Studying with our C-ACDET-2506 Actual Exam, you can get the most professional information and achieve your dreaming scores by your first go.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q56-Q61):

NEW QUESTION # 56

What are the key characteristics of a Bluefield deployment scenario? Note: There are 2 correct answers to this question.

- A. The customer already has an SAP Ariba Strategic Sourcing suite solution deployed

- B. The Test site has been configured using the SAP Bluefield template
- C. Many team members have a naive perception of deploying software solutions
- D. The Production site may have live transactions

Answer: A,D

NEW QUESTION # 57

Who leads Suite Integration activities?

- A. SAP Support
- B. Customer Success Manager
- C. Partner/Customer Functional Lead
- D. SAP Deployment Lead

Answer: D

Explanation:

The SAP Deployment Lead is responsible for leading Suite Integration activities across SAP Ariba solutions.

This role acts as the primary coordinator and facilitator for integration efforts, ensuring smooth data flow, process alignment, and technical synchronization between sourcing, procurement, contracts, and other modules in the Ariba suite. The Deployment Lead works closely with the customer's functional teams, partners, and technical specialists to manage integration scope, timelines, and troubleshooting.

SAP Support typically provides post-go-live assistance but does not lead integration planning. Functional leads focus on configuration and business processes but lack overarching integration responsibility. Customer Success Managers focus on adoption and satisfaction rather than technical integration.

Therefore, the Deployment Lead role is critical for coordinating complex multi-solution projects and ensuring a unified suite experience.

NEW QUESTION # 58

How can you create a field label with italics?

- A. By selecting the option "Italic label"
- B. By marking the text in the field and select Ctrl-I
- C. By using standard HTML formatting like *label* can be added to the field label
- D. Formatting of a field label is not possible

Answer: C

NEW QUESTION # 59

The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- A. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.
- B. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.
- C. Subsequent migration activities follow Bluefield deployment scenario.
- D. Subsequent migration activities will require a complete reconfiguration of existing solutions.

Answer: B

NEW QUESTION # 60

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data that will be captured in that standard field. How can this be achieved?

- A. Create a custom field that can be marked Reportable, default the custom field to the standard field value, publish, and then pull the field into reporting

- B. Under Field Configurations,, search for the field in the appropriate class, mark the field Reportable, Save and Publish.
- C. All standard fields are reportable by default.
- D. The system makes all fields reportable after a system refresh.

Answer: A

NEW QUESTION # 61

.....
