### NEW QUESTION # 290

#### Task 12

you need to create a Microsoft 365 group named TeamsAdmin that can manage Teams Phone configurations without being able to manage teams and channels.

#### Answer:

##### Explanation:

To create a Microsoft 365 group named TeamsAdmin that can manage Teams Phone configurations without being able to manage teams and channels, you need to use PowerShell to create the group and assign the Teams Communications Administrator role to it. Here are the steps to follow:

\* Install the Azure Active Directory PowerShell for Graph module by running the following cmdlet:

```
Install-Module -Name AzureAD
```

\* Connect to Azure Active Directory by running the following cmdlet and entering your Microsoft 365 username and password:

```
Connect-AzureAD
```

Create a new Microsoft 365 group named TeamsAdmin by running the following cmdlet:  

```
New-AzureADMSGroup -DisplayName "TeamsAdmin" -Description "Group for managing Teams Phone configurations" -MailEnabled $false -MailNickName "TeamsAdmin" -SecurityEnabled $true -GroupTypes "Unified"
```

\* Get the object ID of the new group by running the following cmdlet:

```
Get-AzureADMSGroup -Filter "DisplayName eq 'TeamsAdmin'"
```

\* Copy the object ID from the output and assign it to a variable, such as \$groupID, by running the following cmdlet:

```
$groupID = "your-object-id"
```

Install the Microsoft Teams PowerShell module by running the following cmdlet:

```
Install-Module -Name MicrosoftTeams
```

\* Connect to Microsoft Teams by running the following cmdlet and entering your Microsoft 365 username and password:

```
Connect-MicrosoftTeams
```

\* Get the role ID of the Teams Communications Administrator role by running the following cmdlet:

```
Get-CsOnlineRole -Identity "Teams Communications Administrator"
```

\* Copy the role ID from the output and assign it to a variable, such as \$roleID, by running the following cmdlet:

```
$roleID = "your-role-id"
```

\* Assign the Teams Communications Administrator role to the TeamsAdmin group by running the following cmdlet:

```
New-CsOnlineRoleAssignment -SecurityGroupId $groupID -RoleDefinitionName $roleID
```

Now, you have created a Microsoft 365 group named TeamsAdmin that can manage Teams Phone configurations without being able to manage teams and channels. You can add members to this group by using the Azure Active Directory admin center or PowerShell.

### NEW QUESTION # 291

You have a Microsoft 365 subscription that uses Microsoft Teams.

You need to identify the following information:

\* The number of chat messages sent during the past 30 days

\* The number of messages posted in specific channels during the past 90 days Which reports should use? To answer, drag the appropriate reports to the correct pieces of information. Each report may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

#### Reports

Apps usage
