

300-445 Exam Bootcamp & 300-445 Latest Dumps & 300-445 Study Materials

DOWNLOAD the newest TestPassed 300-445 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1izeNkinRHQU5kMi64v3N_a7-wl7B1oa7

Perhaps you have had such an unpleasant experience about what you brought in the internet was not suitable for you in actual use, to avoid this, our company has prepared 300-445 free demo in this website for our customers. The content of the free demo is part of the content in our real 300-445 study guide. Therefore, you can get a comprehensive idea about our real study materials. All you need to do is just to find the "Download for free" item, and you will find there are three kinds of versions of 300-445 Learning Materials for you to choose from namely, PDF Version Demo, PC Test Engine and Online Test Engine, you can choose to download any one as you like.

We have thousands of satisfied customers around the globe so you can freely join your journey for the Designing and Implementing Enterprise Network Assurance (300-445) certification exam with us. TestPassed also guarantees that it will provide your money back if in any case, you are unable to pass the Cisco 300-445 Exam but the terms and conditions are there that you must have to follow.

Simulator For 300-445 Certification Exams

Achieving the Designing and Implementing Enterprise Network Assurance (300-445) certification can significantly impact your career progression and earning potential. This certification showcases your expertise and knowledge to employers, making you a valuable asset in the Cisco 300-445 industry. With the rapidly evolving nature of the Cisco world, staying up-to-date with the latest technologies and trends is crucial. The 300-445 Certification Exam enables you to learn these changes and ensures you remain current in your field.

Cisco 300-445 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Insights and Alerts: This domain addresses configuring alert rules based on network conditions and end-user experience factors. It covers selecting metrics for stakeholders, validating alerts, and recommending network optimization for capacity planning.
Topic 2	<ul style="list-style-type: none">Data Collection Implementation: This domain focuses on deploying enterprise and endpoint agents across infrastructure and end-user devices. It covers configuring network, DNS, voice, web, and endpoint tests using ThousandEyes and Meraki Insights, along with implementing synthetic web tests and authentication methods.

Topic 3	<ul style="list-style-type: none"> • Data Analysis: This domain encompasses diagnosing network issues like packet loss, congestion, routing and jitter, plus end-device problems. It includes analyzing web application performance and identifying security threats such as DDoS attacks, DNS hijacking, and BGP hijacking.
Topic 4	<ul style="list-style-type: none"> • Platforms and Architecture: This domain covers understanding monitoring agent types and placement, active versus passive monitoring, and ThousandEyes WAN Insights. It addresses Cisco platform integrations, metric baselines, and selecting appropriate integration methods and assurance platforms based on business requirements.

Cisco Designing and Implementing Enterprise Network Assurance Sample Questions (Q117-Q122):

NEW QUESTION # 117

You want to create an endpoint label that automatically includes all Endpoint Agents connected to your corporate network. If your agents are named using the format agentname-network, what filter would you use in the hostname field to achieve this?

- A. -corporate
- B. There is no wildcard configuration available
- C. agentname-
- D. agent*corporate

Answer: A

Explanation:

In the Designing and Implementing Enterprise Network Assurance (300-445 ENNA) framework, managing a large-scale deployment of Endpoint Agents requires efficient categorization through Agent Labels. Agent labels are used to group agents for targeted test assignment and data filtering based on specific attributes like location, OS, or naming conventions. ThousandEyes supports the use of wildcards (specifically the * symbol) within label filters to allow for dynamic and scalable grouping. In this scenario, the organization has adopted a naming convention of agentname-network. To capture all agents connected to the "corporate" network regardless of the unique agentname prefix, the engineer should use the filter *-corporate (Option A) in the hostname or agent name field. The asterisk functions as a placeholder for any string of characters, ensuring that any agent ending with "-corporate" is automatically added to the label as soon as it registers with the ThousandEyes platform.

NEW QUESTION # 118

Refer to the exhibit. An engineer works to optimize a website by reducing the page-load time to below 500 ms. The engineer set up a Cisco ThousandEyes page-load test to baseline the current website performance. Which action should be recommended to reduce page-load time?

- A. Implement lazy loading for objects on the page.
- B. Use a CDN to load fonts faster.
- C. Optimize the AJAX query calling functions.
- D. Move IMG elements to the bottom of the document body.

Answer: A

Explanation:

The page breakdown shows that images dominate the total load size, contributing most to the 1023 ms page-load time. Implementing lazy loading defers loading images until they are needed, significantly reducing initial load time and helping bring total page-load time under the target threshold.

NEW QUESTION # 119

Which monitoring method involves continuously probing network elements to assess their availability and responsiveness?

- A. Synthetic monitoring
- B. Passive monitoring
- C. Active monitoring
- D. Dynamic monitoring

Answer: C

Explanation:

Active monitoring involves continuously probing network elements to assess their availability and responsiveness in real-time.

NEW QUESTION # 120

Enterprise agents installed on application servers primarily help in monitoring what aspect of network performance?

- A. Data breach attempts
- B. Server uptime
- C. Physical server security
- D. Application response time

Answer: D

NEW QUESTION # 121

Route leaking is best identified through which of the following techniques?

- A. Application whitelisting
- B. Antivirus scanning
- C. Password strength testing
- D. BGP route analysis

Answer: D

NEW QUESTION # 122

.....

If you are preparing for the Cisco 300-445 exam dumps our 300-445 Questions help you to get high scores in your Cisco 300-445 exam. Test your knowledge of the Cisco 300-445 Exam Dumps with TestPassed Cisco 300-445 practice questions. The software is designed to help with Cisco 300-445 exam dumps preparation.
