

MB-335 Exam Dumps Collection - Valid MB-335 Test Dumps

2026 Latest ExamcollectionPass MB-335 PDF Dumps and MB-335 Exam Engine Free Share: <https://drive.google.com/open?id=1oBiHRParfpL9bsguYHsMo0uWVZbWiLwp>

ExamcollectionPass is a real dumps provider that ensure you pass the different kind of IT exam with offering you exam dumps and learning materials. You just need to use your spare time to practice the MB-335 Real Dumps and remember MB-335 test answers skillfully, you will clear Microsoft practice exam at your first attempt.

Microsoft MB-335 Exam is an essential stepping stone for anyone wishing to pursue a career as a Dynamics 365 Supply Chain Management Functional Consultant Expert. Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification is highly valued in the market, and it demonstrates an individual's proficiency in the latest industry tools and practices. Preparing for MB-335 Exam requires a significant investment of time and effort, but the benefits are well worth it, as it opens up new career opportunities and provides an excellent foundation for continued professional growth.

Pass Guaranteed MB-335 - High Hit-Rate Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Exam Dumps Collection

ExamcollectionPass's experts have simplified the complex concepts and have added examples, simulations and graphs to explain whatever could be difficult for you to understand. Therefore even the average MB-335 exam candidates can grasp all study questions without any difficulty. Additionally, the MB-335 Exam takers can benefit themselves by using our testing engine and get numerous real MB-335 exam like practice questions and answers. They will help them revising the entire syllabus within no time.

Microsoft MB-335 Certification is a highly coveted certification for professionals working in supply chain management. By obtaining this certification, candidates demonstrate their expertise in configuring and managing supply chain processes using Dynamics 365. Moreover, the certification showcases their ability to optimize business processes and enhance customer satisfaction by delivering goods and services efficiently and effectively.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant

Expert Sample Questions (Q55-Q60):

NEW QUESTION # 55

You need to configure costing for raw materials used to manufacture unscented cleaning solution. Which form should you use?

- A. Pricing template
- B. Pricing calculation
- C. Cost basis type
- **D. Quantity and margin template**

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamicsax-2012/quantity-and-margin-template-form?redirectedfrom=MSDN>

* Production is Make to Order and is scheduled at the job level. Products must be manufactured in batches.

* Finished products must be packaged and shipped directly from the warehouse.

* You must be able to calculate the estimated consumption of ingredients and ensure that the amount is divisible by the number of units the raw material is available.

* Formula changes must be reviewed and approved. You must ensure that approved formulas cannot be deleted or edited.

Approved formulas may be deactivated.

* An ingredient used to manufacture unscented cleaning solution is defined as a restricted product. You must be able to automatically print a product safety data sheet (PSDS) with the packing slip for any order that includes unscented cleaning solution.

* Production must be scheduled to start by date and time according to the order that is specified by the production route.

* You must implement a scheduled Kanban rule that meets the following requirements:

o Prevent overloading a work cell for scheduled Kanbans.

o Visualize excess inventory in a supermarket.

o Store products in supermarkets before they are consumed or shipped.

* You must link relevant financial dimension data to the inventory transactions at each site to ensure that you can trace profit and loss figures directly to East site and West site respectively.

* You must set up production operations for sub-contracting of Pine scent and Orange scent solution to VendorA to ensure that a purchase order is automatically created based on estimation of a production order.

Costing

* The price of raw materials used for manufacturing unscented cleaning solution must be tracked based upon commodity exchange pricing. The margin and cost multiplier must be set up for commodity traded raw material.

* You must set up cost calculation groups to ensure that indirect costs that originate in the manufacturing of finished goods are recognized and absorbed into the product cost.

* The production manager needs to set up picking list journals and BOM item consumption.

Reporting

* Production control parameters must be setup for reporting of automatic BOM and Route consumption.

* You must create reports that include information about cost records and categories for items, and calculation formulas for indirect costs.

* You must treat manufactured items as purchased items for cost roll-up purposes during BOM calculations and reporting.

* You must configure automatic route consumption in connection with the automatic running of Report as finished.

Inventory control

You must not be required to track the total number for items when you enter inventory information into the system. Lot numbers for items must be entered when items are picked from inventory.

Issues

Users report the following issues:

* The production manager observes that items are being deducted from inventory two times on production jobs. A shop supervisor mistakenly registers the process for assembling batteries for the pressure washers to Registered as prepared. You must reschedule the process for a future date.

* Customer1 orders 20 barrels of unscented solution. The order is confirmed. Production must be scheduled to start on December 21 to meet the customer's delivery deadline.

* User2 reports that costs for manufactured items are twice as high as expected.

* UserD reports that the formula for the liquid cleaning solution sometimes changes during production. You must enforce the policies regarding formula editing for current and future use.

NEW QUESTION # 56

A manufacturer is implementing Dynamics 365 Supply Chain Management to create blends of oil and industrial lubricant.

The manufacturer requires detailed documentation for the production order process before manufacturing begins for the products.

The shop floor must review, approve, and anticipate all production runs. Before production starts, the manufacturer wants to ensure that the order can be completed by a certain timeframe based on capacity.

You need to define the production life cycle stages.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

□ Explanation

To define the production life cycle stages, you should perform the following actions in sequence:

Create a production order. A production order is a document that authorizes the production of a specific product or product variant in a given quantity on a specific date¹. You can create a production order manually, from a sales order line, or from master planning execution².

Estimate the order. Estimating a production order calculates the material and capacity requirements for the order based on the bill of materials (BOM) and the route³. You can also estimate the cost and revenue of the order based on the planned consumption and output.

Schedule production jobs. Scheduling production jobs determines the start and end dates and times for each operation in the route based on the available capacity, efficiency, and calendar of the resources.

You can use either operations scheduling or job scheduling methods to schedule production jobs.

Release the order. Releasing a production order makes it available for picking, production, and reporting activities. You can release an order manually or automatically based on a release rule that specifies criteria such as site, warehouse, status, priority, or start date.

Generate a picking list. A picking list is a document that lists the materials that must be picked from inventory and consumed for production. You can generate a picking list for an entire production order or for selected jobs or operations within an order.

1: Production process overview 2: Production order lifecycle overview 3: Estimate a production order :

[Estimate cost and revenue for a production order] : [Schedule production jobs] : [Scheduling methods] :

[Release a production order] : [Release rules] : [Picking list overview] : [Generate picking lists]

NEW QUESTION # 57

You need to meet the needs for the large teakwood furniture order.

What must you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□

NEW QUESTION # 58

You need to resolve the production manager issue.

How should you configure manufacturing execution? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
