During the Discover Phase, SAP recommends defining the system conversion strategy. This includes analyzing the existing system landscape, determining conversion prerequisites, and defining the overall approach for technical and functional conversion activities.

Other options:

* B. Create a cutover plan: Defined during the Deploy Phase.

- B. Process models
- C. Key business decisions
- D. Detailed design of extensions
- E. Confirmation of scope

Answer: B,C,E

Explanation:

During the Explore Phase of the SAP Activate methodology, Fit-to-Standard workshops are conducted to validate the predefined SAP Best Practices business processes against the customer's business requirements.

The goal is to confirm the project scope, identify necessary configurations, and document key decisions and findings.

A). Detailed design of extensions

Detailed design activities are not part of the Explore Phase. These tasks are performed later during the Realize Phase, after the Fit-to-Standard workshops have been completed and the requirements have been validated.

Therefore, documenting detailed extension designs does not occur at this stage.

B). Key user documentation

Key user documentation is created later in the project, typically during testing or training preparation phases.

It is not an output of the Fit-to-Standard workshops and is therefore not documented during the Explore Phase.

C). Confirmation of scope

Confirmation of scope is a critical output of the Fit-to-Standard workshops. During these sessions, the project team verifies which SAP Best Practices processes are in scope and confirms that the defined scope aligns with the agreed project objectives. Any deviations or required adjustments are documented for follow-up.

D). Key business decisions

Fit-to-Standard workshops also result in documenting key business decisions that affect how standard processes will be used or adapted. These include process ownership decisions, master data responsibilities, and whether certain optional features or process variants will be implemented.

E). Process models

The business process models from SAP Best Practices are reviewed and discussed in the workshops. Any required adjustments, confirmations, or accepted changes are documented to ensure a clear understanding of the end-to-end processes to be implemented.
