Pass Guaranteed Quiz High-quality Salesforce - New Salesforce-MuleSoft-Developer-I Braindumps Ebook

Our Salesforce-MuleSoft-Developer-I practice prep boosts varied functions to be convenient for you to master the Salesforce-MuleSoft-Developer-I training materials and get a good preparation for the exam and they include the self-learning function, the self-assessment function, the function to stimulate the exam and the timing function. We provide 24-hours online on Salesforce-MuleSoft-Developer-I Guide prep customer service and the long-distance professional personnel assistance to the client. If clients have any problems about our study materials and we will solve the client's Salesforce-MuleSoft-Developer-I problems as quickly as we can.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q225-Q230):

NEW QUESTION # 225

An API implementation has been deployed to CloudHub and now needs to be governed. IT will not allocate additional vCore for a new Mule application to act as an API proxy.

What is the next step to preserve the current vCore usage, but still allow the Mule application to be managed by API Manager?

- A. Modify the API implementation to use auto-discovery to register with API Manager

- B. Register the same API implementation in Runtime Manager to connect to API Manager
- C. Deploy the same API implementation behind a VPC and configure the VPC to connect to API Manager
- D. Upload the Mule application's JAR file to the API instance in API Manager

Answer: A

Explanation:

Correct answer is Modify the API implementation to use auto-discovery to register with API Manager API Autodiscovery. Configuring autodiscovery allows a deployed Mule runtime engine (Mule) application to connect with API Manager to download and manage policies and to generate analytics data. Additionally, with autodiscovery, you can configure your Mule applications to act as their own API proxy.

When autodiscovery is correctly configured in your Mule application, you can say that your application's API is tracked by (green dot) or paired to API Manager. You can associate an API in a Mule setup with only one autodiscovery instance at a given time. MuleSoft Doc Ref: <https://docs.mulesoft.com/api-manager/2.x/api-auto-discovery-new-concept>

NEW QUESTION # 226

Refer to the exhibits.

```

<flow name="chooseRegion" >
  <scheduler doc:name="Scheduler" >
    <scheduling-strategy >
      <fixed-frequency frequency="5000"/>
    </scheduling-strategy>
  </scheduler>
  <set-payload value='#[\"REGION\"]' doc:name="REGION" />
  <choice doc:name="Choice" >
    <when expression='#[not isEmpty(payload)]' >
      <set-payload value='#[\"US\"]' doc:name="US" />
    </when>
    <when expression='#[payload is String]' >
      <set-payload value='#[\"EU\"]' doc:name="EU" />
    </when>
    <otherwise>
      <logger level="INFO" doc:name="payload" message="#[payload]" />
    </otherwise>
  </choice>
  <logger level="INFO" doc:name="payload" message="#[payload]" />
</flow>

```

A Mule application contains a Choice router. What is logged when the flow completes?

- A. ["US", "EU"]
- B. EU
- C. US
- D. "REGION"

Answer: C

NEW QUESTION # 227

Correct answer is {customerID}.

- A. var toUpper(userName) -> upper(userName)
- B. fun toUpper(userName) -> upper(userName)
- C. **fun toUpper(userName) = upper(userName)**
- D. var toUpper(userName) = upper(userName)

Answer: C

Explanation:

Reference:<https://docs.mulesoft.com/http-connector/1.5/http-listener-ref> A function named toUpper needs to be defined that accepts a string named userName and returns the string in uppercase.

What is the correct DW code to define the toUpper function?

NEW QUESTION # 228

Refer to the exhibits.

As a mulesoft developer, what you would change in Database connector configuration to resolve this error?

```
ERROR 2021-07-04 09:30:38,737 [[MuleRuntime].uber.11: [mule_app].uber@org.mule.runtime.module.extension.internal.runtime.source.ExtensionMessageSource.lam

```

- A. Configure the correct table name
- B. **Configure the correct JDBC driver**
- C. Configure the correct database name
- D. Configure the correct host URL

Answer: B

Explanation:

Correct answer is Configure the correct JDBC driver as error message suggests the same

* Caused by: java.sql.SQLException: Error trying to load driver: com.mysql.jdbc.Driver:

Cannot load class 'com.mysql.jdbc.Driver':

* Class'com.mysql.jdbc.Driver'has no package mapping for region'domain/default/app/mule_app'.

* Cannot load class 'com.mysql.jdbc.Driver':

NEW QUESTION # 229

Refer to the exhibit.

The Mule application is debugged in Anypoint Studio and stops at the breakpoint. What is the value of the payload displayed in the debugger at this breakpoint?

- A. "Start"
- B. "Processing"
- C. 0
- D. Complete"

Answer: A

NEW QUESTION # 230
