Now it is a society of abundant capable people, and there are still a lot of industry is lack of talent, such as the IT industry is quite lack of technical talents. Microsoft certification GH-100 exam is one of testing IT technology certification exams. DumpTorrent is a website which provide you a training about Microsoft Certification GH-100 Exam related technical knowledge.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.
Topic 2	<ul style="list-style-type: none">• Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI• CD pipelines.
Topic 3	<ul style="list-style-type: none">• Manage GitHub Actions: This section of the exam measures skills of DevOps Engineers and emphasizes managing workflows, reusable actions, and distribution strategies within the enterprise. It explains configuring organization-level policies, managing self-hosted and GitHub-hosted runners, controlling access through IP allow lists, handling encrypted secrets, and integrating third-party vaults for workflow security.
Topic 4	<ul style="list-style-type: none">• Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI• CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.

Pass Guaranteed Quiz 2026 Microsoft Trustable GH-100: GitHub Administration Valid Test Fee

We have three versions of our GH-100 study materials, and they are PDF version, software version and online version. With the PDF version, you can print our materials onto paper and learn our GH-100 study materials in a more handy way as you can take

notes whenever you want to, and you can mark out whatever you need to review later. With the software version, you are allowed to install our GH-100 study materials in all computers that operate in windows system. Besides, the software version can simulate the real test environment, which is favorable for people to better adapt to the examination atmosphere. With the online version, you can study the GH-100 Study Materials wherever you like, and you still have access to the materials even if there is no internet available on the premise that you have studied the GH-100 study materials online once before.

Microsoft GitHub Administration Sample Questions (Q53-Q58):

NEW QUESTION # 53

Which of the following accurately contrasts a GitHub App and a GitHub Action?

- A. GitHub Actions can only be used to respond to events within a single repository while GitHub Apps can respond to events from multiple repositories
- B. GitHub Apps run only on GitHub-provided virtual machines, while GitHub Actions run only on customer-hosted machines
- C. GitHub Actions are limited to reading repository content only
- D. GitHub Apps can only be used inside .github/workflows

Answer: A

Explanation:

GitHub Actions workflows are defined and triggered within a single repository's context, whereas GitHub Apps are installed at the organization or user level and can subscribe to events across multiple repositories.

NEW QUESTION # 54

Which of the following is a key benefit of using GitHub Marketplace Apps in an enterprise?

- A. Apps eliminate the need for GitHub Actions entirely
- B. They often include integrations with external services, reducing the need for custom code
- C. They guarantee no downtime during enterprise GitHub maintenance windows
- D. All apps come pre-approved by GitHub's internal security team

Answer: B

Explanation:

GitHub Marketplace Apps come with built-in integrations to external services - so you can plug in things like CI servers, code-quality scanners, or deployment tools without writing and maintaining custom connectors.

NEW QUESTION # 55

How does Dependabot determine which security update PRs to open?

- A. It compares your codebase to the GitHub Trending list.
- B. It uses the dependency graph and Dependabot alerts to open PRs for patched versions.
- C. It waits for manual triage of all CVEs.
- D. It reads the GitHub Issues and automatically suggests fixes.

Answer: B

Explanation:

Dependabot relies on your repository's enabled Dependency Graph and Dependabot Alerts to identify vulnerable dependencies; it then automatically opens pull requests to update to the patched versions that resolve those alerts.

NEW QUESTION # 56

You are planning GitHub account management for a healthcare organization with strict compliance requirements. Which THREE of the following statements accurately describe GitHub Enterprise Managed Users (EMU) accounts? (Choose three.)

- A. EMU accounts can be used for both personal and enterprise repositories.
- B. EMU accounts restrict users to enterprise-related activities only
- C. EMU accounts are owned by the organization and cannot be unlinked.

- D. EMU accounts are created and managed by individual users.
- **E. EMU accounts are managed through an identity provider such as Azure AD.**
- F. EMU accounts allow users to create and manage their own credentials.

Answer: B,C,E

Explanation:

Enterprise Managed User accounts are provisioned and authenticated exclusively through your identity provider (for example, AzureAD), so the IdP handles their creation, attribute updates, and deprovisioning.

Managed user accounts cannot create public content or interact with repositories outside your enterprise; they're confined to private and internal repos within the enterprise.

EMU accounts are owned and controlled by the enterprise (via the IdP) and cannot be converted into or unlinked as personal accounts outside that enterprise.

NEW QUESTION # 57

Which feature is unique to self-hosted runners?

- **A. Execute scripts before and after a job**
- B. Dynamic scaling
- C. Automatic updates to the operating system
- D. GPU support

Answer: A

Explanation:

Self-hosted runners support custom pre- and post-job scripts via runner hooks, letting you run arbitrary scripts before a job starts and after it finishes - capabilities not available on GitHub-hosted runners.

NEW QUESTION # 58

.....

Business Applications GH-100 certification exam with our braindumps, just send us your failed score report. After we confirm your GH-100 score report and we can give full refund of the GH-100 Exam to you in time. Meanwhile, if you also need to take other related exams you also can choose another exam instead of the failed exam.
