

# Learn The SAP C\_S4CPB Real Exam Dumps - To Gain Brilliant Result

With the cumulative effort over the past years, our C\_S4CPB study guide has made great progress with passing rate up to 98 to 100 percent among the market. A lot of professional experts concentrate to making our C\_S4CPB preparation materials by compiling the content so they have gained reputation in the market for their proficiency and dedication. About some esoteric points, they illustrate with examples for you on the C\_S4CPB Exam Braindumps.

Generally speaking, preparing for the C\_S4CPB exam is a very hard and even some suffering process. Because time is limited, sometimes we have to spare time to do other things to review the exam content, which makes the preparation process full of pressure and anxiety. But from the point of view of customers, our C\_S4CPB Study Materials will not let you suffer from this. As mentioned above, our C\_S4CPB study materials have been carefully written, each topic is the essence of the content. Only should you spend about 20 - 30 hours to study C\_S4CPB study materials carefully can you take the exam.

>> Pass C\_S4CPB Rate <<

## Reliable C\_S4CPB Test Experience & New C\_S4CPB Exam Notes

Do you feel that you are always nervous in your actual C\_S4CPB exam and difficult to adapt yourself to the real exam? If you answer is yes, I think you can try to use the software version of our C\_S4CPB exam quiz. I believe the software version of our C\_S4CPB training guide will be best choice for you, because the software version can simulate real test environment, you can feel the atmosphere of the C\_S4CPB exam in advance by the software version.

## SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) Sample Questions (Q17-Q22):

### NEW QUESTION # 17

#### SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the business role to your user and save. Then refresh the browser and navigate home to verify the new Launchpad Space and tiles are visible.

## Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the newly created custom all-employee business role to your own business user, save the assignment, refresh the browser, and then verify that the new Launchpad Space and its tiles are visible on the homepage.

This is the final verification step for the all-employee role and launchpad setup.

Business Scenario Explanation

In the previous tasks, you created and configured:

a new custom business role for all employees,

the required business catalogs,

a custom launchpad space,

a custom launchpad page,

and the employee self-service tiles:

Manage My Timesheet

Concur Travel Expense

However, even if all of that is configured correctly, you still will not see the new page and tiles on your homepage until the custom role is assigned to your own business user.

This task connects the configuration to your user and verifies the final end-user result.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact business role ID.

Save the user after adding the role.

Refresh the browser after saving.

Then navigate back to Home and confirm the space/page/tiles are visible.

Required Business Role

Assign the custom all-employee role created earlier:

Business Role ID: Z\_EMPLOYEES\_ALL\_#####

Business Role Description: All Employee Role #####

Example

If your suffix is 000013, the role is:

Z\_EMPLOYEES\_ALL\_000013

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to users.

The launchpad space and tiles will only become visible after the custom role is assigned to your own user.

Step 2: Search for your own business user

In Maintain Business Users:

Enter your own user name or business user ID in the search field.

Click Go.

Explanation:

You must assign the role to your own user because you are the one who will verify the launchpad result on the homepage.

Step 3: Open your user record

From the search results:

Click your user entry.

Open the user details page.

Explanation:

This opens the maintenance page where assigned business roles can be reviewed and changed.

Step 4: Switch to Edit mode

On the business user page:

Click Edit

Explanation:

Without edit mode, the role assignment list is display-only.

Step 5: Open the "Assigned Business Roles" tab

Inside the user record:

Click:

Assigned Business Roles

Explanation:

This tab contains the list of all business roles currently assigned to your user and is the correct place to add the all-employee role.

Step 6: Click Add

In the Assigned Business Roles section:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup allows you to search for and assign the custom all-employee role.

Step 7: Search for the custom all-employee role

In the Add Business Roles popup:

In the business role search field, enter:

Z\_EMPLOYEES\_ALL\_#####

Click Go

Select the role:

Z\_EMPLOYEES\_ALL\_#####

All Employee Role #####

Example

If your suffix is 000013, search for:

Z\_EMPLOYEES\_ALL\_000013

Explanation:

This is the custom role created in the earlier launchpad/employee-role tasks.

It contains the launchpad space, catalogs, and page content that must now become visible to your user.

Step 8: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the role to your user in draft mode.

Step 9: Save the business user

Back on the business user page:

Click Save

Explanation:

This is a mandatory step.

Without saving, the role assignment is not finalized, and the new launchpad content will not appear for your user.

Step 10: Confirm the role assignment

After saving, verify that your assigned roles list includes:

Z\_EMPLOYEES\_ALL\_#####

All Employee Role #####

Explanation:

This confirms that the role is now officially assigned to your user.

Step 11: Refresh the browser

After saving:

Refresh the browser completely

Explanation:

SAP launchpad content is often cached in the current session.

A browser refresh ensures the newly assigned role content is loaded.

Step 12: Navigate back to Home

After refreshing:

Return to Home

Explanation:

The role's launchpad space and page must be verified from the end-user homepage, not only from configuration apps.

Step 13: Open the page / launchpad tab

On the homepage, look for the custom page/tab that contains the employee content.

In your run, the visible page was:

General

Explanation:

The launchpad page created earlier was titled General, so that is the page you should open to verify the result.

Step 14: Verify the section title

On the page, confirm that you can see the section:

Self-Services

Explanation:

This was the section title created in the earlier page-content maintenance task.

Step 15: Verify the tiles

Under the Self-Services section, confirm that both tiles are visible:

Concur Travel Expense

Manage My Timesheet

Explanation:

These are the two required employee self-service tiles added to the page in the previous task.

Seeing both of them confirms that:

the catalogs were assigned correctly,

the launchpad page was maintained correctly,

the business role was assigned correctly,

and the browser refresh loaded the new content successfully.

Expected Result

After completing this task successfully:

your own user has the custom business role assigned,

the role is saved successfully,

after browser refresh the launchpad updates,

the homepage shows the new launchpad page,

the Self-Services section is visible,

and the tiles Concur Travel Expense and Manage My Timesheet are visible.

## NEW QUESTION # 18

### SIMULATION

Business Scenario You are working on an implementation project and need to create a test user in the system for demonstrating the professional services business processes to project managers during your upcoming Fit-to-Standard workshop. Follow the instructions below to create a new test user with a basic import of worker and work agreement data.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the Project Manager - Professional Services (BR\_PROJECT\_MANAGER\_PROF) business role to the new user and save.

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the Project Manager - Professional Services business role to the newly created test user so that the user can perform the professional-services processes required during the Fit-to-Standard workshop.

The required business role is:

Business Role ID: BR\_PROJECT\_MANAGER\_PROF

Business Role Description: Project Manager - Professional Services

Business Scenario Explanation

In the previous task, a new test user was created for demonstrating professional services processes.

That new user now needs the correct project-manager authorization.

Without this business role, the test user will not have access to the project-manager apps, pages, and processes needed for the workshop demonstration.

This task connects the newly created user to the standard professional-services project manager role.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values as required.

The business role ID must be:

BR\_PROJECT\_MANAGER\_PROF

Do not use a similar role or partial match.

Save at the end, otherwise the assignment remains incomplete.

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to the system.

Use the app search.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to maintain business users and assign business roles.

Since the new user was created in the previous task, this is the correct app to assign the new role.

Step 2: Search for the newly created Project Manager test user

In Maintain Business Users:

In the filter/search area, enter the user name of the new test user.

The required user name format is:

PM#####

Example

If your group number suffix is 0000457, then search for:

PM0000457

Click Go.

Explanation:

You must open the newly created project manager test user, not your own user.

The role assignment in this task belongs to the imported test user created in Task 4.

Step 3: Open the new business user record

From the search results:

Click the user entry with:

User Name = PM#####

Open the detail page.

Explanation:

This opens the worker/business user record where the Project Manager role will be assigned.

Step 4: Verify that you are on the correct user

Before editing, confirm the business user details are correct.

Typical expected values are:

User Name = PM#####

First Name = Project

Last Name = Manager #####

E-Mail = PM#####@dummy.sap.com

Explanation:

This check is important because assigning the role to the wrong user would cause the simulation validation to fail.

Step 5: Switch to Edit mode

On the business user detail page:

Click Edit

Explanation:

Edit mode is required so the role list can be changed.

Step 6: Open the "Assigned Business Roles" tab

Inside the business user record:

Click the tab:

Assigned Business Roles

Explanation:

This tab shows all roles currently assigned to the new test user and is the correct place to add the project manager role.

Step 7: Click Add

In the Assigned Business Roles section:

Click Add

The system opens the popup:

Add Business Roles

Explanation:

This popup is used to search and add standard SAP-delivered business roles to the user.

Step 8: Search for the Project Manager role

In the Add Business Roles popup:

In the filter field for business role ID, enter:

BR\_PROJECT\_MANAGER\_PROF

Click Go

Select:

Project Manager - Professional Services

Business Role ID: BR\_PROJECT\_MANAGER\_PROF

Explanation:

This is the exact standard business role required by the task.

It provides the professional-services project manager access for the test user.

□ Step 9: Add the role

After selecting the role:

Click OK or Apply

Explanation:

At this point, the role is added to the user in draft mode, but the change is not yet final until saved.

Step 10: Save the business user

Back on the user detail page:

Click Save

Explanation:

This is the final required step.

If you do not save, the role assignment will not be stored and the task will not be completed successfully.

□ Step 11: Verify the assignment

After saving, confirm that the user now has the role:

Project Manager - Professional Services

BR\_PROJECT\_MANAGER\_PROF

Explanation:

This confirms that the new test user is now properly prepared for later professional-services process demonstrations.

Expected Result

After the task is completed:

the new test user PM##### exists,

the role BR\_PROJECT\_MANAGER\_PROF is assigned,

the user is saved successfully,

the user can later be used as a professional-services project manager in the workshop scenario.

## NEW QUESTION # 19

### SIMULATION

Set up an Integration Scenario

Business Scenario

You are responsible for setting up the Bank Integration with File Interface (1EG). During an actual implementation, you would first download the Set-up Instructions for the business process from SAP Signavio Process Navigator. In this practical exam, all the information will be provided to you, so you do not need to download the Set-up Instructions.

Prerequisites

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Create a Communication User with the information listed below and save.

□

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a new Communication User for the integration scenario Bank Integration with File Interface (1EG).

This communication user will later be used in the integration setup, especially when defining the communication system and

communication arrangement.

Business Scenario Explanation

In this scenario, you are setting up the integration for:

Bank Integration with File Interface (1EG)

In SAP S/4HANA Cloud, technical communication between systems is usually handled through:

a Communication User

a Communication System

a Communication Arrangement

This task is the first step in that chain.

The communication user acts as the technical user that the system uses for integration-related authentication.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values shown in the task.

Do not change spaces, underscores, or capitalization.

The password should not be typed manually if the task says:

Have the system propose a password

Required Values

Use the following values exactly as shown in the task image.

Example

If your suffix is 000013, then the values become:

User Name = 1EG\_COMM\_USER\_000013

Description = 1EG Communication User

Step 1: Open the app "Communication Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the search bar or app finder.

Search for:

Communication Users

or

Maintain Communication Users

Open the app.

Explanation:

This app is used to create and maintain technical communication users for integration scenarios.

This is the correct starting point because the task explicitly says to create a Communication User.

Step 2: Start creating a new communication user

Inside the Communication Users app:

Click:

New

Explanation:

This starts the creation of a new communication user record.

Step 3: Enter the User Name

In the new communication user screen, enter:

User Name = 1EG\_COMM\_USER\_#####

Example

If your suffix is 000013, enter:

1EG\_COMM\_USER\_000013

Explanation:

This is the technical identifier for the communication user.

It must match the task exactly.

Step 4: Enter the Description

In the Description field, enter exactly:

1EG Communication User

Explanation:

This is the functional description of the technical integration user.

It should be entered exactly as written in the task to avoid validation issues.

Step 5: Let the system propose the password

In the password section:

Do not manually type a password.

Click:

Propose Password

Explanation:

The task explicitly says:

Password = Have the system propose a password

So the correct action is to use the SAP-generated password instead of entering your own value manually.

Step 6: Review the generated password

After clicking Propose Password:

The system generates a password automatically.

If the system displays the password, note it down if needed for later integration steps.

Explanation:

In some cases, the proposed password may later be needed during communication setup or documentation.

Even if not needed later in the simulation, this confirms the correct procedure was followed.

Step 7: Save the Communication User

Click:

Save

Explanation:

This finalizes the creation of the communication user.

Without saving, the technical user will not exist and the later integration steps will fail.

Step 8: Verify the Communication User

After saving, confirm that the communication user exists in the list and displays the correct values:

User Name = 1EG\_COMM\_USER\_#####

Description = 1EG Communication User

Explanation:

This confirms the task is complete and the user is ready to be used in the next integration setup tasks.

Expected Result

After this task is completed successfully:

the communication user exists,

the user name matches the required naming convention,

the description is correct,

the password was proposed by the system,

the user is saved successfully.

□

## NEW QUESTION # 20

### SIMULATION

Create a Custom Business Role with Restrictions

Business Scenario:

You are building a custom business role with restrictions to ensure the end users assigned the role have only the minimum level of access necessary to complete their core job tasks. The end users are project managers based in the United States. They should only be able to create projects, edit projects, and access projects that are occurring in the United States. They should not be able to staff any resources outside of the United States. Write, Read, and Value Help access should be restricted to only the United States for all relevant fields.

Prerequisites:

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note: Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Restrict the fields listed below for the US / 1710. All other fields should be marked as Not Maintained. Save the role when finished.

□

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Task 7: Restrict the Custom Business Role for US / 1710 and Mark All Other Fields as Not Maintained Objective The purpose of this task is to maintain the restriction values of the custom business role created in the previous task so that project managers only have the minimum access required for their work in the United States.

This task is performed on the custom business role created from the template:

Template Role: SAP\_BR\_PROJECT\_MANAGER\_PROF

Custom Role Example Pattern: BR\_PROJECT\_MANAGER\_PROF\_US\_#####

The task requires you to:

maintain only the listed restriction fields,

enter the exact required values for US and 1710,  
set all other restriction fields to Not Maintained,  
and save the role.

#### Business Scenario Explanation

This restriction setup is what makes the new custom role safe and fit for purpose.

The business requirement says that end users:

are project managers based in the United States,  
should only access relevant US project data,  
should not be able to staff or work outside the intended scope,  
should only see and maintain data for the allowed organizational scope.

This is achieved by limiting the role to:

US for country-related fields

1710 for company / organizational fields

Everything else must be Not Maintained so that unnecessary access is not left open.

#### Important Notes

Replace ##### with the last 6 digits of your group number.

Use the values exactly as shown.

Maintain only the fields listed in the table.

Set all other restriction fields to Not Maintained.

Do not leave unrelated fields blank while still restricted.

Restricted + blank is usually wrong.

Not Maintained is the correct setting for all unrelated fields.

#### Required Restriction Values

Use the following values exactly as shown in your task screenshot.

That means:

Country restriction = US

Org/company restrictions = 1710

#### Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to the system.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This app is where the custom role was created in the previous task and where its restrictions are maintained.

Step 2: Open your custom Project Manager US role

In Maintain Business Roles:

Search for your custom role.

Open the role with ID pattern:

BR\_PROJECT\_MANAGER\_PROF\_US\_#####

Example

If the suffix is 000457, then the role is:

BR\_PROJECT\_MANAGER\_PROF\_US\_000457

Explanation:

You must open the custom role, not the standard SAP template role.

The restrictions belong to the derived custom role only.

Step 3: Confirm the correct custom role is open

Check the role details and confirm:

the business role ID matches your custom role,

the description matches the US-specific project manager role,

the role is based on template SAP\_BR\_PROJECT\_MANAGER\_PROF.

Explanation:

This avoids accidentally changing the wrong role.

Step 4: Click "Maintain Restrictions"

On the custom role page:

Click:

Maintain Restrictions

Explanation:

This opens the detailed restriction maintenance area where access categories and field-level values are controlled.

Step 5: Set the access categories for restriction maintenance

On the restriction page, ensure the access categories are maintained as required for the role.  
During your run, these categories were maintained as restricted so values could be entered for the listed fields.

Explanation:

Restriction values can only be maintained correctly when the role is in the right restriction mode.

This step prepares the role so the listed fields can be populated with US / 1710 values.

Step 6: Understand the rule before entering values

This task uses a strict rule:

Keep maintained

Only the fields explicitly listed in the table should be maintained with values.

Set to Not Maintained

Every other restriction field not listed in the table must be marked:

Not Maintained

Explanation:

This is the most important logic in the whole task.

If a field is unrelated and still left as restricted or blank, it can cause validation problems or give more access than intended.

Part A: Maintain the required restriction fields

Step 7: Maintain Bank Country/Region Key

Search for:

Bank Country/Region Key

Then maintain:

Read, Value Help = US

Value Help = US

Explanation:

This ensures the user can only read and search bank-related values for the United States.

Step 8: Maintain Company Code

Search for:

Company Code

Then maintain:

Write, Read, Value Help = 1710

Read, Value Help = 1710

Do not maintain an extra standalone Value Help entry for Company Code unless the task explicitly requires it.

Explanation:

The task table does not include a standalone Company Code Value Help line.

So only the listed two Company Code restriction types should contain 1710.

Step 9: Maintain Purchasing Organization

Search for:

Purchasing Organization

Then maintain:

Write, Read, Value Help = 1710

Read, Value Help = 1710

Value Help = 1710

Explanation:

This ensures all purchasing-organization-related access for the role is limited to organizational value 1710.

Step 10: Maintain Valuation Area

Search for:

Valuation Area

Then maintain:

Read, Value Help = 1710

Value Help = 1710

Explanation:

This limits valuation-related access to the intended organizational scope.

Part B: Set all other fields to Not Maintained

Step 11: Search through the other restriction fields

After entering the required fields, review the remaining restriction objects.

Examples from your run included fields such as:

Accounting Principle

Authorization Group for Business Partners

Billing Type

and many other unrelated restriction fields

Explanation:

These fields were not listed in the task table, so they must not stay restricted.

Step 12: Mark unrelated fields as Not Maintained

For each field not listed in the required table:

Open the field setting / restriction dialog.

Choose:

Not Maintained

Important examples

From your run:

Accounting Principle → Not Maintained

Authorization Group for Business Partners → Not Maintained

Billing Type → Not Maintained

Explanation:

These fields are outside the required US / 1710 restriction list.

If you leave them restricted without a required value, the setup is incorrect.

Step 13: Do not mark the listed fields as Not Maintained

The following must stay maintained with values because they are in the required table:

Bank Country/Region Key

Company Code

Purchasing Organization

Valuation Area

Explanation:

Only the unrelated fields become Not Maintained.

The listed fields must remain restricted with the required values.

Step 14: Save the role

After all required fields are maintained and all other fields are marked Not Maintained:

Click Save

Explanation:

This finalizes the role restrictions.

Without saving, the restriction changes remain incomplete.

Step 15: Verify the restriction result

After saving, verify that:

required fields contain US and 1710 exactly as defined,

unrelated fields are no longer restricted,

the role saves without error.

Explanation:

This is your final proof that the restricted custom role has been completed correctly.

Expected Result

After the task is completed successfully:

the custom role remains based on SAP\_BR\_PROJECT\_MANAGER\_PROF,

required US / 1710 restriction fields are maintained,

all unrelated restriction fields are marked Not Maintained,

the role is saved successfully,

the role now reflects minimum necessary access for US-based project managers.

## **NEW QUESTION # 21**

### **SIMULATION**

Set up an Integration Scenario

Business Scenario

You are responsible for setting up the Bank Integration with File Interface (1EG). During an actual implementation, you would first download the Set-up Instructions for the business process from SAP Signavio Process Navigator. In this practical exam, all the information will be provided to you, so you do not need to download the Set-up Instructions.

Prerequisites

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Create a Communication System with the information listed below and save.

□

**Answer:**

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a Communication System for the integration scenario Bank Integration with File Interface (1EG).

This communication system will later be used in the communication arrangement and will reference the communication user created in the previous task.

Business Scenario Explanation

In this scenario, you are setting up:

Bank Integration with File Interface (1EG)

In SAP S/4HANA Cloud, the technical setup typically requires:

a Communication User

a Communication System

a Communication Arrangement

In Task 13, you created the communication user.

In Task 14, you now create the communication system and link that previously created communication user for inbound communication.

The communication system represents the external or technical integration partner definition used in the scenario.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values shown in the task.

Do not change capitalization, underscores, or spacing.

The communication user assigned in this task must be the one created in the previous step:

1EG\_COMM\_USER\_#####

Required Values

Use the following values exactly as shown in the task image.

Example

If your suffix is 000013, then the values become:

System ID = 1EG\_SYSTEM\_000013

System Name = Bank Integration with File Interface

Host Name = DUMMY

Inbound Communication User = 1EG\_COMM\_USER\_000013

Step 1: Open the app "Communication Systems"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the search bar or app finder.

Search for:

Communication Systems

Open the app.

Explanation:

This app is used to create and maintain technical communication systems for integration scenarios.

Because the task explicitly asks to create a Communication System, this is the correct app.

Step 2: Start creating a new Communication System

Inside the Communication Systems app:

Click:

New

Explanation:

This starts the creation of a new communication system record.

Step 3: Enter the System ID

In the communication system creation screen, enter:

System ID = 1EG\_SYSTEM\_#####

Example

If your suffix is 000013, enter:

1EG\_SYSTEM\_000013

Explanation:

This is the technical ID of the communication system.

It must exactly match the task requirement.

Step 4: Enter the System Name

In the System Name field, enter exactly:

Bank Integration with File Interface

Explanation:

This is the descriptive name of the communication system and must be entered exactly as provided.

Step 5: Enter the Host Name

In the Host Name field, enter exactly:

DUMMY

Explanation:

For this simulation, the host is not a real productive endpoint.

The task explicitly requires the placeholder value DUMMY.

Step 6: Maintain the inbound communication user

Locate the section for:

Users for Inbound Communication

Then:

Click Add or select the entry field/value help

Choose the communication user created in the previous task:

1EG\_COMM\_USER\_#####

Example

If your suffix is 000013, select:

1EG\_COMM\_USER\_000013

Explanation:

This is a critical link between the communication user and the communication system.

Without assigning the previously created communication user, the communication system setup is incomplete.

Step 7: Verify the inbound user assignment

After adding the inbound communication user, confirm that the selected user is:

1EG\_COMM\_USER\_#####

Explanation:

This confirms that the system will use the correct technical user for inbound communication in the later communication arrangement.

Step 8: Review all entered values

Before saving, check the following:

System ID = 1EG\_SYSTEM\_#####

System Name = Bank Integration with File Interface

Host Name = DUMMY

Users for Inbound Communication = 1EG\_COMM\_USER\_#####

Explanation:

This review helps avoid validation issues caused by incorrect naming, missing underscores, or selecting the wrong communication user.

Step 9: Save the Communication System

Click:

Save

Explanation:

This finalizes the creation of the communication system.

Without saving, the communication system will not exist for the next task.

Step 10: Verify the saved Communication System

After saving, confirm that the communication system exists and displays the correct values:

1EG\_SYSTEM\_#####

Bank Integration with File Interface

Host = DUMMY

inbound user = 1EG\_COMM\_USER\_#####

Explanation:

This confirms the system is successfully created and ready for the communication arrangement setup in the next step.

Expected Result

After this task is completed successfully:

the communication system exists,

the system ID matches the required naming pattern,

the system name is correct,

the host name is DUMMY,

the previously created communication user is assigned for inbound communication, the system is saved successfully.

## NEW QUESTION # 22

.....
