Latest C_S4EWM_2023 Exam Pdf - Latest C_S4EWM_2023 Exam Vce

Knowledge is defined as intangible asset that can offer valuable reward in future, so never give up on it and our C_S4EWM_2023 exam preparation can offer enough knowledge to cope with the exam effectively. To satisfy the needs of exam candidates, our experts wrote our C_S4EWM_2023 practice materials with perfect arrangement and scientific compilation of messages, so you do

not need to study other numerous C_S4EWM_2023 study guide to find the perfect one anymore.

SAP C_S4EWM_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Internal processing (Physical Inventory, Replenishment): This topic involves defining physical inventory processes and setting up and executing replenishment.
Topic 2	<ul style="list-style-type: none">Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.
Topic 3	<ul style="list-style-type: none">System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.
Topic 4	<ul style="list-style-type: none">Warehouse Structure, Resource Management and SAP EWM Master Data: This topic encompasses defining the warehouse structure and setting up resource management, along with creating SAP EWM master data like storage bins and products, packaging specifications, supply chain units, and business partners.
Topic 5	<ul style="list-style-type: none">Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.
Topic 6	<ul style="list-style-type: none">Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.
Topic 7	<ul style="list-style-type: none">Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.
Topic 8	<ul style="list-style-type: none">Managing Clean Core: It covers evaluating and applying clean core principles to ERP to maximize business process agility, reduce adaptation efforts, and accelerate innovation.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q71-Q76):

NEW QUESTION # 71

What is a custodian in SAP EWM? Note: There are 2 correct answers to this question.

- A. It is a supply chain unit.
- B. It is a warehouse attribute.
- C. It is required for the creation of the warehouse.
- D. It is part of the stock information.

Answer: B,D

NEW QUESTION # 72

What can be used to specify the storage process? Note: There are 2 correct answers to this question.

- A. Warehouse storage type
- B. Warehouse process type
- C. Warehouse order creation rule
- D. Activity area

Answer: A,B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The storage process in SAP EWM defines how goods are stored. Option A ("Warehouse process type") is correct as it specifies the process (e.g., putaway), configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Task > Define Warehouse Process Type. Option C ("Warehouse storage type") is correct because it defines the storage location type (e.g., bulk, high rack), set in SPRO: SCM Extended Warehouse Management > Master Data > Storage Types. Option B (WOCR) groups tasks, and option D (activity area) organizes bins, neither directly specifying the storage process.

NEW QUESTION # 73

What do you have to define for a new delivery type in SAP EWM?

- A. A new document type and combine it with an existing document category
- B. A new document category and a new process profile
- C. A new document category and combine it with an existing document type
- D. A new document type and a new document category

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In SAP EWM, a delivery type (e.g., inbound or outbound) is defined by a document type, which is linked to a document category (e.g., "F" for inbound delivery). Option A ("A new document type and combine it with an existing document category") is correct because you create a new document type in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Delivery Processing > Document Types, and assign it to an existing category (e.g., "F" or "O"). Options B and C are incorrect because a process profile isn't required, and a new category isn't typically created. Option D is overly broad, as categories are predefined.

NEW QUESTION # 74

What is required to perform explicit counting using the Quality Inspection Engine? Note: There are 2 correct answers to this question.

- A. Inspection rule
- B. QM integration
- C. Work center
- D. Sampling procedure

Answer: A,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Explicit counting in the Quality Inspection Engine (QIE) in SAP EWM involves a deliberate count of stock during an inspection, often triggered by quality requirements. Option B ("Sampling procedure") is correct because it defines how many items are inspected (e.g., percentage or fixed number), configured in the quality management (QM) system and linked to EWM. Option C ("Inspection rule") is correct as it specifies the inspection process, including whether explicit counting is required, and is maintained in EWM under SPRO:

SCM Extended Warehouse Management > Quality Management > Inspection Rules. Work center (A) is relevant for production processes, not QIE counting, and QM integration (D) is a prerequisite for QIE but not a direct requirement for explicit counting itself.

NEW QUESTION # 75

Which standard functions can be executed in the background when you enter an exception code in a radio frequency (RF) transaction? Note: There are 3 correct answers to this question.

- A. Generate workflow process
- B. Confirm warehouse order
- C. Block a bin
- D. Create bin replenishment
- E. Cancel physical inventory document

Answer: A,C,D

Explanation:

When entering an exception code in a Radio Frequency (RF) transaction in SAP EWM, standard functions are triggered in the background to address specific scenarios or issues. These actions include:

* Generate Workflow Process (A):

* Exception handling can trigger a workflow process to notify or involve specific personnel for resolving the exception.

* Workflows are useful for routing tasks or approvals automatically.

* Create Bin Replenishment (B):

* If the exception indicates a stock shortage, the system can automatically generate a bin replenishment request.

* This ensures that the stock is replenished from reserve storage to the picking location.

* Block a Bin (C):

* In cases where a bin is damaged or contains incorrect stock, the system can block the bin automatically to prevent further operations.

* This prevents the use of the bin until the issue is resolved.

Incorrect Options:

* D: Confirming a warehouse order is not typically linked to exception codes.

* E: Canceling a physical inventory document is a separate process and is not triggered by exception codes in RF transactions.
