# The Best Valid Dumps PL-900 Files & Reliable Standard PL-900 Answers & Complete PL-900 Valid Test Guide

Our PL-900 learning materials are known for instant download. You can get the download link and password within ten minutes after purchasing, therefore you can start your learning as quickly as possible. Besides, PL-900 exam dumps contain most of knowledge points of the exam, and it will be enough for you to pass the exam, and in the process of practicing PL-900 Exam Dumps, your professional ability will also be improved. We offer you free update for 365 days after purchasing. The latest version for PL-900 training materials will be sent to your email automatically.

Microsoft PL-900 Exam Syllabus Topics:

Topic	Details
Describe the business value of Power Platform (15-20%)	

Describe the business value of Power Platform services	- analyze data by using Power BI - act with Power Apps - build solutions that use Microsoft Dataverse - create flows by using Power Automate - use connectors to access services and data - create powerful chatbots by using a guided, no-code graphical interface
Describe the business value of extending business solutions by using Power Platform	- describe how Dynamics 365 apps can accelerate delivery of Power Platform business solutions - describe how Power Platform business solutions can be used by Microsoft 365 apps including Microsoft Teams - describe how Power Platform business solutions can consume Microsoft 365 services - describe how Power Platform business solutions can consume Microsoft Azure services including Azure Cognitive Services - describe how Power Platform business solutions can consume third-party apps and services
Describe Power Platform administration and security	- describe how Power Platform implements security including awareness of Microsoft Dataverse security roles, Azure Identity Services, and Access Management (IAM) - describe how to manage apps and users - describe environments - describe where to perform specific administrative tasks including Power Platform Admin center, Microsoft 365 admin center - describe Data Loss Prevention (DLP) policies - describe how the platform supports privacy and accessibility guidelines

Identify the Core Components of Power Platform (15-20%)

Describe Microsoft Dataverse	- describe the Power Apps user experience - describe tables, columns, and relationships - describe use cases for solutions - describe use cases and limitations of business rules - describe the Common Data Model (CDM) - describe how to use common standard tables to describe people, places, and things
Describe Connectors	- describe the native Dataverse connection experience - describe triggers including trigger types and where triggers are used - describe actions - describe licensing options for connectors including standard or premium tier Identify use cases for custom connectors
Describe AI Builder	- identify the business value of AI Builder - describe models including business card reader, detection model, form processing model, and prediction model - describe how the Power Apps and Power Automate can consume AI Builder data

Demonstrate the capabilities of Power BI (15-20%)

Identify common Power BI components	- identify and describe uses for visualization controls including pie, bar, donut, and scatter plots and KPIs - describe types of filters - describe the Power BI Desktop Reports, Data, and Model tabs - describe uses for custom visuals including charts or controls Compare and contrast dashboards and workspaces - compare and contrast Power BI Desktop and Power BI Service - compare and contrast dashboards, workspaces, and reports
Connect to and consume data	- combine multiple data sources - clean and transform data - describe and implement aggregate functions - identify available types of data sources including Microsoft Excel - describe use cases for shared datasets and template apps and how to consume each

Build a basic dashboard using Power BI	- design a Power BI dashboard - design data layout and mapping - publish and share reports and dashboards

Objectives of Microsoft Power Platform Fundamentals PL-900 Certification Exam :

The exam will test your skills in managing and designing a private cloud infrastructure for Microsoft Azure. It will test your skills in versioning and virtualization for different Microsoft products and also, it will measure your knowledge in designing an infrastructure capable of supporting applications and services, along with the experiences of managing them.

Designing a private cloud solution with Windows Server and Linux machines, using the Azure Stack to support Office 365 workloads.

Selecting the correct hardware for a private cloud. Statement of the problem statements with Data Stewardship in mind, along with the storage design principles.

- Personalized guidance to architecting MicrosoftAzureStack solutions. Benefit from the cloud-based implementation process.

- Prove your skills in deploying a cloud infrastructure by using Windows Server and Linux.

- Upgrading Microsoft SQL Server and upgrading Azure VM to different versions. Connecting servers to TCP/IP Networks.

- Migrating from on-premises to cloud-like functionality using hybrid network technologies and design considerations.

- Creating hybrid networks. Automating the deployment of a private cloud with Azure Stack.

Getting detailed knowledge in designing an enterprise hosting environment capable of providing SQL Server services for different customers and organizations. Sales and Service organizations can use the capability to host and manage SQL databases for their clients.

Designing an enterprise Server Infrastructure as a Service (IaaS) solution, where you can build private clouds on top of the Azure platform with Linux and Windows Server machines. **PL-900 Dumps** is designed to help you prepare for taking the exam. Then, designing and implementing virtual machines on Linux or Windows Server to use as guest operating systems. This will help you design a private cloud solution that supports different services and apps for different potential customers and organizations. The dashboard will be reported using Power BI, where you can measure the performance of your private cloud solution.

Standard Microsoft PL-900 Answers & PL-900 Valid Test Guide

As an experienced exam dumps provider, our website offers you most reliable Microsoft real dumps and study guide. We offer customer with most comprehensive PL-900 exam pdf and the guarantee of high pass rate. The key of our success is to constantly provide the best quality PL-900 Dumps Torrent with the best customer service.

Microsoft Power Platform Fundamentals Sample Questions (Q179-Q184):

NEW QUESTION # 179
A user is creating their first canvas app in Power Apps.
The user does not know what types of controls they can include.
You need to recommend solutions for the user.
Which types of controls would you recommend using in Power Apps? To answer, select the appropriate control in the dialog box in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Gallery

A Gallery control can show multiple records from a data source, and each record can contain multiple types of data. For example, a Gallery control can show multiple contacts with each item showing contact information that includes a name, an address, and a phone number for each contact.

Box 2: Meeting-screen template

In a canvas app, add a meeting screen that lets users create and send meeting requests from their Office 365 Outlook accounts. Users can search for attendees in their org and add external email addresses. If your tenant has meeting rooms built into Outlook, users can select a location as well.

Box 3: Image

If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/screen-templates/meeting-screen-overview

NEW QUESTION # 180

You are building Power Bl visualizations for a team.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 181

A company manages a chain of retail stores. The company stores a list of retail store names and numbers in one Power BI table. The company stores sales transaction data including a transaction ID in another table.

The transaction ID includes the store number.

You need to show the store name for all retail transactions in all Power BI reports.

Which tool should you use?

- A. Power BI Service
- B. Data Connector
- C. Query Editor
- D. Microsoft Excel

Answer: C

Explanation:
Explanation
Power BI Desktop comes with Query Editor, where you can connect to one or many data sources, shape and transform the data to meet your needs, then load that model into Power BI Desktop.

NEW QUESTION # 182

You need to create a mobile application which will allow sales associates to enter customer sales leads.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/build-first-model-driven-app

NEW QUESTION # 183

You are creating a model-driven app to track requests for quotes.

The app must use the following navigation structure:

Sales
Sales Log
Request for Quotes
Projects
Settings
Customers
Product Lines
Sales Territories
Administration
User Admin
Users
Roles

You need to create the app navigation.

Which sitemap component types should you use? To answer, drag the appropriate component types to the correct navigation elements. Each component type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
