
- D. The analyst manually cleared the incident from the incident table.

Answer: A

Explanation:

The Incident Status shows "Auto Cleared", and the Cleared Reason states: "Rule has not been triggered for 20 minutes." This

indicates that the incident was automatically cleared by the rule logic after a defined period of inactivity.

### NEW QUESTION # 23

Which statement about thresholds is true?

- A. FortiSIEM uses only device thresholds for security metrics.
- B. FortiSIEM uses fixed, hardcoded global and device thresholds for all performance metrics.
- C. FortiSIEM uses only global thresholds for performance metrics.
- **D. FortiSIEM uses global and per device thresholds for performance metrics.**

**Answer: D**

Explanation:

FortiSIEM evaluates performance metrics against both global thresholds, which apply system-wide, and per-device thresholds, which can be customized for individual devices. This dual approach allows flexibility in monitoring while ensuring consistent baseline alerting.

### NEW QUESTION # 24

.....

Are you concerned for the training material for FCP\_FSM\_AN-7.2 certification exam? So, your search is ended as you have got to the place where you can catch the finest FCP\_FSM\_AN-7.2 certification exam dumps. Those entire applicants who put efforts in FCP\_FSM\_AN-7.2 certification exam want to achieve their goal, but there are diverse means of preparing FCP\_FSM\_AN-7.2 Exams. Everyone might have their own approach to discover, how to associate FCP\_FSM\_AN-7.2 certified professional. It really doesn't matter how you concoct for the FCP\_FSM\_AN-7.2 certification exam, you'd need some provision to make things calmer.
