Besides, free updates of BA-201 Exam Torrent will be sent to your mailbox freely for one year, hope you can have a great experience during usage of our practice materials.

Salesforce Certified Business Analyst Sample Questions (Q260-Q265):

NEW QUESTION # 260

Northern Trail Outfitters (NTO) has completed a project with a third-party event organization platform to enhance its MVP Experience Site. Many features were left in the project backlog. NTO's IT team is beginning a new phase of work on the Experience Site to build additional features requested by business stakeholders and wants to include the items that were left in the backlog in the first phase.

How should the business analyst coordinate the user stories to most efficiently manage the new project timeline?

- A. Include existing and new user stories to be completed within the duration of the project. Hire additional developers to accommodate both work streams to prevent delays within the schedule sprints.
- **B. Prioritize user stories for the new enhancements for the initial sprints of the project to accommodate business stakeholder requests. Complete existing user stories in the final sprint of the project.**
- C. Reprioritize existing and new user stories to place the stories into each sprint of the project. Return an equivalent amount of lower priority work to the project backlog.

Answer: B

NEW QUESTION # 261

The VP of sales at Cloud Kicks wants to streamline the lead qualification process to improve the team's productivity and help them reach their target goals. A business analyst (BA) has been assigned to the project to identify the disconnect between the sales and marketing teams' definitions of a qualified lead.

What should the BA focus on?

- A. Mapping historical lead data from each team and building charts to highlight similarities
- B. Evaluating the team's skills and experiences to determine how they can better align.
- **C. Scheduling an all-day collaboration workshop with both teams to resolve their differences.**

Answer: C

Explanation:

The business analyst should focus on scheduling an all-day collaboration workshop with both teams to resolve their differences. This will allow the teams to come to a common understanding of what a qualified lead is and how they can work together to improve the lead qualification process.

Here are some additional details from Salesforce Certified Business Analyst documents and resources that support the answer: Mapping historical lead data from each team and building charts to highlight similarities is not likely to be effective in resolving the disconnect between the teams. This is because the teams may have different definitions of what a qualified lead is, and the data may not be able to resolve these differences.

Evaluating the team's skills and experiences to determine how they can better align is not likely to be effective in resolving the disconnect between the teams. This is because the teams may have different definitions of what a qualified lead is, and the evaluation is not likely to change these definitions.

Scheduling an all-day collaboration workshop with both teams to resolve their differences is the most likely to be effective in resolving the disconnect between the teams. This is because the workshop will allow the teams to come to a common understanding of what a qualified lead is and how they can work together to improve the lead qualification process.

In conclusion, the business analyst should focus on scheduling an all-day collaboration workshop with both teams to resolve their differences. This will allow the teams to come to a common understanding of what a qualified lead is and how they can work together to improve the lead qualification process.

NEW QUESTION # 262

Universal Containers (UC) is working with an implementation partner to help it optimize Salesforce. A new business analyst (BA) from the partner was introduced to UC stakeholders a few weeks into the project. The BA is getting to know each of the

stakeholders by their roles and contributions. However, the BA had one misstep and is slightly embarrassed. What should the BA do to build trust with the stakeholders?

- A. Be vulnerable and own their mistake.
- B. Promise to work harder to avoid other mistakes.
- C. Ask their supervisor for help immediately.

Answer: A

Explanation:

The best way for a business analyst to build trust with stakeholders after making a mistake is to be vulnerable and own their mistake. This will show honesty, humility, accountability, and willingness to learn from errors.

Promising to work harder to avoid other mistakes may sound defensive or unrealistic without acknowledging what went wrong or how to fix it. Asking their supervisor for help immediately may seem desperate or unprofessional without trying to resolve it first with stakeholders. References: <https://trailhead.salesforce.com>

NEW QUESTION # 263

The business analyst (BA) at Universal Containers (UC) wants to understand why UC failed to meet a deployment date for its product go live while following the Agile process. According to the BA's research, the developers lacked a sense of the work in progress and the intended goal of that work, and the QA team was unable to clearly test the functionality based on a given persona. Which step should the BA take next?

- A. Move the deployment date out so the teams have more time to work.
- B. Create a SWOT (Strength, Weakness, Opportunity, Threat) analysis to understand why development and testing took more time.
- C. Review the user stories to ensure they are small, testable, and valuable.

Answer: C

Explanation:

The next step that the business analyst should take is to review the user stories to ensure they are small, testable, and valuable. User stories are statements that capture a requirement or feature from an end user's perspective. They should be small enough to be completed within a sprint, testable enough to be verified by acceptance criteria, and valuable enough to deliver benefits or outcomes for end users. Reviewing user stories can help UC understand why development and testing took more time than expected, and how to improve them for future sprints. Creating a SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis to understand why development and testing took more time is not a good next step because it is a strategic tool that evaluates the internal and external factors affecting a project or initiative, not a tactical tool that evaluates the quality or effectiveness of user stories. Moving the deployment date out so the teams have more time to work is not a good next step because it does not address the root cause of why development and testing took more time, and it may affect the project scope or budget. NEW QUESTION # 264

Universal Containers is rolling out Sales Cloud for the contract renewals team. The team has expressed resistance to learning another platform and changing their processes. The business analyst (BA) shows them a video case study of a contract renewals team at another company that successfully adopted Sales Cloud, which shortened its time to close and increased its close rate by 30%.

Which influencing style is the BA using?

- A. Collaborative
- B. Accommodating
- C. Inspiring

Answer: C

Explanation:

The influencing style that the BA is using is inspiring. Inspiring is a style that appeals to the emotions and values of the stakeholders,

and motivates them to achieve a shared vision or goal. The BA is using an inspiring style by showing them a video case study of a contract renewals team at another company that successfully adopted Sales Cloud, which shortened its time to close and increased its close rate by 30%. This helps to create a positive and aspirational image of what Sales Cloud can do for them, and encourages them to overcome their resistance and embrace the change.
