

SAP C-S4CPB-2502인기자격증 - C-S4CPB-2502높은통과율덤프공부문제

Career Benefits & Industry Demand

SAP C_S4CPB_2202 Certification

Enhanced Credibility

Certification offers formal recognition from SAP, making you stand out in a competitive job market

Industry Recognition

Employers highly value certified professionals for their verified skills in implementing cutting-edge cloud solutions

Higher Earning Potential

Certified professionals typically command higher salaries, reflecting their specialized skill set

Market Demand

With businesses investing massively in digital transformation and cloud ERP systems, there is an ever-increasing demand for professionals who can deliver and manage these solutions

완벽한 C-S4CPB-2502인기자격증 덤프문제

Pass4Test의SAP인증 C-S4CPB-2502덤프는 인터넷에서 검색되는SAP인증 C-S4CPB-2502시험공부자료중 가장 출중한 시험준비 자료입니다. SAP인증 C-S4CPB-2502덤프를 공부하면 시험패스는 물론이고 IT지식을 더 많이 쌓을 수 있어 일거양득입니다.자격증을 취득하여 자신있게 승진하여 연봉협상하세요.

최신 SAP Certified Associate C-S4CPB-2502 무료샘플문제 (Q60-Q65):

질문 # 60

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Infrastructure as a Service
- B. On premise
- C. Platform as a Service
- D. Software as a Service
- E. Private Cloud

정답: B,C,E

설명:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:

* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.

* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

질문 # 61

In which type of extensibility is the SAP Business Technology Platform used to host a custom extension?

- A. Classic extensibility
- B. Key user extensibility
- C. Developer extensibility
- D. Side-by-side extensibility

정답: D

질문 # 62

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create business processes with a high number of people involved in a pre-defined sequence
- B. To create cross-product workflow procedures
- C. To create standard procedures from SAP Signavio Process Navigator
- D. To create complex, repeated work processes with iterative cycles
- E. To create very simple release or approval procedures

정답: A,B,D

설명:

SAP S/4HANA Cloud Business Workflows are designed to enhance and automate business processes within the organization. They serve multiple purposes:

* To create complex, repeated work processes with iterative cycles: These workflows are designed to handle intricate processes that occur regularly within the business environment, allowing for automation and efficiency in tasks that require repetition and involve multiple steps or conditions.

* To create cross-product workflow procedures: This capability allows for the integration of various SAP products and services into a cohesive workflow, ensuring smooth and interconnected operations across different aspects of the business. It enables workflows that span across different SAP applications and solutions, providing a unified approach to managing business processes.

* To create business processes with a high number of people involved in a pre-defined sequence: SAP S/4HANA Cloud Business Workflows are capable of handling processes that involve many participants, orchestrating the sequence of tasks to be completed by different individuals or departments. This ensures that each step of the process is executed in the right order by the right person, enhancing collaboration and efficiency.

질문 # 63

In the Organizational Structure app in SAP Central Business Configuration, which of the following entities can be added under the Company root node? Note: There are 2 correct answers to this question.

- A. Division
- B. Purchasing Organization
- C. Sales Organization
- D. Plant

정답: C,D

질문 # 64

In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Modify building blocks.
- B. Change approval thresholds.
- C. Create new scope items.
- D. Add blocking reasons for billing.
- E. Add new sales organizations.

정답: B,D,E

설명:

In the Product-Specific Configuration Phase within SAP Central Business Configuration, several key activities can be performed to tailor the SAP S/4HANA Cloud system to meet specific business needs:

* Add new sales organizations: This activity involves setting up new sales organizations within the system, defining the structure of the sales department, and aligning it with the company's sales strategies and territories. This setup is crucial for managing sales processes, customer relationships, and sales reporting.

* Change approval thresholds: Modifying approval thresholds is an essential configuration activity that adjusts the approval limits for various transactions, ensuring that the approval process aligns with the company's internal control and governance policies. This can involve setting different thresholds for purchase orders, expense approvals, and other financial transactions.

* Add blocking reasons for billing: This configuration activity allows the company to define specific reasons for blocking billing documents, ensuring that billing does not proceed under certain conditions until the issues are resolved. This is critical for maintaining accurate and compliant billing processes.

These activities are part of the detailed configuration work that tailors the SAP S/4HANA Cloud system to the specific operational needs of the business, ensuring that the software supports the company's unique processes and policies.
