IT업계 취업 준비생이라면 국제적으로도 승인받는 IT인증자격증 정도는 몇개 취득해야 하지 않을까 싶습니다.

Oracle인증 1Z0-1123-25시험을 통과하여 인기 자격증을 취득하시면 취업경쟁률이 제고되어 취업이 쉬워집니다.

KoreaDumps의Oracle인증 1Z0-1123-25덤프는 많은 시험본 분들에 의해 검증된 최신 최고의 덤프공부자료입니다.망설이지 마시고KoreaDumps제품으로 한번 가보세요.

Oracle 1Z0-1123-25 시험요강:

주제	소개
주제 1	• Migrate Infrastructure Workloads Between OCI Regions: This section assesses the skills of Cloud Operations Engineers in managing workload replication across OCI regions. It covers OCI Object Storage Replication, Block Volume Replication, and File System Replication to ensure business continuity. Additionally, candidates will learn how to design and implement full-stack disaster recovery strategies using OCI Full Stack Disaster Recovery Service to minimize downtime and data loss.
주제 2	• OCI Networking Services for Migrations: This section evaluates the knowledge of Cloud Network Architects in utilizing OCI networking services for cloud migrations. It covers the fundamentals of OCI networking, including Virtual Cloud Networks (VCN), subnets, gateways, and connectivity options. The focus is on ensuring secure and optimized networking configurations that support smooth data migration and integration between on-premises and OCI environments.
주제 3	• Migrate Containerized Applications to OCI: This section evaluates the expertise of Cloud DevOps Engineers in migrating containerized applications to Oracle Cloud Infrastructure. It introduces the fundamentals of OCI Container Engine for Kubernetes and Oracle Cloud Infrastructure Registry. Candidates will learn the key phases involved in migrating containerized workloads and ensuring proper orchestration and scaling within the OCI ecosystem.

1Z0-1123-25합격보장 가능 덤프자료, 1Z0-1123-25최신 업데이트 시험대비 자료

우리KoreaDumps 사이트에Oracle 1Z0-1123-25관련자료의 일부 문제와 답 등 문제들을 제공함으로 여러분은 무료로 다운받아 체험해보실 수 있습니다. 여러분은 이것이야 말로 알맞춤이고, 전면적인 여러분이 지금까지 갖고 싶었던

문제집이라는 것을 느끼게 됩니다.

최신 Oracle Cloud Infrastructure 1Z0-1123-25 무료샘플문제 (Q18-Q23):

질문 # 18

Which is NOT a valid connectivity model in Oracle Cloud Infrastructure (OCI) FastConnect?

- A. FastConnect: With an Oracle Partner
- B. FastConnect: With a Third-Party Provider
- C. FastConnect: Colocation with Oracle
- D. FastConnect: Direct-to-Cloud

정답: D

설명:

FastConnect: Direct-to-Cloud is not a valid connectivity model in Oracle Cloud Infrastructure (OCI) FastConnect. This option does not align with the available methods for establishing connectivity through FastConnect.

질문 # 19

As an application developer deploying containerized applications, in which scenario would you most likely choose Oracle Cloud Infrastructure Container Engine for Kubernetes (OKE) over Oracle Cloud Infrastructure Registry (OCIR)?

- A. When a private container registry is required for internal use, and the need to store, share, and manage container images is prioritized
- B. When there is a need for a managed container orchestration service for automatic scaling, upgrades, and security patching
- C. When there is a need for a platform with serverless capabilities to efficiently run containerized workloads
- D. When there is a need to store, share, and manage container images with a highly available and scalable architecture

정답: B

설명:

Oracle Cloud Infrastructure Container Engine for Kubernetes (OKE) is a managed container orchestration service that provides automatic scaling, upgrades, and security patching for containerized applications. It is ideal for scenarios where there is a need for a fully managed Kubernetes environment to deploy and manage containerized workloads.

질문 # 20

What is the primary purpose of the Oracle Cloud Balancer or OCI Native Ingress Controller during the implementation phase of Oracle Cloud Infrastructure Container Engine for Kubernetes (OKE) workloads?

- A. Conduct comprehensive testing and monitor performance metrics
- B. Efficiently manage packages with Helm charts
- C. Gradually shift traffic from the source environment to OKE
- D. Expose running workloads internally and externally

정답: D

설명:

Exposing running workloads internally and externally is the main purpose of the Oracle Cloud Balancer or OCI Native Ingress Controller during the implementation phase of OKE workloads. These tools help manage incoming traffic and route it to the appropriate services within the Kubernetes cluster.

질문 # 21

As an OCI architect, you are designing a cloud environment to accommodate an on-premises Data Center workload, which currently has a memory oversubscription ratio of 2:1. The ratio means the total physical memory of the on-premises servers is 100 GB, and the virtual memory allocated is 200 GB. Upon source discovery, you discovered the actual physical memory utilization is below 50%. Which memory allocation strategy should you consider for the Bare Metal instances in OCI to optimize oversubscription, applying the actual utilization?

- A. Bare Metal instances with total 150 GB of physical memory, providing a middle ground that acknowledges the oversubscription in on-premises
- B. Bare Metal instances with total 75 GB of physical memory, considering the actual utilization in physical memory
- C. Bare Metal instances with total 200 GB of physical memory to match the on-premises virtual memory allocation
- D. Bare Metal instances with total 250 GB of physical memory, anticipating potential spikes in memory demand

정답: B

설명:

Allocating Bare Metal instances with a total physical memory of 75 GB, considering the actual utilization in physical memory, is the most suitable strategy to optimize oversubscription. It aligns with the goal of optimizing resource allocation based on the discovered utilization, ensuring efficient use of resources in the cloud environment.

질문 # 22

Your organization is in the stage of planning a migration of on-premises workloads to Oracle Cloud Infrastructure (OCI) using Oracle Cloud Migrations (OCM). As a migration architect, you are setting up the service to discover workloads. The initial step in this process involves the creation of Asset Source. Which statement accurately describes Asset Source?

- A. Consists of credentials and connectivity details required by OCM to access and communicate with the on-premises environment
- B. Is a remote virtual appliance deployed in the on-premises environment for discovery purposes
- C. Provides real-time cost analysis and optimization recommendations for assets during the migration planning phase
- D. Represents a repository within OCI where migrated assets are temporarily stored before being deployed into their final configuration

정답: A

설명:

Asset Source in OCM consists of the necessary credentials and connectivity details that allow OCM to access and communicate with the on-premises environment. This information is crucial for OCM to discover and assess the workloads that need to be migrated to OCI.

질문 # 23

.....

IT업계에 종사하는 분들은 치열한 경쟁을 많이 느낄것입니다. 치열한 경쟁속에서 자신의 위치를 보장하는 길은 더 많이 배우고 더 많이 노력하는것 뿐입니다.국제적으로 인정받은 IT인증자격증을 취득하는것이 제일 중요한 부분이 아닌가 싶기도 합니다. 다른 분이 없는 자격증을 내가 소유하고 있다는 생각만 해도 뭔가 안전감이 느껴지지 않나요? 더는 시간낭비하지 말고 KoreaDumps의 Oracle인증 1Z0-1123-25덤프로 Oracle인증 1Z0-1123-25시험에 도전해 보세요.
