

C-TS422-2023 Online Training & C-TS422-2023 Test Online

P.S. Free & New C-TS422-2023 dumps are available on Google Drive shared by ValidExam: <https://drive.google.com/open?id=1IMeOOTujkckUBR3vSVzhtqTsHhYZ80pu>

It is very normal to be afraid of the exam, especially such difficult exam like C-TS422-2023 exam. We know that encouragement alone cannot really improve your confidence in exam, so we provide the most practical and effective test software to help you pass the C-TS422-2023 Exam. You can use our samples first to experience the effect of our software, and we believe that you can realize our profession and efforts by researching and developing C-TS422-2023 exam software from samples of C-TS422-2023.

With C-TS422-2023 study materials, you will have more flexible learning time. With C-TS422-2023 study materials, you can flexibly arrange your study time according to your own life. You don't need to be in a hurry to go to classes after work as the students who take part in a face-to-face class, and you also never have to disrupt your schedule for learning. C-TS422-2023 Study Materials help you not only to avoid all the troubles of learning but also to provide you with higher learning quality than other students'.

C-TS422-2023 Online Training | Efficient SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing 100% Free Test Online

Why we give a promise that once you fail the exam with our dump, we guarantee a 100% full refund of the dump cost to you, as all those who have pass the exam successfully with our C-TS422-2023 exam dumps give us more confidence to make the promise of "No help, full refund". C-TS422-2023 exam is difficult to pass, but it is an important reflection of ability for IT workers in IT industry. So our IT technicians of ValidExam take more efforts to study C-TS422-2023 Exam Materials. All exam software from ValidExam is the achievements of more IT elite.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q43-Q48):

NEW QUESTION # 43

What are the advantages of collective orders? Note: There are 2 correct answers to this question.

- A. To show the flow of batches across the entire collective order
- B. To coordinate orders in the planning board for a collective order
- C. To perform availability checks across the entire collective order
- D. To post confirmations for the entire collective order

Answer: C,D

NEW QUESTION # 44

In documentation for MRP in Advanced Planning you read that new orders are created through infinite planning. What does this mean for the capacity requirements of a new order?

- A. MRP assigns the capacity requirements automatically to work centers with the earliest available capacity.
- B. MRP assigns the capacity requirements automatically after the last scheduled operation for each work center.
- **C. MRP creates the capacity requirements without considering existing load on the work centers.**
- D. MRP creates the capacity requirements at the earliest possible time.

Answer: C

Explanation:

In SAP S/4HANA Advanced Planning (PP/DS - Production Planning and Detailed Scheduling), infinite planning assumes unlimited capacity availability during the initial planning phase. When the documentation states that "new orders are created through infinite planning," it means that MRP generates planned orders without checking the existing capacity load on work centers. Thus, MRP creates the capacity requirements without considering existing load on the work centers (B). This approach prioritizes material availability and scheduling over capacity constraints, leaving capacity leveling to a subsequent step (e.g., using heuristics or manual adjustments in PP/DS).

Option A is incorrect because infinite planning does not sequence capacity requirements after the last operation; it ignores capacity entirely. Option C is not accurate, as "earliest possible time" implies a finite scheduling logic, which contradicts infinite planning. Option D is also incorrect, as infinite planning does not consider available capacity for assignment. This is consistent with SAP's PP/DS documentation, where infinite planning is a preliminary step before finite scheduling.

NEW QUESTION # 45

Which information is required when you create a product master in SAP S/4HANA Cloud Private Edition?

Note: There are 2 correct answers to this question.

- A. Product type
- **B. Industry sector**
- C. Selection screen for views
- **D. Base unit of measure**

Answer: B,D

NEW QUESTION # 46

You have maintained the parameters for simple discontinuation in the material master of a component. Which business process will be affected if the available stock is zero and the discontinuation date is in the past?

- **A. Material requirements planning**
- B. Production order release
- C. Kanban
- D. Backflushing

Answer: A

Explanation:

If the available stock is zero and the discontinuation date is in the past, the material requirements planning (MRP) process will be affected. MRP will not create any planned orders or purchase requisitions for the discontinued component. Instead, it will create a discontinuation indicator in the MRP list and a discontinuation message in the exception message list. This will inform the planner that the component is no longer available and that a follow-up material should be used instead. Reference: [SAP Help Portal] - Discontinuation of Materials.

NEW QUESTION # 47

which SAP application can be used for forecasting in Supply Chain Planning?

Note: there are 2 correct answers to this question.

- **A. Supply Chain Management (SCM)**
- **B. Capacity Requirement Planning (CRP)**

- C. Material Requirement Planning (MRP)
- D. Integration Business Planning (IBP)

Answer: A,D

Explanation:

Forecasting is the process of predicting future demand for products or services based on historical data, market trends, and other factors. Forecasting is an essential component of supply chain planning, which aims to optimize the flow of materials, information, and money across the supply chain network. SAP offers various applications that can be used for forecasting in supply chain planning, such as:

Integration Business Planning (IBP): IBP is a cloud-based solution that provides end-to-end visibility and integration of planning processes across different business functions, such as sales, finance, operations, and logistics. IBP enables collaborative and real-time forecasting, scenario analysis, and decision making based on advanced analytics and machine learning. IBP supports various forecasting methods, such as statistical, causal, and demand sensing, and allows users to adjust and refine forecasts based on changing market conditions and business priorities¹².

Supply Chain Management (SCM): SCM is an on-premise solution that covers the entire supply chain process, from demand planning to delivery and invoicing. SCM includes various modules, such as Advanced Planning and Optimization (APO), Extended Warehouse Management (EWM), and Transportation Management, that enable efficient and flexible planning and execution of supply chain activities. SCM supports various forecasting techniques, such as exponential smoothing, trend analysis, and seasonal adjustment, and allows users to monitor and control forecast accuracy and performance³⁴.

The other two options are not SAP applications, but rather concepts or processes related to supply chain planning:

Capacity Requirement Planning (CRP): CRP is the process of determining the available and required capacity of resources, such as machines, labor, and materials, to meet the production plan. CRP helps to identify and resolve capacity bottlenecks, optimize resource utilization, and balance supply and demand. CRP can be performed using various SAP applications, such as MRP, Production Planning and Detailed Scheduling (PP/DS), or IBP⁵.

Material Requirement Planning (MRP): MRP is the process of calculating the quantity and timing of materials needed to fulfill the production plan. MRP helps to optimize inventory levels, reduce costs, and improve customer service. MRP can be performed using various SAP applications, such as ERP, SCM, or IBP.
