## Latest FCSS\_SASE\_AD-24 Dumps Ebook & Trustworthy FCSS\_SASE\_AD-24 Source

Want to crack the Fortinet FCSS\_SASE\_AD-24 certification test in record time? Look no further than DumpsQuestion! Our updated FCSS\_SASE\_AD-24 Dumps questions are designed to help you prepare for the exam quickly and effectively. With study materials available in three different formats, you can choose the format that works best for you. Trust DumpsQuestion to help you pass the Fortinet FCSS\_SASE\_AD-24 Certification test with ease.

## Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q18-Q23):

### NEW QUESTION # 18

Which two statements describe a zero trust network access (ZTNA) private access use case? (Choose two.)

- A. All TCP-based applications are supported.
- B. All FortiSASE user-based deployments are supported.
- C. Data center redundancy is offered.
- D. The security posture of the device is secure.

**Answer: A,D**

Explanation:

Zero Trust Network Access (ZTNA) private access use cases focus on providing secure and controlled access to private applications without exposing them to the public internet. The following two statements accurately describe ZTNA private access use cases:

- \* The security posture of the device is secure (Option A): ZTNA enforces strict access controls based on the principle of least privilege. Before granting access to private applications, ZTNA evaluates the security posture of the device (e.g., whether it is patched, compliant, and free of malware). Only devices that meet the required security standards are granted access, ensuring that the device is secure before allowing private access.
- \* All TCP-based applications are supported (Option C): ZTNA supports all TCP-based applications, enabling secure access to a wide range of private applications, including legacy systems and custom-built applications. This flexibility makes ZTNA suitable for organizations with diverse application environments.

Here's why the other options are incorrect:

- \* B. All FortiSASE user-based deployments are supported: While FortiSASE supports various deployment scenarios, not all user-based deployments are automatically compatible with ZTNA.

Specific configurations and requirements must be met to enable ZTNA functionality.

- \* D. Data center redundancy is offered: Data center redundancy is unrelated to ZTNA private access use cases. Redundancy typically pertains to infrastructure design and failover mechanisms, not access control methodologies like ZTNA.

#### NEW QUESTION # 19

A customer wants to upgrade their legacy on-premises proxy to a cloud-based proxy for a hybrid network. Which two FortiSASE features would help the customer achieve this outcome? (Choose two.)

- A. Zero trust network access (ZTNA)
- B. Digital experience monitoring (DEM)
- C. Secure web gateway (SWG)
- D. Inhne-CASB

Answer: C,D

#### NEW QUESTION # 20

Which event log subtype captures FortiSASE SSL VPN user creation?

- A. Administrator Events
- B. VPN Events
- C. User Events
- D. Endpoint Events

Answer: C

Explanation:

The event log subtype that captures FortiSASE SSL VPN user creation is User Events. This subtype is specifically designed to log activities related to user management, such as creating, modifying, or deleting user accounts. When an SSL VPN user is created, it falls under this category because it involves adding a new user to the system.

Here's why the other options are incorrect:

- \* A. Endpoint Events: These logs pertain to activities related to endpoint devices, such as device registration, compliance checks, or security posture assessments. SSL VPN user creation is unrelated to endpoint events.

- \* B. VPN Events: These logs capture activities related to VPN connections, such as session establishment, termination, or errors. While SSL VPN usage generates VPN events, the creation of a user account itself is not logged under this subtype.

- \* D. Administrator Events: These logs track actions performed by administrators, such as configuration changes or policy updates. While an administrator might create the SSL VPN user, the specific event of user creation is categorized under User Events, not Administrator Events.

## NEW QUESTION # 21

Which two advantages does FortiSASE bring to businesses with multiple branch offices?  
(Choose two.)

- A. It offers centralized management for simplified administration.
- B. It enables seamless integration with third-party firewalls.
- C. it offers customizable dashboard views for each branch location
- D. It eliminates the need to have an on-premises firewall for each branch.

**Answer: A,D**

Explanation:

FortiSASE brings the following advantages to businesses with multiple branch offices:

Centralized Management for Simplified Administration:

FortiSASE provides a centralized management platform that allows administrators to manage security policies, configurations, and monitoring from a single interface. This simplifies the administration and reduces the complexity of managing multiple branch offices.

Eliminates the Need for On-Premises Firewalls:

FortiSASE enables secure access to the internet and cloud applications without requiring dedicated on-premises firewalls at each branch office.

This reduces hardware costs and simplifies network architecture, as security functions are handled by the cloud-based FortiSASE solution.

## NEW QUESTION # 22

Refer to the exhibit. To allow access, which web filter configuration must you change on FortiSASE?

□

- A. FortiGuard category-based filter
- B. inline cloud access security broker (CASB) headers
- C. URL Filter
- D. content filter

**Answer: D**

Explanation:

To allow access to the URL blocked due to a banned word ("fight" in this case), you need to change the content filter configuration in FortiSASE.

The content filter checks the content within URLs and blocks access based on specific keywords or phrases. Since the block was triggered by the word "fight," modifying the content filter settings to either remove this word from the banned list or adjust the filtering criteria would allow access to the URL.

## NEW QUESTION # 23

.....

The Fortinet PDF Questions format designed by the DumpsQuestion will facilitate its consumers. Its portability helps you carry on with the study anywhere because it functions on all smart devices. You can also make notes or print out the FCSS - FortiSASE 24 Administrator (FCSS\_SASE\_AD-24) pdf questions. The simple, systematic, and user-friendly Interface of the FCSS - FortiSASE 24 Administrator (FCSS\_SASE\_AD-24) PDF dumps format will make your preparation convenient.
