

# Providing You High Pass-Rate NSE4\_FGT\_AD-7.6 Instant Access with 100% Passing Guarantee

## Use Fortinet NSE4\_FGT-7.2 Dumps To Overcome Exam Anxiety

Certification plays a crucial role in the IT world. It validates your skills and knowledge, enhances your career prospects, and opens doors to high-paying jobs. However, the path to exam success has multiple challenges. Applicants for the test often face obstacles such as limited time for preparation, difficulty in finding updated Network Security Professional practice questions, and uncertainty about the pattern of the real Fortinet NSE 4 - FortiOS 7.2 exam. At BrainDumpsStore, we understand these struggles and have designed an exam product that addresses them. We believe that every student has a unique learning style, and catering to their diverse study needs is essential. That's why BrainDumpsStore has launched three formats of NSE 4 exam study material: Network Security Professional PDF document of actual Fortinet NSE 4 - FortiOS 7.2 questions, desktop practice exam software, and web-based Fortinet NSE 4 - FortiOS 7.2 practice exam software. By introducing these three formats of real NSE 4 **NSE4\_FGT-7.2 Dumps**, we ensure that test candidates with different study styles can effectively prepare for the final exam. Let's discuss the features of our three formats.

### Real Fortinet NSE4\_FGT-7.2 Dumps PDF Format

The Network Security Professional exam PDF format of BrainDumpsStore is a versatile and widely accessible option for certification test preparation. Our NSE 4 NSE4\_FGT-7.2 dumps PDF file carries actual NSE 4 exam questions that can be easily downloaded and read on laptops, tablets, and smartphones. This compatibility of NSE 4 Dumps PDF format with smart devices enables you to prepare for the exam anytime, anywhere, without the need for an internet connection. Additionally, the Network Security Professional PDF format offers the convenience of printing valid Fortinet NSE 4 - FortiOS 7.2 exam questions, allowing you to have a physical copy for off-screen test preparation or annotation.

UpdateDumps is a reliable study center providing you the valid and correct NSE4\_FGT\_AD-7.6 questions & answers for boosting up your success in the actual test. NSE4\_FGT\_AD-7.6 PDF file is the common version which many candidates often choose. If you are tired with the screen for study, you can print the NSE4\_FGT\_AD-7.6 Pdf Dumps into papers. With the pdf papers, you can write and make notes as you like, which is very convenient for memory. We can ensure you pass with Fortinet study torrent at first time.

Our company have the higher class operation system than other companies, so we can assure you that you can start to prepare for the NSE4\_FGT\_AD-7.6 exam with our study materials in the shortest time. In addition, if you decide to buy NSE4\_FGT\_AD-7.6 exam materials from our company, we can make sure that your benefits will far exceed the costs of you. The rate of return will be very obvious for you. We sincerely reassure all people on the NSE4\_FGT\_AD-7.6 Test Question from our company and enjoy the benefits that our study materials bring. We believe that our study materials will have the ability to help all people pass their NSE4\_FGT\_AD-7.6 exam and get the related exam in the near future.

## New NSE4\_FGT\_AD-7.6 Test Fee, Practice NSE4\_FGT\_AD-7.6 Exams

Our NSE4\_FGT\_AD-7.6 quiz torrent can help you get out of trouble regain confidence and embrace a better life. Our NSE4\_FGT\_AD-7.6 exam question can help you learn effectively and ultimately obtain the authority certification of Fortinet, which

will fully prove your ability and let you stand out in the labor market. We have the confidence and ability to make you finally have rich rewards. Our NSE4\_FGT\_AD-7.6 Learning Materials provide you with a platform of knowledge to help you achieve your wishes. Our NSE4\_FGT\_AD-7.6 study materials have unique advantages for you to pass the NSE4\_FGT\_AD-7.6 exam.

## Fortinet NSE4\_FGT\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Routing: This domain covers configuring static routes for packet forwarding and implementing SD-WAN to load balance traffic across multiple WAN links.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Deployment and System Configuration: This domain covers initial FortiGate setup, logging configuration and troubleshooting, FGCP HA cluster configuration, resource and connectivity diagnostics, FortiGate cloud deployments (CNF and VM), and FortiSASE administration with user onboarding.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Content Inspection: This domain addresses inspecting encrypted traffic using certificates, understanding inspection modes and web filtering, configuring application control, deploying antivirus scanning modes, and implementing IPS for threat protection.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Firewall Policies and Authentication: This domain focuses on creating firewall policies, configuring SNAT and DNAT for address translation, implementing various authentication methods, and deploying FSSO for user identification.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• VPN: This domain focuses on implementing meshed or partially redundant IPsec VPN topologies for secure connections.</li></ul>

## Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q111-Q116):

### NEW QUESTION # 111

An administrator configures FortiGuard servers as DNS servers on FortiGate using default settings. What is true about the DNS connection to a FortiGuard server?

- A. It uses UDP 53.
- B. It uses UDP 8888.
- **C. It uses DNS over TLS.**
- D. It uses DNS over HTTPS.

**Answer: C**

Explanation:

When using FortiGuard servers for DNS, FortiOS uses DNS over TLS (DoT) by default to secure the DNS traffic. New FortiGuard DNS servers have been added as primary and secondary servers.

### NEW QUESTION # 112

Refer to the exhibit.

**IPsec tunnel configuration** **FORTINET**

The image shows two screenshots of the FortiGate IPsec configuration interface. The top part shows a diagram of an IPsec tunnel between HQ-NGFW and BR1-FGT. Below are two 'Phase 2 selectors' configuration panels. The left panel is for 'ToBR1' on HQ-NGFW, and the right panel is for 'ToHQ' on BR1-FGT. Both panels show configuration details for encryption, replay detection, PFS, and Diffie-Hellman groups. A watermark 'Updatedumps.com' is visible across the screenshots.

A network administrator is troubleshooting an IPsec tunnel between two FortiGate devices. The administrator has determined that phase 1 status is up, but phase 2 fails to come up. Based on the phase 2 configuration shown in the exhibit, which two configuration changes will bring phase 2 up? (Choose two.)

- A. On BR1-FGT, set Remote Address to 10.0.11.0/255.255.255.0.
- B. On HQ-NGFW, set Encryption to AES256.
- C. On HQ-NGFW, enable Diffie-Hellman Group 2.
- D. On BR1-FGT, set Seconds to 43200

**Answer: A,B**

**Explanation:**

Phase 1 being up confirms the two FortiGate devices can authenticate and build the IKE SA. Phase 2 failing indicates the IPsec (Quick Mode) SA negotiation is failing due to mismatched Phase 2 parameters.

From the exhibit, the Phase 2 mismatches that would prevent SA establishment are:

1) Phase 2 selectors must mirror each other (Proxy IDs)

HQ-NGFW Phase 2 selector shows:

Local: 10.0.11.0/24

Remote: 172.20.1.0/24

BR1-FGT Phase 2 selector shows:

Local: 172.20.1.0/24

Remote: 10.11.0.0/24  does not match HQ's local subnet (10.0.11.0/24)

In FortiOS, Phase 2 comes up only when the peers' selectors (proxy IDs) match as opposite pairs (local on one side = remote on the other).

Fix: A. On BR1-FGT, set Remote Address to 10.0.11.0/255.255.255.0.

2) Phase 2 proposal must match (encryption/authentication)

HQ-NGFW shows encryption AES128 (with SHA1)

BR1-FGT shows encryption AES256 (with SHA1)

For Phase 2 to establish, both peers must have at least one common proposal (same encryption and authentication settings). With one side set to AES128 and the other to AES256, there is no match.

Fix: D. On HQ-NGFW, set Encryption to AES256.

Why the other options are not correct

B . Enable Diffie-Hellman Group 2: The exhibit's mismatch is not resolved by adding DH group 2, and DH group must match when PFS is enabled. This option does not align the peers based on what's shown.

C . Set Seconds to 43200: Phase 2 lifetime mismatches typically do not prevent Phase 2 from coming up (the negotiated lifetime can be adjusted by the peers). The hard blockers here are the selectors and proposal mismatch.

### NEW QUESTION # 113

What are two characteristics of HA cluster heartbeat IP addresses in a FortiGate device?

(Choose two.)

- A. The heartbeat interface of the primary device in the cluster is always assigned IP address 169.254.0.1.
- B. A change in the heartbeat IP address happens when a FortiGate device joins or leaves the cluster.
- C. Heartbeat IP addresses are used to distinguish between cluster members.
- D. Heartbeat interfaces have virtual IP addresses that are manually assigned.

**Answer: B,C**

Explanation:

Heartbeat IP addresses are used to distinguish between cluster members → Each FortiGate in the HA cluster uses unique heartbeat IPs so members can identify one another.

A change in the heartbeat IP address happens when a FortiGate device joins or leaves the cluster → Heartbeat IPs are dynamically reassigned when the cluster membership changes to maintain proper communication.

### NEW QUESTION # 114

An administrator wanted to configure an IPS sensor to block traffic that triggers a signature set number of times during a specific time period.

How can the administrator achieve the objective?

- A. Use IPS filter, rate-mode periodical option.
- B. Use IPS filter, rate-mode periodical option.
- C. Use IPS group signatures, set rate-mode 60.
- D. Use IPS packet logging option with periodical filter option.

**Answer: A**

Explanation:

The IPS filter with the rate-mode set to "periodical" allows the administrator to block traffic that triggers a signature a specified number of times within a defined time period, meeting the requirement.

### NEW QUESTION # 115

Refer to the exhibits. You have implemented the application sensor and the corresponding firewall policy as shown in the exhibits.

You cannot access any of the Google applications, but you are able to access www.fortinet.com

Which two actions would you take to resolve the issue? (Choose two.)

## Application sensor

File filter

SSL inspection  SSL  certificate-inspection

FORTINET

- A. Set SSL inspection to deep-content inspection.
- B. Move up Google in the Application and Filter Overrides section to set its priority to 1.
- C. Add \*Google\*.com to the URL category in the security profile.
- D. Set the action for Google in the Application and Filter Overrides section to Allow.
- E. Change the Inspection mode to Flow-based.

**Answer: A,B**

Explanation:

Move up Google in the Application and Filter Overrides section to set its priority to 1.

The "Excessive-Bandwidth" filter has a higher priority (1) and is configured to Block. Because Google applications generate significant bandwidth, they match this rule first and get blocked.

Moving the "Google" filter to priority 1 ensures that the monitor action for Google is applied before the block rule.

Set SSL inspection to deep-content inspection.

Google applications use HTTPS encryption, so the FortiGate cannot identify or control them unless SSL traffic is decrypted.

Changing from certificate-inspection (which only inspects certificates) to deep-inspection allows FortiGate to fully analyze encrypted application traffic and properly apply the Application Control rules.

## NEW QUESTION # 116

.....

UpdateDumps is the best catalyst to help IT personage be successful. Many people who have passed some IT related certification exams used our UpdateDumps's training tool. Our UpdateDumps expert team use their experience for many people participating in Fortinet certification NSE4\_FGT\_AD-7.6 exam to develop the latest effective training tools, which includes Fortinet NSE4\_FGT\_AD-7.6 Certification simulation test, the current exam and answers. Our UpdateDumps's test questions and answers have 95% similarity with the real exam. With UpdateDumps's training tool your Fortinet certification NSE4\_FGT\_AD-7.6 exams can be easy passed.
