Reliable LEED-Green-Associate Exam Question - LEED-Green-Associate Valid Dumps Files

To deliver on the commitments of our LEED-Green-Associate test prep that we have made for the majority of candidates, we

prioritize the research and development of our LEED-Green-Associate test braindumps, establishing action plans with clear goals of helping them get the LEED-Green-Associate certification. You can totally rely on our products for your future learning path. In fact, the overload of learning seems not to be a good method, once you are weary of such a studying mode, it's difficult for you to regain interests and energy. Therefore, we should formulate a set of high efficient study plan to make the LEED-Green-Associate Exam Dumps easier to operate.

USGBC LEED Green Associate Exam Sample Questions (Q217-Q222):

NEW QUESTION # 217

What is the maximum number of occupiable stories for a project to be considered LEED Building Design and Construction Homes and Multifamily Low-rise?

- A. Three
- B. Four
- C. Five
- D. Two

Answer: A

Explanation:

LEED Building Design and Construction Homes and Multifamily Low-rise is a rating system that applies to single-family homes and multifamily buildings between one and three stories. This rating system covers the design and construction phases of residential projects that are intended for human occupancy¹². Projects that have more than three stories are not eligible for this rating system, but may qualify for other LEED rating systems, such as LEED Building Design and Construction Multifamily Mid-rise, which applies to multifamily buildings between four and eight stories

NEW QUESTION # 218

The cradle-to-cradle approach to sustainable materials evaluates

- A. building materials from installation to disposal
- B. building materials from extraction to reuse
- C. building materials from extraction to disposal
- D. building materials from installation to recycling

Answer: B

Explanation:

Explanation

The cradle-to-cradle approach to sustainable materials evaluates building materials from extraction to reuse, which means that the materials are considered as part of a continuous cycle of use and regeneration, rather than a linear process of consumption and disposal. The cradle-to-cradle approach aims to eliminate waste and pollution, conserve resources and energy, and create positive impacts for the environment and human health. The cradle-to-cradle approach is based on the principles of eco-effectiveness, which include designing products and systems that are safe and healthy for humans and nature, using renewable energy and clean water, celebrating diversity and creativity, and respecting social and environmental justice¹². The cradle-to-cradle approach is also recognized and encouraged by LEED v4, which includes a credit for using products that have achieved Cradle to Cradle certification³⁴.

NEW QUESTION # 219

Which of the following components comprise the Indoor Environmental Quality credit category?

- A. Recycled content, low Volatile Organic Compounds (VOCs) emissions materials, non point source pollution
- B. Light, sound, occupant experience
- C. Community connectivity, tobacco smoke control, green cleaning
- D. Energy, site, water reduction

Answer: B

Explanation:

Light, sound, occupant experience are some of the components that comprise the Indoor Environmental Quality credit category. The

Indoor Environmental Quality credit category aims to provide a healthy, comfortable, and productive indoor environment for building occupants by addressing various factors that affect their well-being, such as thermal comfort, lighting quality, acoustic quality, air quality, and occupant control. The LEED Green Associate Candidate Handbook states that one of the intents of the Indoor Environmental Quality category is to "enhance indoor environmental quality (IEQ) by improving the design, construction and operation of buildings" [1, p. 16]. Reference: LEED Green Associate Candidate Handbook, [Indoor Environmental Quality | U.S. Green Building Council]

NEW QUESTION # 220

An architect found a source for reclaimed wood doors from a recently demolished building 600 mi. (966 km) away from the project site. Towards which of the following sustainable criteria can the doors be used?

- A. Certified Wood
- B. Local Materials
- C. Materials Reuse
- D. Recycled Content

Answer: C

Explanation:

The reclaimed wood doors can be used to meet the Materials Reuse credit under the Building Product Disclosure and Optimization category in LEED v4. This credit rewards projects for reusing materials that have been recovered from existing buildings or products, and reduces the demand for virgin materials and the associated environmental impacts. The credit does not have any distance requirements for the source of the reused materials, unlike the Recycled Content and Regional Materials credits.

NEW QUESTION # 221

The WaterSense label program was developed by which federal agency to promote water-efficient products and resources?

- A. Environmental Protection Agency (EPA)
- B. General Services Administration (GSA)
- C. Alliance for Water Efficiency (AWE)
- D. Department of Energy (DOE)

Answer: A

Explanation:

According to the LeadingGreen Study Guide:

"WaterSense is an EPA-sponsored program that promotes and certifies water-efficient products, programs, and practices."

The Environmental Protection Agency (EPA) is the correct federal agency.

NEW QUESTION # 222

.....
