FCSS_SASE_AD-25 Ausbildungsressourcen - FCSS_SASE_AD-25 Testking

Wenn Sie finden, dass es ein Abenteuer ist, sich mit den Prüfungsmaterialien zur Fortinet FCSS_SASE_AD-25 Zertifizierungsprüfung von ZertSoft auf die Prüfung vorzubereiten. Das ganze Leben ist ein Abenteuer. Diejenigen, die am weitesten gehen, sind meistens diejenigen, die Risiko tragen können. Die Prüfungsmaterialien zur Fortinet FCSS_SASE_AD-25 Prüfung von ZertSoft werden von den Kandidaten durch Praxis bewährt. ZertSoft hat den Kandidaten Erfolg gebracht. Es ist wichtig, Traum und Hoffnung zu haben. Am wichtigsten ist es, den Fuß auf den Boden zu setzen. Wenn Sie ZertSoft wählen, können Sie sicher Erfolg erlangen.

Fortinet FCSS_SASE_AD-25 Prüfungsplan:

Thema	Einzelheiten

Thema 1	• SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.
Thema 2	• Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.
Thema 3	• Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.
Thema 4	• SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.

- Antwort: D**

The SSL inspection mode is set to certificate inspection, which only inspects SSL/TLS headers and does not allow full scanning of encrypted content. Without full (deep) inspection, the antivirus profile cannot scan or block malicious files (like eicar.com.zip) delivered over HTTPS, allowing the download to proceed.

A FortiSASE administrator has configured an antivirus profile in the security profile group and applied it to the internet access policy. Remote users are still able to download the eicar.com-zip file from <https://eicar.org>. Traffic logs show traffic is allowed by the policy. Which configuration on FortiSASE is allowing users to perform the download?

- A. The HTTPS protocol is not enabled in the antivirus profile.
- **B. Force certificate inspection is enabled in the policy.**
- C. Web filter is allowing the traffic.
- D. IPS is disabled in the security profile group.

Antwort: B

A FortiSASE administrator has configured an antivirus profile in the security profile group and applied it to the internet access policy. Remote users are still able to download the eicar.com-zip file from <https://eicar.org>.

Which configuration on FortiSASE is allowing users to perform the download?

- A. Intrusion prevention is disabled.
- B. Application control is exempting all the browser traffic.
- C. Web filter is allowing the URL.
- **D. Deep inspection is not enabled.**

Antwort: D

Begründung:

The SSL inspection mode is set to certificate inspection, which only inspects SSL/TLS headers and does not allow full scanning of encrypted content. Without full (deep) inspection, the antivirus profile cannot scan or block malicious files (like eicar.com.zip) delivered over HTTPS, allowing the download to proceed.

39. Frage

Which two additional components does FortiSASE use for application control to act as an inline-CASB? (Choose two.)

- **A. intrusion prevention system (IPS)**
- B. DNS filter
- C. Web filter with inline-CASB
- **D. SSL deep inspection**

Antwort: A,D

40. Frage

Which two are required to enable central management on FortiSASE? (Choose two.)

- A. FortiManager and FortiSASE registered under the same FortiCloud account.
- B. FortiSASE central management entitlement applied to FortiManager.
- **C. FortiSASE connector configured on FortiManager.**
- **D. The FortiManager IP address in the FortiSASE central management configuration.**

Antwort: C,D

Begründung:

To enable central management, FortiManager must have a FortiSASE connector configured, and both FortiSASE and FortiManager must be registered under the same FortiCloud account to establish trust and synchronization.
