## Trust Certified GH-100 Questions, Pass The GitHub Administration

In order to cater to different needs of customers, three versions for GH-100 training materials are available, you can choose the most suitable one in accordance with your own needs. GH-100 PDF version is printable, and if you prefer a hard one, you can choose this version. GH-100 Soft test engine supports MS operating system, and it can install in more than 200 computers. GH-100 Online Test engine is convenient and easy to learn, you can have offline practice if you want. GH-100 Online soft test engine supports all web browsers and it has testing history and performance review, and you can have a general review of what you have learnt before next learning.

## Microsoft GitHub Administration Sample Questions (Q51-Q56):

### NEW QUESTION # 51

A team member is unable to push to a repository due to a 403-error related to branch protection. What should the GitHub Enterprise administrator do first?

- A. Raise a GitHub Support request for permissions issues
- **B. Check the user's permissions and rulesets applied to the branch**
- C. Remove the user from the team and re-add them
- D. Revert the branch to an earlier state

**Answer: B**

Explanation:

The administrator should first review the user's repository role and the branch protection rules applied to that branch. A 403 error on push almost always indicates that the user either lacks the necessary write permissions or is not listed among the actors authorized by the branch protection settings.

#### NEW QUESTION # 52

Which of the following is the responsibility of a Team Maintainer in a GitHub organization? (Choose two.)

- A. Deleting repositories assigned to the team.
- **B. Adding or removing team members.**
- **C. Managing nested sub-teams.**
- D. Modifying organization-wide settings.

**Answer: B,C**

Explanation:

Team maintainers can manage nested sub-teams - requesting to add or change parent/child teams within the organization's hierarchy. Team maintainers have permission to add and remove members from their team, controlling day-to-day team membership.

#### NEW QUESTION # 53

When a user becomes a member of multiple GitHub organizations, which THREE of the following are important considerations for administrators? (Choose three.)

- **A. The user will have different permission levels in each organization.**
- **B. The user will need to authorize credentials separately for each SAML-enabled organization.**
- C. The user's personal repositories will become accessible to all organizations.
- **D. The user's repository access and/or team membership needs to be managed separately for each organization.**
- E. The user will automatically have the same role across all organizations.
- F. The user's profile information becomes private to non-organization members.

**Answer: A,B,D**

Explanation:

A user's repository access and team memberships are scoped to each organization, so admins must configure permissions separately per org.

When an organization enforces SAML SSO, each member must authorize their personal access tokens or SSH keys for that org, requiring separate approval for each SAML-enabled organization. Roles and permission levels (owner, member, billing manager, repository roles, etc.) are assigned on a per-organization basis, so a user often has different permissions in different organizations.

#### NEW QUESTION # 54

You need to create a support bundle for your GitHub Enterprise Server instance with the hostname ghe.avocado.corp. What command should you use to create a support bundle?

- A. `curl -u admin https://ghe.avocado.corp/diagnostics/support-bundle.tgz -o`
- **B. `ssh -p 122 admin@ghe.avocado.corp -- 'ghe-support-bundle -o' > support-bundle.tgz`**
- C. `ssh -p 122 admin@ghe.avocado.corp -- 'ghe-config generate-support-bundle' > support-bundle.tgz`
- D. `ssh -p 122 admin@ghe.avocado.corp - 'ghe-diagnostics' > support-bundle.tgz`

**Answer: B**

Explanation:

Run the `ghe-support-bundle` command over SSH on your appliance and redirect its output to a file. For example:

`ssh -p 122 admin@ghe.avocado.corp -- 'ghe-support-bundle -o' > support-bundle.tgz` This invokes the built-in support-bundle utility on your GitHub Enterprise Server instance and captures the resulting archive locally.

#### NEW QUESTION # 55

Which practice helps avoid service disruption when consuming GitHub APIs at scale?

- A. Using multiple tokens to bypass limits
- B. Caching all API responses permanently
- C. Designing your application to work within GitHub's rate limits
- D. Ignoring secondary rate limits

**Answer: C**

Explanation:

Designing your integration to stay within GitHub's documented rate limits-by batching requests, using conditional requests, handling 429 responses with back-off, and monitoring the X-RateLimit-\* headers - ensures you won't be temporarily throttled or cut off when you hit secondary limits.

## NEW QUESTION # 56

.....

If you can obtain the job qualification GH-100 certificate, which shows you have acquired many skills. In this way, your value is greatly increased in your company. Then sooner or later you will be promoted by your boss. Our GH-100 preparation exam really suits you best.
