

Salesforce Data-Architect試験の準備方法 | 素敵なData-Architectブロンズ教材試験 | 最高のSalesforce Certified Data Architect模擬問題

P.S.PassTestがGoogle Driveで共有している無料の2026 Salesforce Data-Architectダンプ: <https://drive.google.com/open?id=1zE5UEs8YqSWGDIw1UceB9YzZ5xKYdBpJ>

私たちのData-Architect試験問題は、最も重要で効果的な報酬は、あなたが試験に合格させ、Data-Architect認定試験資格書を得ることです。そしてそれは、すべての受験者が気になるものです。同時に、Data-Architectでより実用的なスキルを得ることもでき、あなたの仕事の効率を向上させます。私たちのData-Architect試験問題は信頼に値する商品です。

Salesforce Data-Architect認定試験は、Salesforceプラットフォーム内でデータアーキテクチャ、モデリング、および管理に関する知識をテストするように設計されています。この認定は、複雑なデータソリューションを設計および実装し、データガバナンス、データセキュリティ、およびデータ品質のベストプラクティスを深く理解している専門家を対象としています。

Salesforce Certified Data Architect Examは、データモデリング、データベース設計、データ移行、データ統合、データセキュリティ、データガバナンスなど、幅広いトピックをカバーしています。現代のビジネスのニーズを満たす堅牢でスケーラブルなデータアーキテクチャを開発する際に、候補者の知識とスキルをテストするように設計されています。この試験では、Salesforce Data Loader、Salesforce Connect、Salesforce Shieldなど、さまざまなSalesforceデータツールとテクノロジーを操作する候補者の能力も評価します。

Data-Architect模擬問題、Data-Architectの中合格問題集

長年の努力と革新とクライアントベースのコンセプトを中心に、当社は業界の旗艦企業に成長しました。当社は、Data-Architect試験の準備の質の向上に苦勞し、Data-Architectスタディガイドの研究と革新に多大な努力とお金を投資しています。業界での当社のブランド名は、優れたData-Architect学習ガイドで有名です。高品質、思いやりのあるサービス、絶え間ない革新、そしてData-Architect試験問題での最初の顧客の概念は、当社の4つの柱です。

Salesforce Data-Architect試験は、Salesforceに関連するデータモデリング、データ統合、およびデータ管理における熟練度を確立したい人に最適です。この認定を取得することで、プラットフォームの機能、データモデリング、データ管理、データ統合、およびメトリックとデータ分析の重要性を理解していることが証明されます。

Salesforce Certified Data Architect 認定 Data-Architect 試験問題 (Q61-Q66):

質問 # 61

Universal Containers (UC) is migrating data from legacy system to Salesforce. During data analysis it was discovered that data types

of fields being migrated do not match with Salesforce data types.

Which solution should a data architect use to ensure successful data migrations?

- A. Export legacy data into CSV files and leverage data loader to load data into Salesforce.
- B. Export legacy data into the staging database and leverage stored procedures to transform data types before loading into Salesforce.
- C. Migrate legacy data to a staging database for mapping then leverage an ETL tool to transform the data and load into Salesforce.
- **D. Migrate the legacy data leveraging an ETL tool to transform data types and load data into Salesforce.**

正解: D

解説:

According to this article, migrating the legacy data leveraging an ETL tool to transform data types and load data into Salesforce can be a way to ensure successful data migrations. The article states that ETL tools can help with data cleansing, mapping, transformation, and loading, and that they can handle different data types and formats. The article also provides some best practices for data migration, such as identifying the data to migrate, creating templates for the data, preparing the destination org, and validating the data.

質問 # 62

Universal Containers wants to automatically archive all inactive Account data that is older than 3 years. The information does not need to remain accessible within the application. Which two methods should be recommended to meet this requirement? Choose 2 answers

- **A. Schedule jobs to export and delete using an ETL tool.**
- B. Use the Force.com Workbench to export the data.
- C. Schedule a weekly export file from the Salesforce UI.
- **D. Schedule jobs to export and delete using the Data Loader.**

正解: A、D

質問 # 63

UC is rolling out Sales App globally to bring sales teams together on one platform. UC expects millions of opportunities and accounts to be created and is concerned about the performance of the application.

Which 3 recommendations should the data architect make to avoid the data skew? Choose 3 answers.

- A. Use picklist fields rather than lookup to custom object.
- B. Assign 10000 opportunities to one account.
- **C. Limit assigning one user 10000 records ownership.**
- **D. Limit associating 10000 opportunities to one account.**
- **E. Limit associating 10000 records looking up to same records.**

正解: C、D、E

解説:

Data skew occurs when a large number of child records are associated with a single parent record, or when a single user owns a large number of records. This can cause performance issues and lock contention. To avoid data skew, the data architect should limit assigning one user 10,000 records ownership, limit associating 10,000 opportunities to one account, and limit associating 10,000 records looking up to the same record

質問 # 64

Based on government regulations, a Salesforce customer plans to implement the following in Salesforce for compliance:

Access to customer information based on record ownership

Ability for customers to request removal of their information from Salesforce Prevent users from accessing Salesforce from outside company network (virtual private network, or VPN) What should a data architect recommend to address these requirements?

- A. Allow users access to Salesforce through a custom web application hosted within VPN.
- **B. Implement IP restrictions, sharing settings, and custom Apex to support customer requests.**

- 正解: B

Universal Containers (UC) has a data model as shown in the image. The Project object has a private sharing model, and it has Roll-Up summary fields to calculate the number of resources assigned to the project, total hours for the project, and the number of work items associated to the project. What should the architect consider, knowing there will be a large amount of time entry records to be loaded regularly from an external system into Salesforce.com?

- 正解: C

Loading all data after deferring sharing calculations can improve the performance and avoid locking issues when loading a large amount of time entry records into Salesforce.com. This is because deferring sharing calculations can temporarily suspend the calculation of sharing rules until all the data is loaded, and then recalculate them in one operation
