## Salesforce Certified Platform App Builder Sample Questions (Q65-Q70):

### NEW QUESTION # 65

Universal Containers has two teams: Sales and Services. Both teams interact with the same records. Sales users use ten fields on the Account record. Services users use three of the same fields as the Sales team, but also have five of their own, which the sales team does not use. What is the minimum configuration necessary to meet this requirement?

- A. One profile, two record types, one page layout
- B. One profile, one record type, one page layout.
- C. Two profiles, one record type, two page layouts

Explanation- Record types allow you to offer different business processes, picklist values, and page layouts to different users based on their profiles.

- D. Two profiles, two record types, two page layouts

**Answer: D**

#### **NEW QUESTION # 66**

Ann app builder has been to display an overdue date that is two months after a tasks due date. Which approach should the app builder take?

- A. Use process builder and set overdue Date equal to DueDate + 60
- B. Create a formula field using the ADDMONTHS () function
- C. Use process builder and set overdue date equal to DueDate + ((365/12)\*2)
- D. Create a formula field using DueDate + 60

**Answer: D**

#### **NEW QUESTION # 67**

Universal Containers' app builder has been tasked with replacing workflow rules and Apex triggers with Process Builders where possible.

What are two important considerations an app builder should know before the project is started?

Choose 2 answers

- A. Avoid generating infinite loops.
- B. Apex has a different SOQL query limit than Flow.
- C. Combine actions when possible.
- D. Create a process for each workflow rule.

**Answer: A,C**

Explanation:

Before replacing workflow rules and Apex triggers with Process Builders, the app builder should consider avoiding generating infinite loops and combining actions when possible. Infinite loops can occur when a process updates a record that causes another process to run on the same record, and so on. Combining actions can reduce the number of processes and improve performance and maintainability

#### **NEW QUESTION # 68**

The services manager wants to make sure the team enters case priority consistently.

What feature can an app builder use to accomplish this?

- A. Path
- B. Next Best Action
- C. Flow
- D. In-App Guidance

**Answer: A**

Explanation:

Explanation

The best feature to use to ensure consistent case priority entry is Path. Path allows users to see key fields and guidance for each stage of a process, such as a case lifecycle. Path can also enforce data quality by making certain fields required at each stage. See [this article] for more information on Path.

#### **NEW QUESTION # 69**

At Ursa Major Solar, there is a single Lightning record page for the Celestial Bodies custom object; however, there is a Lightning component the app builder wants to restrict to mobile app users.

Which feature on the Lightning app builder should be utilized?

- A. Component visibility filter
  - B. Related list quick links
  - C. Highlights panel
  - D. Chatter feed

**Answer: A**

### Explanation:

Component visibility filter is the feature on the Lightning app builder that should be utilized to restrict a Lightning component to mobile app users. According to the Salesforce documentation, "Use component visibility filters to show or hide components on a record page based on field values or user profile." Chatter feed, highlights panel, and related list quick links are not features for controlling component visibility, but standard components that can be added to a record page.
