100% Pass Quiz Authoritative MB-500 - Microsoft Dynamics 365: Finance and Operations Apps Developer Valid Study Notes

Do you want to pass your exam with the least time? If you do, then we will be your best choice. MB-500 training materials are edited and verified by experienced experts in this field, therefore the quality and accuracy can be guaranteed. Besides MB-500 exam materials contain both questions and answers, and it's convenient for you to have a check after practicing. We have online and offline chat service, if you have any questions about MB-500 Training Materials, you can consult us, we will give you reply as quickly as possible.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q236-Q241):

NEW QUESTION # 236

You need to modify the environment to meet User1's requirements.
What should you do?

- A. Create an overlayer of CashDisc in a new project and add the field.
- B. Create an extension of CashDisc in a new project and add the field to the extended table,
- C. Use Open Designer to add the field to the table.
- D. Create a new table named CashDiscExtension in the project.

Answer: B

Explanation:

Explanation

Scenario: A sales manager suspects a data-related issue in the vendor exclusion list. User1 must identify the user who created the referenced exclusion records.

NEW QUESTION # 237

DRAG DROP

You are a Dynamics 365 Finance and Operations developer.

You have a report in an existing model that connects with the following objects:

- * in-memory table
- * data provider class
- * controller class
- * contract class

The report is locked for modifications.

You need to create an extension of the in-memory table in a model and you add the new field to the extension.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Create a duplicate from the report in the model and add the new field on the report design.
- Create an extension of the existing report controller class in the model. Update the class logic to point to the new report.
- Create a duplicate from the existing data provider class in the model. Update the class to fill the value of the newly added field.
- Create a duplicate from the existing report controller class in the model. Update the class logic to point to the new report.
- Create an extension of the existing data provider class in the model. Update the class to fill the value of the newly added field.

Answer Area

Answer:

Explanation:

Actions

- Create a duplicate from the report in the model and add the new field on the report design.
- Create an extension of the existing report controller class in the model. Update the class logic to point to the new report.
- Create a duplicate from the existing data provider class in the model. Update the class to fill the value of the newly added field.
- Create a duplicate from the existing report controller class in the model. Update the class logic to point to the new report.
- Create an extension of the existing data provider class in the model. Update the class to fill the value of the newly added field.

Answer Area

- Create a duplicate from the report in the model and add the new field on the report design.
- Create a duplicate from the existing report controller class in the model. Update the class logic to point to the new report.
- Create an extension of the existing data provider class in the model. Update the class to fill the value of the newly added field.

Explanation/Reference:

NEW QUESTION # 238

You are a Dynamics 365 Finance developer.

A report uses a synchronous call based on a saleID value. There are long wait times for the report to complete printing. You must allow the user to continue to work while the report processes and inform the user immediately when the report completes printing. You need to implement the correct method calls and behavior.

Which code segments should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Code segment or object
Run the form asynchronously.	<ul style="list-style-type: none">element.runAsynch(classNum(CallReport), staticMethodStr(CallReport,RunReport)...Global:runAsynch(classNum(CallReport), staticMethodStr(CallReport,RunReport)...SysOperationSandbox::callStaticMethod(classNum(CallReport), staticMethodStr(CallReport,RunReport)...
Pass parameters to the method.	<ul style="list-style-type: none">data contract classcontainerparm method

Answer:

Explanation:

Requirement	Code segment or object
Run the form asynchronously.	<ul style="list-style-type: none">element.runAsynch(classNum(CallReport), staticMethodStr(CallReport,RunReport)...Global:runAsynch(classNum(CallReport), staticMethodStr(CallReport,RunReport)...SysOperationSandbox::callStaticMethod(classNum(CallReport), staticMethodStr(CallReport,RunReport)...
Pass parameters to the method.	<ul style="list-style-type: none">data contract classcontainerparm method

Explanation

Box 1: element.runAsynch

Box 2: container

NEW QUESTION # 239

You are the Dynamics 365 Finance Developer.
You have the following class definition:

```
class WebShopOrderValidations
{
    public static void checkQtyValue(int Qty = 0)
    {
        ...
    }
}
```

You need to create an extension class and wrap the method by using Chain of Command (CoC), if the value of the Qty variable is less than 5, the code must cause an exception.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
[ExtensionOf(classStr(WebShopOrderValidations))]
```

	▼
final class WebShopOrdVal_Extension	
final class WebShopOrderValidations_MyExtension	
static class WebShopOrderValidationsMy_Extension	
class WebShopOrderValidations_Extension	

```
{
```

	▼
public static void checkQtyValue(int Qty)	
public void checkQtyValue(int Qty)	
public static int checkQtyValue(int Qty)	
public static void checkQtyValue(int Qty = 0)	

```
{
```

```
    next checkQtyValue(Qty);
    if (Qty < 5)
    {
        throw error("Quantity cannot be smaller than 5");
    }
}
```

Answer:

Explanation:

```
[ExtensionOf(classStr(WebShopOrderValidations))]
```

```
final class WebShopOrdVal_Extension
```

```
final class WebShopOrderValidations_MyExtension
```

```
static class WebShopOrderValidationsMy_Extension
```

```
class WebShopOrderValidations_Extension
```

```
{
```

```
public static void checkQtyValue(int Qty)
```

```
public void checkQtyValue(int Qty)
```

```
public static int checkQtyValue(int Qty)
```

```
public static void checkQtyValue(int Qty = 0)
```

```
Microsoft
```

```
next checkQtyValue(Qty);
```

```
if (Qty < 5)
```

```
{
```

```
throw error("Quantity cannot be smaller than 5");
```

```
}
```

Explanation:

Box 1: final class WebShopOrderVal_Extension

Box 2: public static void checkQtyValue(int Qty)

Incorrect Answers:

Public void ...

If a static method is the target that will be wrapped, the method in the extension must be qualified by using the static keyword.

Int Qty=0

The method signature in the wrapper method must not include the default value of the parameter.

Public int

NEW QUESTION # 240

You have an enumeration named truckStatus that has the following statuses:

Empty

Loaded

Completed

You have the following code:

```

switch (truckTable.TruckStatus)
{
    case TruckStatus::Empty:
        Info("1");
        break;
    case TruckStatus::Loaded:
        Info("2");
        break;
    case TruckStatus::Completed:
        Info("3");
        break;
}

```

You need to add the following statuses to the enumeration: Quarantine, InTransit What should you do?

- A. Add a post handler to the method that checks the enumeration and logic for your new enumeration values using the enumeration value.
- B. Add a post handler to the method that checks the enumeration and logic for your new enumeration values using the integer value of the enumeration.
- C. Add a post handler to the method that checks the enumeration and logic for your new enumeration values using a range comparison for your new values.
- D. Add a new case statement in the model of the existing code,

Answer: A

NEW QUESTION # 241

.....

Our MB-500 free demo provides you with the free renewal in one year so that you can keep track of the latest points happening. As the questions of exams of our MB-500 exam dumps are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our MB-500 Practice Engine can serve as a conducive tool for you make up for those hot points you have ignored. You will be completed ready for your MB-500 exam.
