

快速下載LEED-Green-Associate熱門認證|第一次嘗試輕鬆學習並通過考試，優秀的USGBC LEED Green Associate Exam

LEED Green Associate Exam

How many questions are on the LEED Green Associate Exam? - 100

How long do you have to take the exam? - 2 hours

What is the scoring scale for the LEED? What score do you need to pass? - 125 to 200, 170

What factors motivate green building? - Reduction in cost (water use, energy use), reduction in environmental footprint (CO2 emissions, solid waste, energy use, etc.)

What are the differences between conventional design and integrative design? - Conventional- project team members move through each phase independently of other design disciplines
Integrative- Emphasizes connections and communications between professionals throughout the life of the project.

How can green buildings address environmental issues? - green buildings have less of an environmental footprint which is better for the environment.

What are the added costs of building green, and what benefits offset these costs? - Integrative design requires more time in correlation, which makes design costs greater. The benefits that offset the costs are less long-term costs.

What constitutes the largest use of energy in buildings in the United States?
a.) Space cooling
b.) Space heating
c.) Electric lighting
d.) Water heating - b.) Space heating (38% of all energy used within buildings is used for space heating)

Green building emphasizes using what type of design process?
a.) Linear
b.) Multistage
c.) Integrative
d.) Tiered - c.) Integrative

What are the three dimensions of sustainability often described as the triple bottom line or the three-legged stool?
a.) Economic prosperity, environmental stewardship, and social responsibility
b.) Economic theory, cultural agendas, and global variety
c.) Energy efficiency, water efficiency, and indoor environmental quality

Fast2test 是個很好的為 USGBC LEED-Green-Associate 認證考試提供方便的網站。根據過去的考試練習題和答案的研究，它能有效的捕捉 USGBC LEED-Green-Associate 認證考試試題內容。我們提供的 LEED-Green-Associate 考試練習題與真實的考試題有緊密的相似性。而且 LEED-Green-Associate 考題一直備受考生的稱贊，很多考生使用後，都知道出題高，讓他們順利過關。

LEED-Green-Associate考試是IT行業的當中一個新的轉捩點，你將成為IT行業的專業高端人士，隨著資訊技術的普及和進步，你們會看到有數以計百的線上資源，提供USGBC的LEED-Green-Associate考題和答案，而Fast2test卻遙遙領先，人們選擇Fast2test是因為Fast2test的USGBC的LEED-Green-Associate考試培訓資料真的可以給人們帶來好處，能幫助你早日實現你的夢想！

LEED-Green-Associate熱門考古題 & 最新LEED-Green-Associate考古題

你還在猶豫什麼，機不可失，失不再來。現在你就可以獲得USGBC的LEED-Green-Associate考題的完整本，只要你進Fast2test網站就能滿足你這個小小的欲望。你找到了最好的LEED-Green-Associate考試培訓資料，請你放心使用我們的考題及答案，你一定會通過的。

USGBC LEED-Green-Associate 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"> LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.
主題 2	<ul style="list-style-type: none"> Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.
主題 3	<ul style="list-style-type: none"> Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.
主題 4	<ul style="list-style-type: none"> Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.
主題 5	<ul style="list-style-type: none"> Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.
主題 6	<ul style="list-style-type: none"> Project Surroundings and Public Outreach: This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.
主題 7	<ul style="list-style-type: none"> Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.
主題 8	<ul style="list-style-type: none"> Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.

最新的 USGBC LEED LEED-Green-Associate 免費考試真題 (Q107-Q112):

問題 #107

Select the type of approach that promotes the conservation of Materials and Resources by linking elements in order to form relationships with their function

- A. Open Systems
- B. Open Flow
- **C. Closed Systems**
- D. Closed Flow

答案: C

問題 #108

A project plans to build a campus of buildings. Which of the following strategies should the project team consider to reduce energy demand?

- **A. Design buildings to shade each other**
- B. Enroll in a demand response program
- C. Purchase carbon offsets
- D. Select HVAC equipment without refrigerants

答案： A

解題說明：

Explanation

Designing buildings to shade each other can help reduce energy demand by decreasing cooling loads. By strategically positioning buildings on a site, it's possible to use the buildings themselves to block solar heat gain, reducing the need for air conditioning.

Green Building Council resources

問題 #109

Which of the following is the reason Regional Priority credits are awarded?

- A. To address local environmental issues
- B. To help meet economic goals
- C. To promote innovation in building design
- D. To encourage exemplary performance

答案： A

解題說明：

Explanation

Regional Priority credits are awarded to encourage projects to address local environmental issues that are of particular importance or concern for the region where the project is located. These issues may include water scarcity, air quality, habitat protection, or human health. Regional Priority credits are not new LEED credits, but rather existing credits that have been identified by regional councils or chapters of USGBC as having higher priority or relevance for their areas. Projects can earn up to four bonus points by achieving Regional Priority credits. 問題 #110

Which of the following does LEED promote by encouraging compact development?

- A. Development of new infrastructure
- B. Walkability
- C. Historic preservation
- D. Urban sprawl

答案： B

解題說明：

One of the things that LEED promotes by encouraging compact development is walkability. Compact development is a form of urban planning that aims to reduce sprawl and make more efficient use of land and resources by increasing density, diversity, and connectivity of land uses⁵. Compact development can enhance walkability by creating mixed-use neighborhoods that provide a variety of destinations within walking distance, such as shops, services, workplaces, schools, parks, and transit stops. Walkability can offer multiple benefits for the environment, health, economy, and social equity. For example, walkability can reduce greenhouse gas emissions and air pollution by replacing car trips with walking or transit; improve physical and mental health by increasing physical activity and reducing stress; support local businesses and generate tax revenues by increasing foot traffic and property values; and foster social cohesion and civic engagement by creating vibrant public spaces and enhancing accessibility for all⁶. References: Compact urban development⁶; LEED v4 BD+C Reference Guide, Location and Transportation, page 15

問題 #111

LEED stands for

- A. Leadership in Eco and Energy Design
- B. Leadership in Energy and Environmental Design
- C. Leadership in Efficiency and Energy Design
- D. Leadership in Environmental and Efficiency Design

答案： B

解題說明：

LEED is an acronym for Leadership in Energy and Environmental Design, which is the most widely used green building rating system in the world. LEED provides a framework for creating healthy, efficient, and cost-saving buildings that have positive environmental and social impacts. LEED certification is a globally recognized symbol of sustainability achievement and leadership12.
