Scrum SAFe Product Owner/Product Manager POPM (6.0) Sample Questions (Q54-Q59):

NEW QUESTION # 54

What helps visualize work during PI Planning?

- A. ART PI Risks
- B. ART PI Kanban Board
- **C. ART Planning Board**
- D. ART PI Objectives

Answer: C

Explanation:

Explanation

The ART Planning Board is a physical or virtual board that helps visualize the work of the Agile Release Train (ART) during PI Planning. It shows the features and dependencies for each team and iteration in the Program Increment (PI)¹. The ART Planning Board helps the teams and stakeholders to see the big picture, identify and resolve issues, and collaborate on the delivery plan².

NEW QUESTION # 55

What is enabled by the Continuous Delivery Pipeline?

- A. End-to-end testing
- B. Transparent measurements
- **C. New functionality delivered more frequently**
- D. A predictable release cadence

Answer: C

Explanation:

Explanation

The Continuous Delivery Pipeline enables the delivery of new functionality to customers more frequently by streamlining and automating the workflows, activities, and feedback loops from ideation to release¹. The Continuous Delivery Pipeline consists of four aspects: Continuous Exploration, Continuous Integration, Continuous Deployment, and Release on Demand². These aspects work together to support the delivery of small batches of new functionality, which can be released to the market based on the customer demand and business needs³.

NEW QUESTION # 56

Which of the following best summarizes the primary purpose of PI Planning in SAFe?

- A. To align all Agile Release Train participants to a shared mission and common goal
- B. To allow teams to finalize their backlogs
- C. To define the detailed architecture for the next PI
- D. To assign user stories to each team based on their capacity

Answer: A

Explanation:

The SAFe POPM workbook defines PI Planning as "a cadence-based event that serves as the heartbeat of the ART," aligning all teams on the ART to a shared mission and Vision. This makes the primary purpose of PI Planning alignment across ART participants around a common direction and goal.

NEW QUESTION # 57

Which Agile Team event supports relentless improvement?

- A. Team Sync
- B. Inspect and Adapt
- C. System Demo
- D. Iteration Retrospective

Answer: D

Explanation:

The iteration retrospective is an Agile Team event that supports relentless improvement by allowing the team to reflect on the iteration just completed and to derive new ideas to improve the team's process¹². This reflection helps instill the concept of relentless improvement—one of the pillars of the SAFe House of Lean³—in the individuals and the team.

NEW QUESTION # 58

What is defined as a product, service, or system delivered to the Customer?

- A. Epic
- B. Value
- C. Solution
- D. Capability

Answer: C

Explanation:

Explanation

A solution is defined as a product, service, or system delivered to the customer in SAFe. A solution can be a small mobile application built by a single Agile Release Train (ART) or a large automotive system of systems built by a network of Development Value Streams (DVSs) in a supply chain¹. A solution may also be an insurance or banking product offered by a financial institution. Solutions can be the products a company sells or the internal products they use to run the business. They may provide direct value to an end-user or may be a component of a larger solution¹.
